

ESTUARINE AND COASTAL MODELING

PROCEEDINGS OF THE SEVENTH INTERNATIONAL
CONFERENCE

November 5-7, 2001
St. Petersburg, Florida

SUB Göttingen 7
214 772 632

2002 A 4730

GA

EDITED BY
Malcolm L. Spaulding

ASCE American Society
of Civil Engineers

1801 ALEXANDER BELL DRIVE
RESTON, VIRGINIA 20191-4400

Contents

SESSION 1: Introduction

SESSION 2A: Hydrodynamic Modeling of the Coastal Ocean

Three-Dimensional Modeling of the Summer Circulation in the Celtic Sea.....	1
E.F. Young, J. Brown, K.J. Horsburgh, and L. Fernand	
Modeling Tidal Currents and Seasonal-Mean Circulation in the Sable Gully Region.....	22
Guoqi Han, Patrick Roussel, and John W. Loder	
Modeling of West Florida Shelf Circulation for Spring 1999.....	35
Ruoying He and Robert H. Weisberg	

SESSION 2B: Modeling Systems and Informatics

The Use of Geographic Information Services (GIS) in 3D Hydrodynamic Model Pre- and Post-Processing	56
G. McAllister Sisson, Momo Chen, Jeong-Hwan Oh, and Sung-Chan Kim	
Scientific Visualization of Sediment Dynamics in the Bottom Boundary Layer.....	71
Timothy R. Keen, Rhonda Vickery, Peter Flynn, Robert Stavn, and Walton McBride	
Hierarchical Programming for Data Storage and Visualization	86
John M. Donovan and Peter E. Smith	

SESSION 2C: Assessment of Model Physics and Solution Schemes I

A Preliminary Look at Methods to Compute Baroclinic Pressure Gradients in Finite Element (FE) Models.....	103
Kendra M. Dresback, Cheryl Ann Blain, and Randall L. Kolar	

SESSION 3A: Hydrodynamic Modeling of Estuaries

Salinity Intrusion in the St. Johns River, Florida.....	120
Peter V. Sucusy and Frederick W. Morris	
Stratification and Circulation in Lake Pontchartrain.....	140
Ioannis Georgiou and J. Alex McCorquodale	

Simulation of Tides, Salinity, and Temperature Within Chesapeake Bay.....	152
Thomas F. Gross, Zhen Li, and Scott Yost	

SESSION 3B: Water Quality Modeling of Estuaries

Two- and Three-Dimensional Model System Predicting the Water Quality of Tomorrow.....	165
A.C. Erichsen and P.S. Rasch	

SESSION 3C: Modeling Specific Hydrodynamic Features

Numerical Simulations of Internal Tides Around Oahu, Hawaii.....	185
James K. Lewis, Mark A. Merrifield, and Michelle L. Eich	
Hydrostatic and Nonhydrostatic Simulations of Buoyantly Driven Coastal Jets.....	204
Patrick C. Gallacher, Steven Piacsek, and David Dietrich	
Impact of High-Resolution Modeling on Secondary Flow Phenomena.....	215
Nikolaos D. Katopodes, Kuo-Cheng Kao, and Scott F. Bradford	

SESSION 4A: Water Quality Modeling of Estuaries

A Three-Dimensional Water Quality Model for Estimating Total Maximum Daily Loads (TMDL) in a Blackwater River Estuary, the Lower St. Johns River, FL.....	227
James L. Martin, Dorothy Tillman, Carl Cerco, John Hendrickson, and Mark Dortch	
Model Predicted Water Quality Response to Reductions in Inorganic and Organic Nitrogen Loading.....	246
James D. Bowen and Jeffrey W. Hieronymus	

SESSION 4B: Sediment Transport Modeling

Hydrodynamic and Sediment Transport Modeling of Episodic Resuspension Events in Lake Michigan.....	266
David J. Schwab and Dmitry Beletsky	
Contaminant Flux due to Sediment Erosion.....	280
Craig Jones and Wilbert Lick	
Flocculation and the Fate of Drill Mud Discharges.....	294
T. Tedford, C.G. Hannah, T.G. Milligan, J.W. Loder, and D.K. Muschenheim	

