Symplectic Twist Maps
Global Variational Techniques

Christophe Golé
Smith College, Northampton, Massachusetts, USA
0 Introduction 1
  1 Fall from Paradise 1
  2 Billiards and Broken Geodesics 4
  3 An Ancestor of Symplectic Topology 8

1 Twist Maps of the Annulus 11
  4 Monotone Twist Maps of the Annulus 11
    A Definitions 11
    B Comments on the Definition 12
    C Twist Maps of the Cylinder 16
  5 Generating Functions and Variational Setting 17
    A Generating Functions 17
    B Variational Principle 18
    C Periodic Orbits 20
    D Rotation Numbers 21

6 Examples 21
  A Standard Map 21
  B Elliptic Fixed Points of Area Preserving Maps 23
  C The Frenkel–Kontorova Model 24
  D Billiard Maps 25

7 The Poincaré–Birkhoff Theorem 27

2 The Aubry–Mather Theorem 31
  8 Introduction 31
    A Motivation And Statement Of The Theorem 31
    B From The Annulus To The Cylinder 33
  9 Cyclically Ordered Sequences And Orbits 34
  10 Minimizing Orbits 36
  11 CO Orbits Of All Rotation Numbers 40
    A Existence Of CO Periodic Orbits 40
    B Existence of CO Orbits Of Irrational Rotation Numbers 41
  12 Aubry-Mather Sets 41
## Content

13 Appendix: Cyclically Ordered Sequences and Circle Maps 46
   A Proofs Of Lemmas 9.1 And 9.2 47
   B Dynamics Of Circle Homeomorphisms 49

3 Ghost Circles 53

14 Gradient Flow of the Action 54
   A Definition of the Flow 54
   B Order Properties of the Flow 55

15 The Gradient Flow and the Aubry-Mather Theorem 57

16 Ghost Circles 59

17 Construction of Ghost Circles 63
   A Ghost Circles Through Any Aubry-Mather Sets 63
   B Smooth, Rational Ghost Circles 64

18 Construction of Disjoint Ghost Circles 67

19 Proof of Lemma 18.5 70

20 Proof of Theorem 18.1 73
   A Rational \( C_\omega \)'s 74
   B Irrational \( C_\omega \)'s 74

21* Remarks and Applications 78
   A Remarks 78
   B Approximate Action-Angle Variables for an Arbitrary Twist Map 79
   C* Partition for Transport 80
   D* An Extension of Aubry's Fundamental Lemma 81

22 Proofs of Monotonicity and of the Sturmian Lemma 82
   A Proof of Strict Monotonocity 82
   B Proof of the Sturmian Lemma 83

4 Symplectic Twist Maps 87

23 Symplectic Twist Maps of \( T^n \times \mathbb{R}^n \) 88
   A Definition 88
   B Comments on the Definition 89
   C The Variational Setting 89

24 Examples 91
   A The Generalized Standard Map 91
   B Hamiltonian Systems 92
   C Elliptic Fixed Points 93
25 More on Generating Functions
   A Homeomorphism Between Twist Maps and Generating Functions 95
   B Local vs. Global Twist 96
   C Differential of the Map vs. Generating Function 98

26 Symplectic Twist Maps on General Cotangent Bundles of Compact Manifolds
   A Definition 99
   B Maps vs. Functions, Revisited 100
   C Examples 101

5 Periodic Orbits for Symplectic Twist Maps of $\mathbb{T}^n \times \mathbb{R}^n$
27 Presentation Of The Results
   A Periodic Orbits and Rotation Vectors 103
   B Theorems of Existence of Periodic Orbits 104
   C Comments on the Asymptotic Conditions 105
   D History 106

28 Finite Dimensional Variational Setting

29 Second Variation and Nondegenerate Periodic Orbits

30 The Coercive Case

31 Asymptotically Linear Systems

32 Ghost Tori

33 Hyperbolicity Vs. Action Minimizers

6 Invariant Manifolds
34 The Theory of Kolmogorov–Arnold–Moser
35 Properties of Invariant Tori
   A Recurrent Invariant Toric Graphs are Lagrangian
   B Orbits on Lagrangian Invariant Tori Are Minimizers
   C Birkhoff's Graph Theorem
   D* Aubry-Mather Theorem Via Trimming
   E* Generalizations of Birkhoff's Graph Theorem to Higher Dimensions

36 (Un)Stable Manifolds and Heteroclinic orbits
   A (Un)stable Manifolds
   B Variational Approach to Heteroclinic Orbits
   C Splitting of Separatrices and Poincaré–Melnikov Function

37* Instability, Transport and Diffusion
   A* Some Questions About Stability
7 Hamiltonian Systems vs. Twist Maps

38 Case Study: The Geodesic Flow

A A Few Facts About Riemannian Geometry
B The Geodesic Flow as a Twist Map
C The Method of Broken Geodesics
D The Standard Map on Cotangent Bundles of Hyperbolic Manifolds

39 Decomposition of Hamiltonian Maps into Twist Maps

A Legendre Condition Vs. Twist Condition
B Lagrangian Formulation Of Theorem 39.1
C Global Twist: The Case of the Torus
D Decomposition of Hamiltonian Maps into Twist Maps

40 Return Maps in Hamiltonian Systems

41 Suspension of Symplectic Twist Maps by Hamiltonian Flows

A Suspension with Fiber Convexity
B Suspension without Convexity

8 Periodic Orbits for Hamiltonian Systems

42 Periodic Orbits in the Cotangent of the n-Torus

A Optical Hamiltonians
B Asymptotically Quadratic Hamiltonians
C Remarks About the Above Results

43 Periodic Orbits in General Cotangent Spaces

A The Discrete Variational Setting
B The Isolating Block
C End of Proof of Theorem 43.1
D Periodic Orbits of Different Homotopy Classes

44 Linking of Spheres

9 Generalizations of the Aubry-Mather Theorem

45* Theory for Functions on Lattices and PDE's

A* Functions on Lattices
B* PDE's
C* Laminations by Minimal Surfaces
A2 Some Topological Tools
   59* Hands on Introduction to Homology Theory
      A* Finite Cell Complexes
      B* Cellular Homology
      C* Cohomology
   60* Morse Theory
   61 Controlling the Topology of Invariant Sets
   62 Topological Proofs
      A Proof of the Cuplength Estimate in Theorem 61.2
      B* The Betti Number Estimate of Theorem 61.2 and Conley's Theory
      C Floer's Lemma
      D Proof of Proposition 61.4
      E* Floer's Theorem of Global Continuation of Hyperbolic Invariant Sets
   63 Generating Phases Quadratic at Infinity
      Generating Phases on Product Spaces
      Generating Phases on Vector Bundles
   64* Covering Spaces, Lifts and Fundamental Group
