Co-participants:

- **TMS**: The Minerals, Metals, and Materials Society
- **SEG**: Society of Exploration Geophysicists
- **AGU**: American Geophysical Union
- **WAN**: The Women's Aquatic Network
- **COPRI**: The Coasts, Oceans, Ports and Rivers Institute
- **AMS**: The American Meteorological Society
- **OS**: The Oceanography Society
Volume One

Session 1
Acoustic Imaging
Session Co-Chair: John Impagliazzo
NUWC, Newport, RI

Acoustical Imaging with Compact Sensors for Mine Countermeasures
Applications

Bruce M. Johnson and Andy Pedersen, Naval Explosive Ordinance Disposal (EOD) Technology Division, Indian Head, MD

Object Identification with Acoustic Lenses
Edward Belcher, Applied Physics Laboratory University of Washington, Seattle, WA;
Brian Matsuyama, Space and Naval Warfare Systems Center, San Diego, CA;
Gary Trimble, Lockheed Martin Perry Technologies, Sunnyvale, CA

AMI: A 3-D Imaging Sonar For Mine Identification in Turbid Waters
Robert Vesetas and Graeme Manzie, Thomson Marconi Sonar Pty, Rydalmere, Australia

Imaging with a 2 MHz Sparse Broadband Planar Array
John Impagliazzo and Michael Medeiros
Naval Undersea Warfare Center, Division Newport, Newport, RI; Steven Kay, Signal Processing Systems, Middletown, RI

Recent Advances in 1-3 Piezoelectric Polymer Composite Transducer Technology for AUV/UUV Acoustic Imaging Applications
Kim C. Benjamin, Naval Sea Systems Command Division, Newport, RI

Rapid Estimation of the Range-Doppler Scattering Function
Steven M. Kay, University of Rhode Island Department of Electrical and Computer Engineering, Kingston, RI;
S. Bradford Doyle, Naval Undersea Warfare Center Division Newport, RI

Session 2
Very Shallow Water Mine Countermeasures
Session Co-Chair: Jody L. Wood-Putnam
Office of Naval Research, Coastal Systems Station, Dahlgren Division, Naval Surface Warfare Center, Panama City, FL

Magnetic Detection of Underwater Targets in Very Shallow Water For Searches at High Speeds
T.R. Clem, D.J. Overway, J.W. Purpura, and J.T. Bono, Coastal Systems Station, Panama City, FL

Sub-critical Isonification of Buried Elastic Targets
Irena Veljkovic, Joseph R. Edwards, and Henrik Schmidt, Massachusetts Institute of Technology, MA

Mitigation of Platform Generated Magnetic Noise Impressed on a Magnetic Sensor Mounted in an Autonomous Underwater Vehicle
George I. Allen and Michael Wynn, Naval Surface Warfare Center, Dahlgren Division, Coastal Systems Station, Panama City, FL; Robert Matthews, Quantum Magnetics Inc, San Diego, CA

The INTIFANTE’00 Sea Trial:
Preliminary Source Localization and Ocean Tomography Data Analysis
S.M. Jesus, C. Soares, and C. Lopes, SiPLAB-FCT, Universidade do Algarve, Faro, Portugal;
E. Coelho and J. Onofre, Instituto Hidrográfico, Lisboa, Portugal; P. Picco, ENEA, S. Teresa, La Spezia, Italy.
# Table of Contents

**Acoustic Detection of Targets Buried at Steep and Subcritical Grazing Angles** ................................................................. 72
J.L. Lopes, Coastal Systems Station, Panama City, FL; D.L. Folds, Ultra-Acoustics, Inc., Woodstock, GA; I.C. Paustian, Coastal Systems Station, Panama City, FL; J.L. Wood-Putnam, Coastal System Station, Panama City, FL

**Reacquisition and Imaging of Mine-Like Targets in Very Shallow Water Using the Cetus II AUV and MIRIS High-Resolution Sonar** ................................................................. 79
G.M. Trimble, MARE Laboratory, Lockheed Martin
Perry Technologies, Sunnyvale, CA; E.O. Belcher, Applied Physics Laboratory, University of Washington, Seattle, WA

