CONTENTS

Preface v

1. Introduction 1

TESTING FOR UNIVARIATE NORMALITY

2. Plots, Probability Plots and Regression Tests 15

3. Test Using Moments 41

4. Other Tests for Univariate Normality 69

5. Goodness of Fit Tests 99

6. Tests for Outliers 123

7. Power Comparisons for Univariate Tests for Normality 143

8. Testing for Normality with Censored Data 159

TESTING FOR MULTIVARIATE NORMALITY

9. Assessing Multivariate Normality 181
10. Testing for Multivariate Outliers 225

ADDITIONAL TOPICS

11. Testing for Normal Mixtures 263
12. Robust Estimation of Location and Scale 287
13. Computational Issues 317

Appendix A: Data Sets Used in Examples 339
Appendix B: Parameter and Critical Values 355
Appendix C: Function Optimization Computer Subroutine Variable Metric Method 459

Index 463
