Contents

<i>Dedication</i>	v
Nicholas Rast, 1927–2001	
<i>Preface</i>	vii
<i>Acknowledgments</i>	ix
1. Distinguishing seismic from nonseismic soft-sediment structures: Criteria from seismic-hazard analysis	1
Russell L. Wheeler	
2. Paleoliquefaction studies in continental settings	13
Stephen F. Obermeier, Eric C. Pond, Scott M. Olson, and Russell A. Green	
3. Late Quaternary paleoseismites: Syndepositional features and section restoration used to indicate paleoseismicity and stress-field orientations during faulting along the main Lima Reservoir fault, southwestern Montana	29
Mervin J. Bartholomew, Michael C. Stickney, Edith M. Wilde, and Robert G. Dundas	
4. Stratigraphic evidence of coseismic faulting and aseismic fault creep from exploratory trenches at Mt. Edna Volcano (Sicily, Italy)	49
Luca Ferreli, Alessandro Maria Michetti, Leonello Serva, and Eutizio Vittori	
5. Mid-Tertiary paleoseismites: Syndepositional features and section restoration used to indicate paleoseismicity, Atlantic Coastal Plain, South Carolina and Georgia	63
Mervin J. Bartholomew, Brendan M. Brodie, Ralph H. Willoughby, Sharon E. Lewis, and Frank H. Syms	
6. Late Pleistocene soft-sediment deformation structures interpreted as seismites in paralic deposits in the city of Bari (Apulian foreland, southern Italy)	75
Massimo Moretti, Piero Pieri, and Marcello Tropeano	
7. Indicators of paleoseismicity in the lower to middle Miocene Guadagnolo Formation, central Apennines, Italy	87
Goffredo Mariotti, Laura Corda, Marco Brandano, and Giacomo Civitelli	
8. Stratigraphic and sedimentological evidence for late Paleozoic earthquakes and recurrent structural movement in the U.S. Midcontinent	99
Daniel F. Merriam and Andrea Förster	

9. <i>Critical evaluation of possible seismites: Examples from the Carboniferous of the Appalachian basin</i>	109
Stephen F. Greb and Garland R. Dever Jr.	
10. <i>Late Mississippian paleoseismites from southeastern West Virginia and southwestern Virginia</i>	127
Kevin G. Stewart, John M. Dennison, and Mervin J. Bartholomew	
11. <i>Anomalous paleoflow orientations: A potential methodology for determining recurrence rates and magnitudes in paleoseismic studies</i>	145
Gerald J. Smith and Robert D. Jacobi	
12. <i>Seismically induced soft-sediment deformation in some Silurian carbonates, eastern U.S. Midcontinent</i>	165
Charles M. Onasch and Charles F. Kahle	
13. <i>Interpreting ancient marine seismites and apparent epicentral areas for paleo-earthquakes, Middle Ordovician Lexington Limestone, central Kentucky</i>	177
Frank R. Ettensohn, Mark A. Kulp, and Nicholas Rast
