12\textsuperscript{TH} EUROPEAN CONFERENCE ON
WHITE DWARF STARS

Proceedings of a conference held at
The University of Delaware, Newark, Delaware, USA
12-16 June 2000

Edited by

J. L. Provencal
\textit{Mt. Cuba Astronomical Observatory, Wilmington, Delaware, USA}\textsuperscript{1}
\textit{Department of Physics \\& Astronomy, University of Delaware,}
\textit{Newark, Delaware, USA}\textsuperscript{2}

and

H. L. Shipman, J. MacDonald, and S. Goodchild
\textit{Department of Physics \\& Astronomy, University of Delaware,}
\textit{Newark, Delaware, USA}
Contents

Preface xi
Conference Photo xiv

Part 1. WHITE DWARF EVOLUTION
From Red Giant to Planetary Nebula: Studies of the Transitional Objects 3
B. Hrivnak
Revision of the Initial-Final Mass Relation 13
V. Weidemann
White Dwarf Cooling Ages in Open Clusters 14
T. von Hippel
The Born Again Phenomena and its Relationship to Hydrogen Deficient Post-AGB Objects 20
T. M. Lawlor & J. MacDonald
The Equation of State of Fluid Mixtures of Hydrogen and Helium 27
J. MacDonald
Formation and Evolution of a 0.242 M_☉ Helium White Dwarf in Presence of Element Diffusion 31
L. G. Althaus, A. M. Serenelli & O. G. Benvenuto
The Shapes and Distances of Planetary Nebulæ 38
A. Hajian
Shapes of Planetary Nebulæ and a Correlation with the Chemical Composition of the Central Star 46
J. Johnson, T. Miyashiro & H. L. Shipman
White Dwarf Evolution: A Review 47
H. L. Shipman

Part 2. ATMOSPHERES AND CHEMICAL COMPOSITION
Hot DO white dwarfs: The EUVE spectrum of RE 0503-289 and FUSE observations of HS 0713+3958 55
K. Werner, J. L. Deetjen, T. Rauch & B. Wolff
FUSE observations of the PG 1159-type Central Star K 1-16 60
High resolution Keck and NTT spectra of PG 1159 stars 65
Contents

Stratified Non-LTE Model Atmospheres for hot White Dwarfs .......................... 69
S. Dreizler & S. Schuh

Application of Stratified Non-LTE Model Atmospheres to Hot DA White Dwarfs ................................................................. 79
S. Schuh, S. Dreizler & B. Wolff

Sphericity Effects in Metal-Line Blanketed NLTE Model Atmospheres ........ 86
T. Nagel, S. Dreizler & K. Werner

Far Ultraviolet Spectroscopic Explorer Observations of the White Dwarf GD 246 ................................................................. 90
P. Chayer, J. W. Kruk, S. Vennes & J. Dupuis

FUSE Observations of the Hottest DA White Dwarfs .................................. 94

Iron-group Line Blanketing in the Far-UV range of the sdO Feige 67 .. 101
J. L. Deetjen

STIS Observations of five hot DA White Dwarfs ........................................... 105
N. P. Bannister, M. A. Barstow, J. B. Holberg, & F. C. Bruhweiler

The DAO-DA and PG1159-DO Transition as a Consequence of Diffusion and Mass Loss ................................................................. 111
K. Unglaub & I. Bues

Sounding Rocket Spectroscopy of G191–B2B from 254–317 Å ....................... 117
K. Gunderson, E. Wilkinson, J. C. Green & M. A. Barstow

EUVE Observations of Ultra-Massive White Dwarfs .................................... 124
J. Dupuis, S. Vennes & P. Chayer

Heavy Elements in DA White Dwarfs ............................................................ 128

PG1115+166: a New DAB White Dwarf in the DB Gap ................................ 135
M. R. Burleigh, N. P. Bannister, M. A. Barstow & P. Maxted

HST Observations of the DAB White Dwarf HS0209+0832 .......................... 139
B. Wolff, S. Jordan & D. Koester

Spectral Monitoring of HS 0209+0832 a DAB White Dwarf in the DB Gap 143
H. Edelmann, U. Heber & R. Napiwotzki

Carbon and PG0112+104 ............................................................................ 147
J. L. Provencal, H. L. Shipman, P. Thejll & S. Vennes

A Search for H-α in a Sample of Hot DB stars ........................................ 153
C. Hunter, F. Wesemael, R. A. Saffer, P. Bergeron, A. Beauchamp