**Defining Surf Zone Crawler Search Strategies for Minefield Reconnaissance** ........................................................................... 85
Lawrence R. Howell, BAE Systems, Panama City Beach, FL; William C. Littlejohn, Carmen Guastella, and Nelky Rodriguez-Casanova, Naval Surface Warfare Center Dahlgren Division, Coastal Systems Station, Panama City, FL

**Bottom Crawling Synthetic Aperture Sonar for Very Shallow Water Mine Countermeasures** .................................................. 97

**Fluorescence Imaging Laser Line Scan (FILLS) for Very Shallow Water Mine Countermeasures** .............................................. 102
Michael Strand, Naval Surface Warfare Center, Coastal Systems Station, Panama City, FL

**Partial Polarization Signature Results from the Field Testing of the Shallow water Real-time Imaging Polarimeter (SHRIMP)** .......... 107
J.S. Taylor Jr., Naval Surface Warfare Center Dahlgren Division, Coastal Systems Station, Panama City, FL; L.B. Wolff, Equinox Corporation, New York, NY

**Hunting for Mines with REMUS: A High Performance, Affordable, Free Swimming Underwater Robot** ........................................ 117
Christopher von Alt, Ben Allen, Thomas Austin, Ted Forrester, Robert Goldsborough, Michael Purcell, and Roger Stokey, Woods Hole Oceanographic Institution, Woods Hole, MA

**Operational Testing of the Battlespace Preparation AUV in the Shallow Water Regime** .............................................................. 123
Jeff W. Rish, III, NSWC/DD Coastal Systems Station, Modeling and Prediction Branch, Panama City, FL; Scott Wilcox, Robert Grieve, Ian Montieth, and Jerome Vaganay, Bluefin Robotics Corporation, Cambridge, MA

**Algorithm Fusion for Automated Sea Mine Detection and Classification** .................................................................................. 130
Gerald J. Dobeck, Naval Surface Warfare Center, Coastal Systems Station, Dahlgren Division, Panama City, FL

**Fusion of Adaptive Algorithms for the Classification of Sea Mines Using High Resolution Side Scan Sonar in Very Shallow Water** ........................................................................ 135
Tom Aridgides and Manuel Fernández, Lockheed Martin, Naval Electronics and Surveillance Systems, Syracuse, NY; Gerald Dobeck, Naval Surface Warfare Center, Coastal Systems Station, Dahlgren Division, Panama City, FL

**Motion Model Development for Very Shallow Water/Surf Zone Crawler** ................................................................................. 143
W. C. Littlejohn, Naval Surface Warfare Center Dahlgren Division, Coastal Systems Station, Panama City, FL

**Very Shallow Water Mine Countermeasures Using the REMUS AUV: A Practical Approach Yielding Accurate Results** ............... 149
Roger Stokey, Tom Austin, Ben Allen, Ted Forrester, Eric Gifford, Rob Goldsborough, Greg Packard, Mike Purcell, and Chris von Alt, Oceanographic Systems Laboratory, Woods Hole Oceanographic Institution, Woods Hole, MA
Session 3
Broadband Synthetic Aperture Sonar
Session Chair .................Dr. Kerry W. Commander
Acoustical Sensing Branch, Coastal Systems Station, Panama City, FL

Session Co-Chair .................... Bruce Johnson
Acoustical Sensing Branch, Coastal Systems Station, Panama City, FL

Noncoherent Autofocus of Single-Receiver Broad-Band Synthetic Aperture Sonar Imagery .................. 157
H.J. Callow, M.P. Hayes, and P.T. Gough, Acoustics Research Group, University of Canterbury, Christchurch, New Zealand

Statistical Autofocus of Synthetic Aperture Sonar Images Using Image Contrast Optimization .................. 163
S.A. Fortune, M.P. Hayes, and P.T. Gough, Acoustics Research Group, University of Canterbury, Christchurch, New Zealand

Using the CLEAN Algorithm to Restore Undersampled Synthetic Aperture Sonar Images .................. 170
Kenneth M. Chick and Kieffer Warman, Dynamics Technology, Inc., Torrance, CA