SESSION 4C: Modeling Systems and Informatics

Surfacewater Modeling System (SMS) Steering Module: An Interface for Automated Coupling of Circulation and Wave Models.....	310
Alan K. Zundel, Adele Militello, Mary A. Cialone, and Thomas Moreland	
Application of an Integrated Modeling System for Estuarine and Coastal Ecosystems to Indian River Lagoon, Florida.....	329
Y. Peter Sheng, J.R. Davis, D. Sun, C. Qiu, D. Christian, K. Park, T. Kim, and Y. Zhang	
Predicting Estuary Morphology and Process: An Assessment of Tools Used to Support Estuary Management.....	344
Richard J.S. Whitehouse	

SESSION 5A: Circulation, Mixing, and Transport

Circulation and Drift Pathways in the Northwest Atlantic Ocean.....	364
Jinyu Sheng	
Model-Assisted Comparison of Circulation Features in a Branching River Estuary.....	384
J.D. Boon, J.M. Brubaker, and G.M. Sisson	

SESSION 5B: Hydrodynamic Modeling of Estuaries

Two-Dimensional Hydrodynamic Modeling of the Hudson River Estuary.....	403
Michael Baumeister and J. Russell Manson	
Modeling of Double-Flood Currents in the Sakonnet River.....	418
Hyun-Sook Kim and J. Craig Swanson	

SESSION 5C: Data Assimilation and Modeling

High-Frequency Radar Data Assimilation in the Monterey Bay.....	434
I. Shulman, C.-R. Wu, J.D. Paduan, J.K. Lewis, L.K. Rosenfeld, and S.R. Ramp	
Applications of the Incremental Approach to Yellow Sea Modeling.....	447
Catherine R. Edwards and Cheryl Ann Blain	
A Near Real Time Simulation of Salinity, Temperature, and Sea Nettles (<i>Chrysaora quinquecirrha</i>) in Chesapeake Bay.....	467
Zhen Li, Thomas F. Gross, Christopher W. Brown, Harry V. Wang, and Raleigh R. Hood	

SESSION 6: Posters

High-Performance Estuarine and Coastal Environmental Modeling: Part II.....	479
Justin R. Davis and Y. Peter Sheng	

SESSION 7A: Innovative Computational Techniques

A Second Order Lagrangean Advection Scheme Without Numerical Viscosity for the Propagation of Tidal Energy	491
Andreas Malcherek	
Oscillation-Removal Schemes for Salinity Studies.....	501
A. Oliveira and A.B. Fortunato	
Stepwise-Continuous-Variable-Rectangular Grid	519
Tatsusaburo Isaji, Eoin Howlett, Colleen Dalton, and Eric Anderson	
Comparison of High Performance Computing (HPC) Methods for Long-Term Contaminant Modeling.....	535
Mark Dortch and Terry Gerald	

SESSION 7B: Water Quality Modeling of Estuaries

Optimization of In-Stream Dissolved Oxygen via Control of Carbonaceous Biological Oxygen Demand (CBOD) Loadings Using the Adjoint Method.....	547
Michael Piasecki	
Surface Analysis of Water Quality Response to Load	566
Ping Wang, Lewis C. Linker, and Richard A. Batiuk	
Eutrophication Model Calibration as a Coupled Inverse Problem.....	585
Jian Shen and Albert Y. Kuo	

SESSION 7C: Assessment of Model Physics and Solution Schemes II

Finite-Difference Analysis of Horizontal Gradients in Sigma-Coordinate Models.....	600
Wenrui Huang	
Responses of a Hybrid z-Level Model to Various Topography Treatment Methods for a Boundary Value Problem and an Initial Value Problem.....	614
XinJian Chen	
Evaluation of the UnTRIM Model for 3-D Tidal Circulation.....	628
Ralph T. Cheng and Vincenzo Casulli	

SESSION 8A: Hydrodynamic and Water Quality Model Interactions

A Model Study of Flushing Characteristics of the Elizabeth River, Virginia.....	643
Sung-Chan Kim, Albert Y. Kuo, and Jae-Il Kwon	

A Simplified Method for Marsh Inundation Modeling in Hydrodynamic and Water Quality Models with Application to the Cooper River Estuary, SC.....	654
Daniel Mendelsohn, Eduardo Yassuda, and Steve Peene	

SESSION 8B: Sediment Transport Modeling

No papers were available at the time of publication

SESSION 9A: Innovative Computational Techniques

Evolutionary Computing of Eddy Viscosity Coefficients in Three-Dimensional Flow.....	670
Niels Liebisch and Nikolaos D. Katopodes	
From River to Ocean: A Unified Modeling Approach.....	683
Roy A. Walters	
Modeling Flows with Moving Boundaries due to Flooding, Recession, and Wave Run-up	695
Scott F. Bradford and Brett F. Sanders	
Efficient Non-Hydrostatic Free Surface Models.....	709
G.S. Stelling and J. van Kester	
A Coupled Hydrodynamic-Wave Model for Simulating Wave and Tidally-Driven 2D Circulation in Inlets.....	725
Mark Cobb and Cheryl Ann Blain	

