Perspective

9 Mantle Plumes and Earth Systems

Introduction
Superplumes, Supercontinents, and the Carbon Cycle
   Introduction
Supercontinent Formation
Supercontinent Breakup
Superplume Events
Sea Level
Global Warming
The Biosphere

Sedimentary Systems
   Strontium Isotopes in Marine Carbonates
   Banded Iron Formation
   Sedimentary Phosphates

Geological Consequences of Superplume Events and Supercontinents
   Mid-Cretaceous Event
   Permo–Carboniferous Event
   Ordovician Event
   The 1.9-Ga Event
      Sea Level
      Black Shales
      Paleoammonites
      Banded Iron Formation
      Sedimentary Phosphates
      Strontium Isotopes in Seawater
      Stromatolites
      Massive Sulfate Evaporites
      Carbon and Sulfur Isotopes
      The Case for a 1.9-Ga Superplume Event
   The 2.7-Ga Event
   2.0- and 0.6-Ga Events
   Mass Extinctions
Conclusion
