Proceedings of the Bicentennial Conference on Bibliographic Control for the New Millennium

Confronting the Challenges of Networked Resources and the Web

Washington, D.C.
November 15-17, 2000

Sponsored by the Library of Congress Cataloging Directorate

Edited by Ann M. Sandberg-Fox

Library of Congress, Cataloging Distribution Service
Washington, DC • 2001
Contents

Preface / Ann M. Sandberg-Fox ........................................ vii

Greetings! / Beacher Wiggins ....................................... ix

Introduction / John D. Byrum, Jr. ................................. xi

Conference purpose and goals, intended audience,
description, and format ............................................. xv

Keynote address: From card catalogues to WebPACs:
celebrating cataloguing in the 20th century /
Michael Gorman ...................................................... xix

Dinner speaker: The New context for bibliographic
control in the new millennium / Clifford Lynch ................ xxix

1 The Library and the Web

Discussion paper: Metadata for Web resources: how
metadata works on the Web / Martin Dillon .................... 1

The Catalog as portal to the Internet / Sarah E. Thomas .......... 21

Comments: Brian E. C. Schottlaender ........................... 39

The Library catalogue in a networked environment / Tom Delsey .... 43

Comments: Jennifer Trant ......................................... 57

International metadata initiatives: lessons in bibliographic
control / Priscilla Caplan ........................................ 61

Comments: Robin Wendler ........................................ 81
# Table of Contents

## 2 Assessing Current Library Standards for Bibliographic Control and Web Access

Discussion paper: *Is precoordination unnecessary in LCSH? Are Web sites more important to catalog than books?: A reference librarian's thoughts on the future of bibliographic control* / Thomas Mann .......................................................... 87

*Crossing a digital divide: AACR2 and unaddressed problems of networked resources* / Matthew Beacom .......................................................... 135

Comments: Glenn Patton .......................................................... 155

*Exploiting LCSH, LCC, and DDC to retrieve networked resources: issues and challenges* / Lois Mai Chan .......................................................... 159

Comments: Diane Vizine-Goetz .................................................. 179

*Resource discovery using Z39.50: promise and reality* /
William E. Moen ................................................................. 185

*Authority control on the Web* / Barbara B. Tillett ...................... 207

## 3 Future Directions

*AACR2 and its place in the digital world: near-term solutions and long-term direction* / Ann Huthwaite ............................................. 221

Comments: Lynne C. Howarth .................................................. 237

*Extending MARC for bibliographic control in the Web environment* / Sally McCallum ............................................................ 245

Comments: Paul Weiss ............................................................. 263

*Business unusual: how "event awareness" may breathe life into the catalog* / Carl Lagoze ............................................................ 269

### 4 Experimentation

Discussion paper: *Some observations on metadata and digital libraries* / Caroline R. Arms .......................... 311

Discussion paper: *An initial survey and description of how selected United States government libraries, information centers, and information services provide public access to information via the Internet* / Thomas A. Downing .............................. 335

*A comparison of Web resource access experiments: planning for the new millennium* / Jane Greenberg ........................................ 343

*Redesign of library workflows: experimental models for electronic resource description* / Karen Calhoun .......................... 357

### 5 Exploring Partnerships

Discussion paper: *Metadata, cataloging, digitization, and retrieval: who’s doing what to whom: the Colorado Digitization Project experience* / Liz Bishoff, William A. Garrison .......................... 377

*Exploring partnerships: what can producers and vendors provide?* / Michael Kaplan ........................................ 389

Comments: *Vendor partnerships for bibliographic control* / Amira Aaron 415

Comments: *Catalog enrichment services; Syndetic Solutions, Inc.* / Jeff Calcagno ........................................ 421

Comments: *Librarians, producers, and vendors: the netLibrary Experience* / Lynn Silipigni Connaway .......................... 429
### Table of Contents

**Partnerships to mine unexploited sources of metadata**  
Regina Romano Reynolds  ........................................ 439

**Topical Discussion Group Recommendations**

1. **Choosing electronic resources: what is a valuable Web resource?**  .......... 463
2. **What are the continuing education needs of professional catalogers?**  .... 465
3a. **What near-term cooperative partnerships should libraries explore in the digital world?**  ........................................ 467
3b. **What long-term cooperative partnerships should libraries explore in the digital world?**  ........................................ 469
4a. **What are the near-term and long-term aspects of the multiple versions problem?**  ........................................ 473
4b. **How can AACR2 become more responsive to cataloging networked resources on the Web?**  ........................................ 475
5. **What can the library community offer in support of semantic interoperability?**  ........................................ 479
6. **What automated tools could assist libraries to meet the information needs of their users?**  ........................................ 481
7. **What steps can the library take to achieve integrated access to the catalog and other discovery tools?**  ........................................ 483
8. **How can libraries participate more actively in the development of metadata standards?**  ........................................ 485
9. **How can catalogers and metadata providers ensure that resource descriptions meet reference needs?**  ........................................ 487
