2002
Contents

Preface: Introduction to the geology and geophysics of Taiwan .......................................................... v

1. Structural expressions of flexural extension in the arc-continent collisional foredeep of western Taiwan .......................................................... 1
   Ying-Wei Chou and Ho-Shing Yu

2. Inversion tectonics of the fold-and-thrust belt, western Taiwan .................................................. 13
   Chung-I Lee, Yu-Long Chang, and Mike P. Coward

3. Variations along the strike of the Taiwan thrust belt: Basement control on structural style, wedge geometry, and kinematics ........................................... 31
   F. Mouthereau, B. Deffontaines, O. Lacombe, and J. Angelier

4. Synchronicity and morphology of Holocene river terraces in the southern Western Foothills, Taiwan: A guide to interpreting and correlating erosional river terraces across growing anticlines .......................................................... 55
   Meng-Long Hsieh and Peter L.K. Knuepfer

5. Structure and evolution of the active fold-and-thrust belt of southwestern Taiwan from Global Positioning System analysis ........................................... 75
   John B. Hickman, David V. Wiltshire, Jih-Hao Hung, Peng Fang, and Yehuda Bock

6. Taiwan Slate Belt: Insights into the ductile interior of an arc-continent collision ................................ 93
   Donald M. Fisher, Chia-Yu Lu, and Hao-Tsu Chu

7. Lateral extrusion in a transpressional collision zone: An example from the pre-Tertiary metamorphic basement of Taiwan ........................................... 107
   Michael H. Pulver, Jean M. Crespi, and Timothy B. Byrne

8. Estimation of the thermal structure of a young orogenic belt according to a model of whole-crust thickening .......................................................... 121
   Teh-Ru Alex Song and Kuo-Fong Ma

9. Synorogenic extension, Taiwan: Implications of physical and numerical modeling .......................... 137
   Wei-Hau Wang and Wen-Jie Hung

10. Transition tectonics of northern Taiwan induced by convergence and trench retreat ..................... 147
    Jyr-Ching Hu, Shui-Beih Yu, Hao-Tsu Chu, and Jacques Angelier

11. Crustal structure of the convergent plate-boundary zone, eastern Taiwan, assessed by seismic tomography .......................................................... 161
    Win-Bin Cheng, Chensung Wang, Chuen-Tien Shyu, and Tzay-Chyn Shin

12. Compressional subduction regime and initial arc-continent collision: Numerical modeling ........... 177
    J.-C. Tang, A.I. Chemenda, J. Chéry, S. Lallemand, and R. Hassani

13. Arc-continent collision in Taiwan: New marine observations and tectonic evolution .................. 187
    Jacques Malavieille, Serge E. Lallemand, Stephane Dominguez, Anne Deschamps, Chia-Yu Lu, Char-Shine Liu, Philippe Schnürle, and the ACT Scientific Crew
