Contents

Preface

I. Selecting a Topic

A. Choosing a Subject
   1. Brainstorming 1
   2. Framing an Analytic Question 13

B. Forming an Outline
   3. Typical Outlines 23
   4. The Roadmap Concept 35

II. Reviewing the Literature

A. Tools
   5. Reference Search Resources 45
   6. Bibliographic Software 63

B. Writing the Review
   7. Meta-Analysis 81
   8. Format of Your Literature Review 95
III. Developing Your Model
   A. Specifying Your Model
      9. Thinking About Models 105
      10. Operationalizing Variables 121
   B. Defining the Methodology
      11. Research Designs 137
      12. Selecting Statistical Procedures 163

IV. Presenting Your Case
   A. Telling a Story
      13. Writing Fundamentals 177
      14. Fallacies, Reliability, Validity, Significance, and Association 189
      15. Datagraphics 205
   B. Data-Gathering
      16. Research Ethics 221
      17. Data-Gathering Strategies 233
      18. Data-Gathering Resources 251

V. Coming to a Conclusion
   A. The Conclusion
      19. Drawing Inferences and Making Generalizations 267
      20. Pointing Ahead 279
   B. The Dissertation Process
      21. The Thesis or Dissertation Committee 289
      22. The Thesis or Dissertation Defense 301

VI. Final Topics
   A. The Humanities and the Natural Sciences
      23. Quantitative Research Writing in the Humanities 309
      24. Quantitative Research Writing in the Natural Sciences 319
   B. Funding
      25. Dissertation Grant Programs 337