Hydrogen and Metals in Cool DZ White Dwarfs ....................................... 157
B. Wolff & D. Koester
Part 3. sdB STARS
Spectral Analysis of sdB Stars from the Hamburg ESO Survey .......................... 165
Spectral Analysis of four multi mode pulsating sdB Stars ................................. 171
   U. Heber, I. N. Reid & K. Werner
New Pulsating sdB Stars from the HS Survey ................................................. 177
Identifying Modes in Pulsating Subdwarf B stars: A Possibility and a Puzzle ........ 181
   M. Reed, S. D. Kawaler & S. J. Kleinman
The Binary Fraction of sdB Stars ........................................................................... 187
   P. Maxted, T. R. Marsh & R. C. North
On The Origin Of Subdwarf B Stars and Related Metal-Rich Binaries ..................... 192
   E. M. Green, J. Liebert & R. A. Saffer

Part 4. WHITE DWARFS IN BINARIES
Observations of the Unusual PN Central Star PHL 932 with HET .......................... 199
   R. A. Wade
The Surface Temperatures of White Dwarf Accreters in Dwarf Novae ..................... 205
   E. M. Sion, J. Urban & K. Lyons
Helium accretion discs in AM CVn Systems ....................................................... 209
   M. Nasser & J.-E. Solheim
The Insidious Duplicity of Sanduleak-Pesch B .................................................. 215
   D. S. Finley & N. Craig
Resolving Sirius-like Binaries with the Hubble Space Telescope ........................ 222
   M. R. Burleigh, M. A. Barstow, H. E. Bond & J. B. Holberg
Procyon B: Inside the Iron Box or Not? ............................................................... 228
   J. L. Provencal, H. L. Shipman, D. Koester, F. Wesemael & P. Bergeron
The White Dwarf Companion to PSR B0820+02 ................................................... 234
   D. Koester
HST Observations of the Hyades DA+dK Binary V471 Tauri ................................. 240
   M. S. O'Brien, H. E. Bond & E. M. Sion
The Mass Distribution and Kinematics of White Dwarfs in Wide Binary Systems ........ 246
   N. M. Silvestri, T. D. Oswalt, M. A. Wood, J. A. Smith, I. N. Reid & E. M. Sion
Contents

Reprocessing of $L_c$ in Strongly Irradiated Atmospheres of Unevolved Companions in Precataclysmic Binaries (PCB) .................................................. 253

V. Pustynski & I. Pustylnik

The Mysteries of GD394 .......................................................... 257

J. Dupuis, P. Chayer, Stéphane Vennes, D. J. Christian & J. W. Kruk

Near-IR observations of the DA White Dwarf GD394 .................. 263

P. Dobbie, R. Jameson, Fraser Kenyon & B. Zuckerman

Part 5. MAGNETIC WHITE DWARFS

Magnetic White Dwarfs ....................................................... 269

S. Jordan

Search for fast rotation in Grw + 70°8247 .............................. 279

S. Friedrich & S. Jordan

Part 6. VARIABLE WHITE DWARFS

Asteroseismology of pre-white dwarfs: a test and a speculation .... 287

S. D. Kawaler

Asteroseismology of PG0122+200: latest news .......................... 293

The ZZ Ceti Instability Strip .................................................. 299

D. Koester & J. B. Holberg

Non-linear Effects in Time-Resolved Spectra of DAV White Dwarfs .. 303

J. Ising & D. Koester

The Structure of the ZZ Ceti Stars L 19–2 and GD 165 ................ 307

P. A. Bradley

Rotational splitting and possible resonances in the Cool ZZ Ceti Star HS 0507+0434B ......................................................... 313

G. Handler & E. Romero-Colmenero

Mode Identification, Velocity Variations and the Red Edge of the ZZ Ceti Instability strip from time-resolved spectroscopy ............ 320

R. Kotak & M. H. van Kerkwijk

Asteroseismology for the Masses ........................................... 324

T. S. Metcalfe

The Effect of $^3$He Diffusion on the Pulsational Spectra of DBV Models ................................................................. 330

M. H. Montgomery, T. S. Metcalfe & D. E. Winget

Implications of Constraining the Rate of Period Change with Time in a Pulsating White Dwarf .................................................. 337

A. S. Mukadam, D. E. Winget & S. O. Kepler
Author Index ................................................. 423
Object Index ................................................ 425
Subject Index ............................................... 428