InSAS’00: Interferometric SAS and INS Aided SAS Imaging .................. 179
L. Wang, A. Bellettini, R. Hollett, A. Tesei, and M. Pinto, NATO SACLANT Undersea Research Centre, La Spezia, Italy; S. Chapman, QinetiQ, Bincleaves, UK; K. Gade, FFI, Kjeller, Norway

Broadbeam Multi-Aspect Synthetic Aperture Sonar .................. 188
Daniel A. Cook, James T. Christoff, and Jose E. Fernandez, Naval Surface Warfare Center, Coastal Systems Station, Dahlgren Division, Panama City, FL

Coherence of Pulsed Signal and Implications to Synthetic Aperture Sonar Processing .................. 193
Enson Chang and Mark D. Tinkle, Dynamics Technology, Inc., Torrance, CA

The Reverberation for a Broadband Synthetic Aperture Sonar .................................................. 202
R.J. Wyber, Midspar Systems Pty Ltd, Oyster Bay, NSW, Australia

Synthetic Aperture Sonar Processing for Widebeam/Broadband Data .................. 208
Kieffer Warman, Kenneth Chick, and Eric Chang, Dynamics Technology, Inc., Torrance, CA

Session 4
Detection of Buried Objects Using Synthetic Aperture Sonar
Session Chair .................Dr. Kerry W. Commander
Aperture Sonar Acoustical Sensing Branch, Coastal Systems Station, Panama City, FL

Session Co-Chair .................... Bruce Johnson
Aperture Sonar Acoustical Sensing Branch, Coastal Systems Station, Panama City, FL

Detection and Classification of Buried Objects With an Adaptive Acoustic Mine-hunting System .................. 212
Daniel D. Sternlicht, David W. Lemonds, and R. David Dikeman, ORINCON Corporation, San Diego, CA; Marc Ericksen, Sea Engineering Inc.; Steven G. Schock, Ocean Engineering Dept., Florida Atlantic University, Boca Raton, FL

Buried Target Detection with a Synthetic Aperture Sonar .................. 220
John E. Piper, Coastal Systems Station, NAVSEA, Panama City, FL

Synthetic Aperture Sonar Point Response for Buried Objects .................. 225
M.D. Tinkle and Enson Chang, Dynamics Technology, Inc., Torrance, CA

Multiple Experimental Investigations Into Buried Mines Detection and Classification with SAS .................. 234
A. Hetet, L. Pigois, and A. Salaun, Groupe d’ Etudes Sous-Marines l’ Atlantique (GESMA), BREST Naval, France; I. N. Goh, C. K. Lim, and C. S. Chia, DSO National Laboratories, Singapore
Suppressing Reverberation by Multipath Separation for Improved Buried Object Detection .................................................. 236
I.P. Kirsteins, John Fay, and James Kelly, Naval Undersea Warfare Center, Newport, RI

Session 5
Real Time Measurement Systems
Session Chair .................................. Dr. Gary McMurtry
Oceanography SOEST
University of Hawaii

Development of Extreme Environment Systems For Seeking out Extremophiles .......................................................... See Session 52
Arthur L. Lane, Observational Instruments Div., Jet Propulsion Laboratory, Pasadena, CA; Frank D. Carsey, Gindi D. French, Lloyd C. French, and Alberto Behar, Jet Propulsion Laboratory, Pasadena, CA; Hermann Engelhardt, Geological and Planetary Sciences Div., California Institute of Technology, Pasadena, CA

New Seafloor Observatory Networks in Support of Ocean Science Research ...................................................... 245
H.L. Clark, National Science Foundation

Tracing Groundwater Discharge Into the Ocean via Continuous Radon-222 Measurements ........................................... 251
William C. Burnett, Michael Lambert, and Henrieta Dulaiova, Department of Oceanography, Florida State University, Tallahassee, FL

Field Chemical Analysis Using Real-Time In-Water Mass Spectrometry ................................................................. 256
R.T. Short, D.P. Fries, G.P.G. Kibelka, M.L. Kerr, S.K. Toler, P.G. Wenner, and R. H. Byrne, College of Marine Science, Center for Ocean Technology, University of South Florida, St. Petersburg, FL

