ROYAL SOCIETY OF CHEMISTRY
Contents

1. Sample Preparation and Introduction

Sample Introduction, Plasma–Sample Interactions, Ion Transport and Ion–Molecule Reactions: Fundamental Understanding and Practical Improvements in ICP-MS

John W. Olesik, Carl Hensman, Savelas Rabb and Deanna Rago

Microwave Digestion of Oils for Analysis of Platinum Group and Rare Earth Elements by ICP-MS

S. J. Woodland, C. J. Ottley, D. G. Pearson and R. E. Swarbrick

USN-ICPMS: A Poor Man’s High Resolution

David J. Gray, Charles Le Blanc, Wilson Chan and Bernie Denis

The Characteristics of an Off-line Matrix Removal/Pre-concentration System which uses Controlled Pore Glass Iminodiacetate as a Reagent for Inductively Coupled Plasma Mass Spectrometry

Ted McGowan and Noel Casey

Moving to the Next Level: Sample Introduction and Plasma Interface Design for Improved Performance in ICP-MS

E. McCurdy, S. Wilbur, G. D. Woods and D. Potter

2. Mass Analyser Instrumentation

QMF Operation with Quadrupole Excitation

V. J. Baranov, N. V. Konenkov and S. D. Tanner

All the Ions all the Time: Dream or Reality?

Gary M. Hiefteje, Steven J. Ray, John P. Guzowski Jr., Andrew M. Leach, Denis M. McLenathan, David A. Solyom, William C. Wetzel and Ole A. Gron

Evaluation of Inductively Coupled Plasma-Ion Trap Mass Spectrometry

Naoki Furuta, Akihiro Takeda and Jian Zheng

3. Reaction Cells for ICP-MS

Reaction Chemistry and Collisional Processes in Multipole Devices

S. D. Tanner, V. I. Baranov and D. R. Bandura

Ion–Molecule Reactions in Plasma Source Mass Spectrometry

Gregory K. Koyanagi and Diethard K. Bohme

vii
Ion–Molecule Chemistry Solutions to the ICP-MS Analytical Challenges 130
D. R. Bandura, S. D. Tanner, V. I. Baranov, G. K. Koyanagi, V. V. Lavrov and D. K. Bohme

A Reaction Mechanism for Solving the Oxide Problem in ICP-MS Analysis of the Noble Metals 148
Lorna A. Simpson, Maryanne Thomsen and Brian J. Alloway

4. Applications

Application and Quality of ICP-MS Analysis 165
Thomas Prohaska, Gerhard Stingeder, Simon N. Nelms, Christophe Quetel, Christopher Latkoczy, Stephen Hann, Gunda Kollensperger and Philip D. P. Taylor

Trace Elements in Honey Samples by means of ETV-ICP-MS 177
M. Bettinelli, S. Spezia, N. Pastorelli and C. Terni

Determination of Trace Elements in Ice Core Samples by Laser Ablation Inductively Coupled Plasma Mass Spectrometry 185
H. Reinhard, M. Kriews, O. Schrems, C. Ludke, E. Hoffman and J. Skole

Rare Earth Element Concentrations for the Mobile-Alabama River Systems 195
E. Y. Graham, W. B. Lyons, K. A. Welch, T. Jones and J. C. Bonzongo

Application of ICP-MS to a Trace Elements Mass Balance Study in a Power Plant 208
M. Bettinelli, S. Spezia, A. Fiore, W. Pastorelli and C. Terni

Determination of Mercury, Arsenic, Selenium and Antimony in Potable Water by ICP-MS 216
J. Allibone, E. Fatemian and P. J. Walker

Determination of Metals in Sewage and Industrial Waste Waters by ICP-MS in a Single Run 230
E. Fatemian, J. Allibone and P. J. Walker

5. Isotope Ratio Measurement

The Performance of Commercial Mono-Elemental Solutions for High Accuracy Mass Spectrometry 245
P. Evans, B. Fairman, C. Wolff-Briche, S. Merson and C. Harrington
ICP-MS Applied to Isotope Abundance Ratio Measurements: Performance Study and Development of a Method for Combining Uncertainty Contributions from Measurement Correction Factors 257
Christophe R. Quetel, Thomas Prohaska, Simon M. Nelms, Jurgen Diemer and Philip D. P. Taylor

Comparison of MC-ICP-MS with Quadrupole ICP-MS for the Certification of the Amount, Content and Isotopic Composition of Enriched $^{206}$Pb and $^{203}$Tl Materials Using Isotope Dilution 270
Simon M. Nelms, Thomas Prohaska, Christophe R. Quetel and Philip D. P. Taylor

Which Way for Os? A Comparison of Plasma-Source Versus Negative Thermal Ionisation Mass Spectrometry for Os Isotope Measurement 279
D. G. Pearson and C. J. Ottley

Matrix-induced Isotopic Mass Fractionation in the ICP-MS 288
Richard W. Carlson, Eric H. Hauri and Conel M. O’D. Alexander

Simultaneous Acquisition of Isotope Compositions and Parent/Daughter Ratios by Non-isotope Dilution-mode Plasma Ionisation Multi-collector Mass Spectrometry (PIMMS) 298
G. Nowell and R. R. Parrish

Combined Pb-, Sr- and O-Isotope Analysis of Human Dental Tissue for the Reconstruction of Archaeological Residential Mobility 311
P. Budd, J. Montgomery, J. Evans and C. Chenery

6. Speciation

Isotope Dilution Analysis for Trace Metal Speciation 327
J. Ignacio Gracia Alonso, Jorge Ruiz Encinar, Cristina Sariego Muniz, J. Manuel Marchante Gayon and Alfredo Sanz Medel

Prediction of Inorganic Aqueous Speciation: A Useful Tool for ICP-MS and IC-ICP-MS Analysts 347
D. A. Polya and P. R. Lythgoe

Investigations into Biovolatilisation of Metal(loids) in the Environment by using GC-ICP-TOF-MS 361
Jorg Feldmann, Karsten Haas, Laurent Naels and Silvia Wehmeier

Heidi Goenaga Infante, Monika Heisterkamp, Karen Van Campenhout, Xiaodan Tian, Ronny Blust and Freddy C. Adams
An Appetite for Arsenic: The Seaweed Eating Sheep from Orkney 380
Jorg Feldmann, Thorsten Balgert, Helle Hansen and Paramee Pengprecha

Hyphenated IC-ICP-MS for the Determination of Arsenic Speciation in Acid Mine Drainage 387
A. G. Gault, D. A. Polya and R. R. Lythgoe

Selenium Speciation in Human Urine 401
B. Gammelgaard, L. Bendahl and O. Jons

Sensitive Detection of Platinum-Bound DNA Using ICP-MS and Comparison to Graphite Furnace Atomic Absorption Spectroscopy (GFAAS) 412
A. Azim-Araghi, C. J. Ottley, D. G. Pearson and M. J. Tilby