SESSION 9B: Circulation, Mixing, and Transport

The Role of River Discharge and Vertical Mixing Formulation on Barotropic Circulation in Bay St. Louis, MS	745
Cheryl Ann Blain and Jayaram Veeramony	

SESSION 10A: Water Quality Modeling of Estuaries

Temperature Stratification and Water Quality Modeling for Lake Simtustus, Oregon.....	765
Zhaoqing Yang, Tarang Khangaonkar, Curtis DeGasperi, Steve Breithaupt, and Kevin Marshall	
Linking Landside Nutrient Loading and Water Quality Models: Application to Nantucket Waters	783
Craig Swanson and Matthew Ward	
Fenholloway River and Estuary Total Maximum Daily Load (TMDL) Development, Taylor County, Florida.....	799
Gregory D. Sousa, J.M. Greenfield, S.J. Peene, and H.N. Rodriguez	

SESSION 10B: Hydrodynamic Modeling of Estuaries

**Three-Dimensional Modeling of the Seasonal Transition of Salinity
in San Francisco Bay: From Well Mixed to Stratified Conditions.....812**
Rafael Cañizares, Eric Smith, and Santiago Alfageme

SESSION 11: Posters

A Scalable, Parallel, Wave Equation Model for Storm Surge Propagation.....830
Derek G. Goring and Roy A. Walters

SESSION 12A: Modeling the Effects of Marine Structures

**Predicting the Hydrodynamics of a Proposed Multiple-Inlet System,
Colorado River, Texas.....837**
Lihwa Lin, Nicholas C. Kraus, and Ronnie G. Barcak

**A Rational Technique for Evaluating Proposed Expansions of Craney Island
in the Elizabeth River, Virginia852**
Harry V. Wang, John D. Boon, and Momo Chen

SESSION 12B: Innovative Computational Techniques

A Numerical Method for Inundation Simulations.....872
G.S. Stelling

SESSION 13A: Modeling Specific Hydrodynamic Features

Three-Dimensional Thermal Modeling of the RasGas Cooling Water Outfall.....893
Venkat S. Kolluru, Edward M. Buchak, John E. Edinger,
and Philip E. Brinkmann

SESSION 13B: Models for Environmental Assessment

**Coupled Physical-Biological Model for the Pearl River Estuary: A Phosphate
Limited Subtropical Ecosystem.....913**
Huijie Xue and Fei Chai

Towards 3-D Ecosystem Modeling of the Irish Sea929
Roger Proctor, Jason T. Holt, Thomas R. Anderson, Boris A. Kelly-Gerreyn,
Jeremy Blackford, and Francis Gilbert

*Joint ECM7-AMS Fourth Conference on Coastal Atmospheric and Oceanic Prediction
Sessions, Estuarine and Coastal Ocean*

Northern Gulf of Mexico Littoral Initiative Modeling Program.....	949
Quamrul Ahsan, Charlie N. Barron, John Blaha, Alan F. Blumberg, Pat J. Fitzpatrick, Derrick Herndon, H. James Herring, Y. Larry Hsu, Timothy R. Keen, Honghai Li, Yongzuo Li, Richard C. Patchen, Carl Szczechowski, Robert Willems, and Patrick Wilz	
Forecasting the Environment of the Littoral Waters in the Northern Gulf of Mexico	966
Quamrul Ahsan, Alan F. Blumberg, Honghai Li, William W. Schroeder, and Carl Szczechowski	
Application of an Integrated Monitoring and Modeling System to Narragansett Bay and Adjacent Waters Incorporating Internet Based Technology	982
Thomas B. Opishinski and Malcolm L. Spaulding	
A Nowcast/Forecast System of Circulation Dynamics for Narragansett Bay.....	1002
Matthew C. Ward and Malcolm Spaulding	
Analysis of the Tampa Bay Coastal Prediction System	1023
Mark Vincent, Mark Luther, and Mark Ross	
One-Year Assessment of a Nowcast/Forecast System for Galveston Bay	1041
Richard A. Schmalz, Jr.	
Validation of a Rapidly Relocatable Prediction System.....	1061
Germana Peggion, Daniel N. Fox, and Charlie Barron