Mass SURFER: a Low-Power Underwater Mass Spectrometer for Monitoring Dissolved Gas, Solutes and Large Organic Compounds ................................................................. 259
Gary M. McMurtry, SOEST, University of Hawaii, Honolulu, HI, and Pacific Environmental Technologies, Honolulu, HI; Steven J. Smith, Jet Propulsion Laboratory, California Institute of Technology, Pasadena, CA

Remote Sensing and Acoustic Telemetry .................................................................................................................... 264
Dale Green, Benthos Inc., North Falmouth, MA; Truong Nguyen, UCSD - ECE Dept., San Diego CA

Real-Time Deepwater Current Profiling System ................................................................. 269
Michael Vogel, Shell Global Solutions (US); Darryl Symonds, RD Instruments; Ning Xiao, LinkQuest Inc.; Tim Cook, Flotation Technologies, Inc.; Charles Abbott, Evans-Hamilton, Inc.

A Video-Based Stereoscopic Imaging and Measurement System (SIMS) for Undersea Applications .............................................. 275
H.-T. Liu, QUEST Integrated, Inc., Kent, WA

The Environmental Sample Processor (ESP) Software Design: Software for Detection and Quantification of Microorganisms ................................................................................. 287
Danelle E. Cline, Thomas C. O’Reilly, Timothy Meese, Brent Roman, and Duane R. Edgington, Monterey Bay Aquarium Research Institute Moss Landing, CA

Session 6
Marine Debris
Session Chair .................................. Christine Woolaway
Sea Grant/SOEST
University of Hawaii

A Comprehensive Guide to Shipboard Waste Management Options ........................................................................ 295
Lara B. Hutto, Oceanit, Honolulu, HI
Session 7
Marine Habitat Restoration Part A
Session Chair Dr. Russell Joe Bellmer
Marine Ecologist,
NOAA Fisheries,
Office of Habitat Conservation,
Silver Spring, MD

Marine Habitat Restoration Part B
Session Chair Jim Burgess
Director of the NOAA Restoration Center,
NOAA Fisheries,
Office of Habitat Conservation,
Silver Spring, MD

Florida Keys National Marine Sanctuary
Looe Key Coral Reef Restoration
Project of 1999 Richard H. Spadoni and Craig J. Kruempel,
Coastal Planning & Engineering, Inc., Boca Raton, FL

Coral Reef Mitigation and Restoration
Techniques Employed in the Pacific
Islands: I. Overview John Naughton, Pacific Islands Area Office, National Marine Fisheries Service, Honolulu, HI;
Paul L. Jokiel, Hawaii Coral Reef Assessment and Monitoring Program (CRAMP), University of Hawaii, Hawaii Institute of Marine Biology, Kaneohe, HI

Coral Reef Mitigation and Restoration
Techniques Employed in the Pacific
Islands: II. Guidelines Paul L. Jokiel, Hawaii Coral Reef Assessment and Monitoring Program (CRAMP), University of Hawaii, Hawaii Institute of Marine Biology, Kaneohe, HI,
John Naughton, Pacific Islands Area Office, National Marine Fisheries Service, Honolulu, HI

NOAA Restoration Center: Restoring
Living Marine Resource Habitats James P. Burgess, NOAA Restoration Center;
Elizabeth I. Jones, NOAA, Silver Spring, MD

Restoration of American Shad
Alosa sapidissima Populations
in the Susquehanna and Delaware

Restoration Success Criteria Russell Joe Bellmer, NOAA Fisheries, Silver Spring, MD

Session 8
Modeling, Simulation and Visualization
Session Chair Dr. Ed Gough
University of Washington,
Session Co-Chair James Barbera
Consultant,
Applied Physics Laboratory, Bellevue, WA

Visual Basic Environment Yields
Advanced Navigation Simulation Chris Holt and John Fumo, Trisyis Incorporated, Phoenix, AZ

Propagation and Scattering in
Very Shallow Water Gary Steven Sammelmann, United States Navy, Coastal Systems Station, Panama City, FL

Range Dependent Effect on Ray Propagation in the North Eastern Atlantic B. Faure, D. Mauuary, and S. Bausson, LIS-ENSIEG, France

