Preface ........................................ vii

H. Tanaka: An Appreciation (by Henry McKean) .................. 1

From Local Times to Random Environments ... (by Marc Yor) .... 2

Contributions and Influences of Professor Tanaka in Stochastic Analysis (by Shinzo Watanabe) .......................... 5

Some Comments on My Mathematical Works in Retrospect (by Hiroshi Tanaka) ........................................... 10

[5] Additive Functionals of the Brownian Path (with H. P. McKean) ... 19

[7] Note on Continuous Additive Functionals of the 1-Dimensional Brownian Path ................................................. 47

[8] Existence of Diffusions with Continuous Coefficients .................. 54

[15] An Inequality for a Functional of Probability Distributions and Its Application to Kac’s One-Dimensional Model of a Maxwellian Gas ... 83

[16] On Markov Process Corresponding to Boltzmann’s Equation of Maxwellian Gas .............................................. 89

[22] Probabilistic Treatment of the Boltzmann Equation of Maxwellian Molecules ...................................................... 118

†Numbers in brackets refer to the Bibliography of Hiroshi Tanaka (see pages 425-428)

[27] Some Probabilistic Problems in the Spatially Homogeneous Boltzmann Equation ........................................ 172

[29] Limit Theorems for Certain Diffusion Processes with Interaction ......................................................... 182

[32] Central Limit Theorem for a System of Markovian Particles with Mean Field Interactions (with T. Shiga) ................ 202

[33] Propagation of Chaos for Diffusing Particles of Two Types with Singular Mean Field Interaction (with M. Nagasawa) .......... 223

[34] Stochastic Differential Equations for Mutually Reflecting Brownian Balls (with Y. Saisho) .......................... 238

[35] Limit Distribution for 1-Dimensional Diffusion in a Reflected Brownian Medium .................................... 254

[36] Limit Distributions for One-Dimensional Diffusion Processes in Self-Similar Random Environments .................. 270

[38] Stochastic Differential Equation Corresponding to the Spatially Homogeneous Boltzmann Equation of Maxwellian and Non-Cutoff Type ........................................ 292

[41] Limit Theorem for One-Dimensional Diffusion Process in Brownian Environment ........................................ 311

[49] On the Maximum of a Diffusion Process in a Drifted Brownian Environment (with K. Kawazu) ......................... 328

[51] Recurrence of a Diffusion Process in a Multidimensional Brownian Environment .................................... 336

[52] Localization of a Diffusion Process in a One-Dimensional Brownian Environment .................................... 341

[54] Diffusion Processes in Random Environments ........................................ 353
[55] Environment-Wise Central Limit Theorem for a Diffusion in a Brownian Environment with Large Drift .................................................. 361

[56] A Diffusion Process in a Brownian Environment with Drift (with K. Kawazu) ................................................................. 373

[57] Limit Theorems for a Brownian Motion with Drift in a White Noise Environment ................................................................. 396

[58] Invariance Principle for a Brownian Motion with Large Drift in a White Noise Environment (with K. Kawazu) .................. 406

[63] Some Theorems Concerning Extrema of Brownian Motion with d-Dimensional Time ................................................................. 415

Bibliography of Hiroshi Tanaka ................................................................. 425

Permissions .......................................................................................... 429
