Contents

CHAPTER 1
THE CHANGING NATURE OF RISKS AND HAZARDS 1
by Susan L. Cutter

Hazard, Risk, and Disaster, 2
Evolving Theories and Concepts, 4
Mutual Interests, Divergent Paths, 9
Moving from Theory to Practice, 11
Conclusion, 12

CHAPTER 2
METHODS FOR DETERMINING DISASTER PRONENESS 13
by Arleen A. Hill and Susan L. Cutter

Vulnerability and the Potential for Loss, 13
Methods of Assessment, 16
Conclusion, 35
CHAPTER 3
MAPPING AND THE SPATIAL ANALYSIS OF HAZARDSCAPES
by Michael E. Hodgson and Susan L. Cutter

Informational Needs and Inputs, 37
Improvements in Data Coverage and Accuracy, 42
The Science and Art of Mapping, 46
Spatial Analysis and the GIS, 50
Distributing Geographic Information, 54
A Word of Caution About Hazards Mapping, 59

CHAPTER 4
DATA, DATA EVERYWHERE, BUT CAN WE REALLY USE THEM?
by Deborah S. K. Thomas

Need for Systematic Primary Data Collection, 62
Centralized Data and Information Dissemination, 63
Why Data May Not Be Meaningful, Even If Collected, 64
Issues of Data Sharing, 66
Available Databases for Estimating Loss, 67
Conclusion, 76

CHAPTER 5
TRENDS IN DISASTER LOSSES
by Jerry T. Mitchell and Deborah S. K. Thomas

Building the Hazard Events and Losses Database, 78
Historical Losses from Hazards, 79
Trends in Specific Hazards, 84
Conclusion, 112

CHAPTER 6
WHICH ARE THE MOST HAZARDOUS STATES?
By Deborah S. K. Thomas and Jerry T. Mitchell

Geographic Scale and Loss Information, 116
Losses from All Hazard Types, 116
