Dissolved Air Flotation in Water and Waste Water Treatment

Selected proceedings of the 4th International conference on DAF in Water and Waste Water Treatment, held in Helsinki, Finland 11–14 September 2000

Issue Editors: H Kluur* and R Vahala†
*Laboratory of Environmental Engineering, Helsinki University of Technology, Finland
†Finnish Water and Waste Water Works Association
Contents

Preface

Development of dissolved air flotation technology from the first generation to the newest (third) one (DAF in turbulent flow conditions)  H.J. Kiuru

Dissolved air flotation in drinking water production  T. Schofield

An integrated approach to dissolved air flotation  T. Amato, J.K. Edzwald, J.E. Tobiason, J. Dahlquist and T. Hedberg

A decade of large scale experience in dissolved air flotation  S. Kempeneers, F. Van Menxel and L. Gille

Using lessons learned and advanced methods to design a 1,500 Ml/day DAF water treatment plant  I.A. Crossley, M.T. Valade and J. Shawcross

High-rate dissolved air flotation for water treatment  M.A.P. Reali and M. Marchetto

Removal and fate of Cryptosporidium in dissolved air drinking water treatment plants  J.K. Edzwald, J.E. Tobiason, H. Dunn, G. Kaminski and P. Galant

Treatment of spent filter backwash water using dissolved air flotation  A. Eades, B.J. Bates and M.J. MacPhee

Evaluation of the performance of full-scale packed saturators  M. Valade, D. Nickols, J. Haarhoff, K. Barrett and H. Dunn

The use of dissolved air flotation in municipal wastewater treatment  H. Ødegaard

Evaluation of flocculation and dissolved air flotation as an advanced wastewater treatment  A.C.T. Pinto Filho and C.C.S. Brandão

Sewage treatment by anaerobic biological process associated with dissolved air flotation  M.A.P. Reali, J.R. Campos and R.G. Penetra

Ozonation followed by coagulation/flocculation and flotation as post-treatment of the effluent from an anaerobic baffled reactor treating domestic sewage  M.M. Marchioretto and M.A.P. Reali

Industrial and trade applications

Removal of hydrocarbons from petrochemical wastewater by dissolved air flotation  N.I. Galil and D. Wolf

Dissolved air flotation treatment of concentrated fish farming wastewaters  P. Jokela, E. Ihalainen, J. Heinänen and M. Viitasari

Biosorptive flotation for metal ion's recovery  A.I. Zouboulis, K.A. Matis, E.G. Rousou and D.A. Kyriakidis

Pretreatment of bakery wastewater by coagulation-flocculation and dissolved air flotation  J.C. Liu and C.S. Lien

Theory and modelling

Collision efficiency factor of bubble and particle ($\alpha_{bp}$) in DAF: theory and experimental verification  M. Han, W. Kim and S. Dockko
145 Optimizing dissolved air flotation design and saturation
L.A. Fériis, C.W. Gallina, R.T. Rodrigues and J. Rubio

153 A multiphase CFD model of DAF process  C.T. Ta, J. Beckley and A. Eades

159 Modelling the global efficiency of dissolved air flotation  D.M. Leppinen, S.B. Dalziel
and P.F. Linden

167 Small scale model for CFD validation in DAF application  J. Hague, C.T. Ta,
- M.J. Biggs and J.A. Sattary

175 Modelling of floc-bubble aggregate rise rates in dissolved air flotation
J. Haarhoff and J.K. Edzwald

185 The flow structure in the separation zone of a DAF pilot plant and the relation with
bubble concentration  M. Lundh, L. Jönsson and J. Dahlquist

195 Experimental and modeling evaluation of upward and downward velocities in the
co axial flotation column  K. Park, J-M. Cho, J. Oh and K. Chung

203 Characteristics of alumino-humic flocs in relation to DAF performance
D.H. Bache and E. Rasool