Autonomous Littoral Warfare Systems
Evaluator–Engineering Simulation (ALWSE-ES) J. Marc Eadie, Coastal Systems Station, Panama City, FL; Russell D. Mace, BAE Systems, Panama City Beach, FL

Design of FIR/IIR Lattice Filters Using the Circulant Matrix Factorization Jinho Bae, Taekshik Jeong, and Beobmo Gu, Technical Research Institute, Daeyang Electric Co., Ltd., Pusan, South Korea; Joohwan Chun, Scientific Computing Laboratory, Department of EECS, Korea Advanced Institute of Science and Technology, Taejon, South Korea; Sang Tae Kim, Korea Institute of Industrial Technology Evaluation & Planning, Seoul, South Korea
Development of a Six-Degree of Freedom Simulation Model for the REMUS Autonomous Underwater Vehicle ................................................................. 450
Timothy Prestero, MIT/WHOI Joint Program in Oceanographic Engineering

Exploration of Teisi Knoll by Autonomous Underwater Vehicle “R-One Robot” ................. 456
Tamaki Ura, Institute of Industrial Science, University of Tokyo, Tokyo, Japan; Takashi Obara, Mitsui Engineering and Shipbuilding Co., Ltd., Okayama, Japan; Shinichi Takagawa, Japan Marine Science and Technology Center, Kanagawa, Japan; Toshitaka Gamo, Hokkaido University, Sapporo, Japan

Sea Trial of AUV “URASHIMA” with Lithium-ion Rechargeable Battery .................. 462
Takashi Murashima, Taro Aoki, Toshiaki Nakamura, Hiroshi Ochi, Satoshi Tsukioka, Hidehiko Nakajoh, Tadahiro Hyakudome, and Tadahiko Ida, Japan Marine Science and Technology Center (JAMSTEC) Kanagawa, Japan

AUV/UUV Mission Planning and Real Time Control with the HUGIN Operator System ........ 468
Per Espen Hagen, Norwegian Defence Research Establishment (FFI), Kjeller, Norway

Adaptive Control of Marine Thrusters .......................................................... 474
Alexander Leonessa and Ronald Poirrier, Department of Ocean Engineering, Florida Atlantic University, FL

Maneuvering Control System Design for Autonomous Underwater Vehicle ............ 482
S. Miyamoto, T. Maeda, K. Hirokawa, T. Ichikawa, T. Saitou, H. Kobayashi, E. Kobayashi, and S. Iwasaki, Mitsubishi Heavy Industries, Ltd., Nagasaki, Japan; T. Aoki, Japan Marine Science and Technology Center

An Intelligent Control For a Crawling Unmanned Vehicle ..................................... 490
Kwang Hwa Lee, Department of the Navy Naval Surface Warfare Center, Dahlgren Division Coastal System Station (CSS), Panama City, FL

Nonlinear Identification of Marine Thruster Dynamics ......................................... 501
Alexander Leonessa and Dapeng Luo, Department of Ocean Engineering, Florida Atlantic University, FL

Chemical Plume Mapping With an Autonomous Underwater Vehicle ....................... 508
Barbara Fletcher, Space and Naval Warfare Systems Center San Diego, San Diego, CA

Magneto-Inductive (MI) Communications .................................................................. 513
John J. Sjojdehei, Coastal Systems Station; Paul N. Wrathall and Donald F. Dinn, Magneto-Inductive Systems Limited

Docking Techniques and Evaluation Trials of the SWIMMER AUV: An Autonomous Deployment AUV for Workclass ROVs ................................... 520
J.C. Evans, K.M. Keller, and J.S. Smith, Department of Electrical Engineering and Electronics, The University of Liverpool, Liverpool, UK; P. Marty, Cybernetix, Marseille Cedex, France; V. Rigaud and IFREMER, La Seyne sur Mer, France

Identification and Control of the Phantom 500 Body Motion .................................. 529
Jean-Pierre Folcher and Maria-João Rendas, Laboratoire d’Informatique, Signaux et Systèmes de Sophia Antipolis, Cedex, France

Image Segmentation by Unsupervised Adaptive Clustering In the Distribution Space for AUV Guidance Along Sea-bed Boundaries Using Vision ................. 536
Albert Tenas, Maria-João Rendas, and Jean-Pierre Folcher, Laboratoire d’Informatique, Signaux et Systèmes de Sophia Antipolis, Cedex, France

Applying AUV Lessons and Technologies to Autonomous Surface Craft Development ................................................................. 545
J. Manley, J. Curran, B. Lockyer, J. Morash, and C. Chryssostomidis, Massachusetts Institute of Technology, AUV Lab, Sea Grant College Program Cambridge, MA

A Cocoon-Based Shipboard Launch and Recovery System for Large Autonomous Underwater Vehicles .................................. 550
K. Sharp, D. Cronin, D. Small, and R. Swanson, Naval Oceanographic Office, Stennis Space Center, MS; T. Augustus, Space and Naval Warfare Systems Center, San Diego, CA

xxxiii
New Archaeological Uses of Autonomous Underwater Vehicles ........................................ 555
David Mindell and Brian Bingham, Deep Sea Archaeology Research Group, Massachusetts Institute of Technology, MA

Session 10
Marine Geodesy
Session Chair Dr. Patrick Fell
Naval Surface Warfare Center, Dahlgren, VA

Accurate Navigation of Airborne Image Sequences for Rapid Surveys of Water Depths and Currents .......................................................... 559
John Dugan and Cindy Piotrowski, AretJ Associates, Arlington, VA; Alan Evans and Udayan Bhapkar, Naval Surface Warfare Center Dahlgren Division, Dahlgren, VA

RTK Height Measurements show Gradient on Sea Surface? ........................................ 565
John-Morten Godhavn and Edgar Johansen, Research & Development, Kongsberg Seatex AS Pirsenteret, Trondheim, Norway

Preliminary Comparisons of the WGS84(EGM 96) Geoid with National Vertical Datums ............................................................................ 571
Patrick Fell and Mark Tanenbaum, NAVSEA, Surface Warfare Center Division, Dahlgren, Virginia

Session 11
Ocean Energy
Session Chair Dr. Sathish Balasubramanian

Recent Developments and Forecasts for Renewable Ocean Energy Systems .................... 575

The Open Sea Tests of The Offshore Floating Type Wave Power Device “Mighty Whale” –Characteristics of Wave Energy Absorption and Power Generation ........................................ 579
Yukihisa Washio, Hiroyuki Osawa, and Teruhsa Ogata, Japan Marine Science and Technology Center, Yokosuka, Japan

Session 12
Marine Education
Session Chair Sharon H. Walker
Gulf Coast Research Laboratory, Ocean Springs, MS

Requirement Standards for Qualified Submarine Cable Technicians ................................ 586
Martin Greska, Oceaneering International, Inc., Advanced Technologies Division

Web-Enabled Collaborative Team Training for Deep Submersible Vehicles ....................... 591
R.J. Barton, III and L. Miguel Encarancao, Fraunhofer CRCG, Inc., Providence, RI; D. Foster, Woods Hole Oceanographic Institute, Woods Hole, MA

An Interdisciplinary Marine Research Programme, How to Promote Generative Interaction Between Marine Scientists, Modellers and Engineers ............................................. 595
Øyvind T. Ødegård, Bjørn Sortland, Ingrid Ellingsen, Dag Slagstad, Geir Johnsen, and Egil Sakshaug, Norwegian University of Science and Technology, Trondheim, Norway

Promoting Awareness of Marine Technology: An ROV Building Competition for High School and College Students ....................................................... 603
Jill Zande, Saundra Butcher, and Deidre Sullivan, Marine Advanced Technology Education (MATE) Center, Monterey Peninsula College, Monterey, CA; Drew Michel, TSC Holdings, Inc., Houston, TX

Ocean Engineering Design Experience at the U.S. Naval Academy .................................. 608
David L. Kriebel and W. Scott Finlayson, Ocean Engineering Program, United States Naval Academy, Annapolis, MD
Gulf of Maine Ocean Observing System (GoMOOS): An Institutional Arrangement in Support of Coastal Ocean Research .......... 613
Evan D. Richert, Director, Maine State Planning Office; President, GoMOOS; Philip S. Bogden, Chief Executive Officer, GoMOOS, Portland, ME

Centers for Ocean Sciences Education Excellence (COSEE) Priority Recommendations Document ..................... 617
Sharon H. Walker, Ph.D., Associate Dean for Outreach, College of Marine Sciences, The University of Southern Mississippi, Biloxi, MS
Dr. Elizabeth Day, National Sea Grant Office
Dr. Don Elthon, University of Texas at Houston
Ms. Paula Keener-Chavis, College of Charleston
Dr. Nancy Marcus, Florida State University
Ms. Janice McDonald, Rutgers University
Dr. George Matsumoto, Monterey Bay Aquarium Research Institute
Dr. Ellen Prager, Rosenstiel School of Marine & Atmospheric Science
Dr. Debbie Smith, Woods Hole Oceanographic Institute
Dr. Sharon Walker, COSEE Principal Investigator
J.L. Scott, Marine Education Center & Aquarium
Dr. Duane Dale, Workshop Facilitator, DFD Associates

Proposal for Formation of a Marine Information Technology Industry-Case Study of Marine Data Processing In JAPAN .......................... 620
Naoki Nakazawa, Systems Engineering Associates, Inc., Tokyo, Japan; Tamio Hashimoto, Oki Electric Industry Co., Ltd., Tokyo, Japan; Masao Kanetsuna, Japan Ocean Industries Association, Tokyo, Japan; Takeo Kondo, Nihon University, Chiba, Japan

Session 13
Remote Sensing
Session Chair ....................... Dr. Richard L. Crout Planning Systems Incorporated, Slidell, LA
Improvement in Spacebased Scatterometers and Increased Scientific Impact in the Past Decade.............. 626
W. Timothy Liu and Xiaosu Xie, Jet Propulsion Laboratory, California Institute of Technology, Pasadena, CA

Monitoring Our Oceans and Climate by Satellite ............................................. 631
Deborah J. Shaw and Philippe Roques, Service Argos, Inc., Largo, MD

Estimation of Radio Refractivity Structure Using Radar Clutter ................................. 636
Peter Gerstoft and William S. Hodgkiss, Marine Physical Laboratory, University of California San Diego, La Jolla, CA; L. Ted Rogers and Lee J. Wagner, Atmospheric Propagation Branch, SPAWAR Systems Center, San Diego, CA

HF Radar Wind Measurement Over the Eastern China Sea .................................. 642
Huang Wei-min, Wu Shi-cai, Wen Bi-yang, and Hou Jie-chang, Department of Space Physics, Wuhan University, Wuhan, P.R. China

Test of HF Ground Wave Radar OSMAR2000 at the Eastern China Sea .................. 646
Wu Shicai, Yang Zijie, Wen Biyang, Shi Zhenhua, Tian Jiansheng, Gao Huotao, Wu Xiongbin, and Ke Hengyu, School of Electronic Information, Wuhan University, Wuhan, P.R. China

Session 14
Cables and Connectors
Session Chair .......................... Tom Coughlin Vector Cable Company, Sugar Land, TX
The Economic Advantages of Jet-Assisted Plowing ........................................ 649
Frank D. Messina, Jon B. Machin, Perry Slingsby Systems, Inc., Jupiter, FL; Jeffrey A. Hill, TyCom, Baltimore, MD

The Design of a Manned Vehicle for Subsea Pipeline/Cable Inspection and Maintenance .................. 657
Lian Lian, Shanghai Jiao Tong University, Shanghai, P.R. China; Dongchang Sun, Shengli Oil Field, Dongying, P.R. China; Tong Ge, Shanghai Jiao Tong University, Shanghai, P.R. China

Under Water Explosive Shock Testing (UNDEX) of a Subsea Mateable Electrical Connector, the CM2000 ................. 661
Matt Christiansen, SEA CON / Brantner & Associates, El Cajon, CA
A Thin Fiber Cable Laying System for Mobile Deep Seafloor Observation .................. 667
Katsuyoshi Kawaguchi, Japan Marine Science and Technology Center, Deep Sea Research Department, Kanagawa, Japan; Takato Nishida and Shinichi Obana, Ocean Cable & Communications Corp., Tokyo, Japan
