3720 BA Bilthoven, The Netherlands*

Proceedings of an international conference held at Wageningen, The Netherlands, in October 2000. The conference was convened by:

**the National Committee of The Netherlands for the International Hydrological Programme of UNESCO and the Hydrology and Water Resources Programme of WMO**

**the National Committee of the Federal Republic of Germany for the International Hydrological Programme of UNESCO and the Hydrology and Water Resources Programme of WMO**

**the Commission of Water Quality of the International Association of Hydrological Sciences (IAHS)**

IAHS Publication no. 273

in the IAHS Series of Proceedings and Reports

# Contents

Preface <i>by Joop Steenvoorden, Frans Claessen &amp; Jaap Willems</i>	v
<b>1 Introduction</b>	
Agricultural effects on ground and surface waters: research and policy at the edge of science and society <i>Joop Steenvoorden, Gerhard Strigel &amp; Floris Zuidema</i>	3
<b>2 The Agricultural Production Unit</b>	
<b>2.1 Policy development</b>	
Voluntary agreements as an instrument to solve conflicts between farmers and water suppliers <i>Ingo Heinz</i>	11
Economic modelling of best management practices (BMPs) at the farm level <i>Dennis Collentine</i>	17
Farming on Good Groundwater: a methodology for cost effective groundwater protection <i>Dick Boland &amp; Sarie Buijze</i>	23
Environment and agriculture: the dichotomy of erosion and weed control <i>Haldor Fykse, Helge Lundekvam &amp; Eirik Romstad</i>	29
Groundwater recharge through optimized intensive dairy farms <i>H. F. M. Aarts &amp; H. Van Keulen</i>	35
Conflicting interests in a Dutch agricultural dairy farming system <i>Joop Kroes, Jan Beldman, Han Te Beest, Dick Boland &amp; Theun Vellinga</i>	41
Environmentally friendly manure management technologies and policy instruments <i>John Morken &amp; Per Kristian Rørstad</i>	49
<b>2.2 Models for risk assessment</b>	
Prediction of potential groundwater contamination by herbicides: integrated use of a leaching model and GIS in the north of Italy <i>Tullia Bonomi, Carlo Riparbelli &amp; Emanuela Clerici</i>	55
Phosphorus needs of grassland soils and loss to water <i>Hubert Tunney</i>	63
Nitrogen losses to surface waters from intensively managed grassland on sandy soils: the impact of bufferstrips <i>C. L. van Beek, M. Heinen, J. G. Conijn &amp; O. Oenema</i>	71
<b>2.3 Indicators for environmental performance</b>	
Balanced fertilization and regulating nutrient losses from agriculture <i>Oene Oenema &amp; Gerard L. Velthof</i>	77
Policy measures to reduce phosphorus loss and site-specific environmental impacts <i>Anthony C. Edwards &amp; Paul J. A. Withers</i>	85
Tracking nitrogen loading reductions from agricultural sources: NLEW <i>Deanna L. Osmond, Noah N. Ranells, Steve C. Hodges, Roger Hansard, Lin Xu, Thomas E. Jones &amp; Stephen H. Pratt</i>	89

The National Phosphorus Project: interfacing agricultural and environmental phosphorus management in the USA <i>Andrew Sharpley, Peter Kleinman, Bob Wright, Tommy Daniel, Brad Joern, Roberta Parry &amp; Terry Sobecki</i>	95
Accelerated deployment of an agricultural nutrient management tool in response to local government policy: the Maryland phosphorus site index <i>Frank J. Coale, Eric Baugher, J. Thomas Sims &amp; April Leytem</i>	101
<b>2.4 Risk assessment by monitoring</b>	
Evidence for connectivity of phosphorus transport from plot to catchment? <i>Fiona Wood, Louise Heathwaite &amp; Philip Haygarth</i>	107
Incidental transfers of colloidal phosphorus following applications of slurry and fertilizer to grassland <i>Neil Preedy, Rachel Matthews, Philip Haygarth &amp; Louise Heathwaite</i>	113
Environmental aspects of soil phosphorus chemistry in the US Atlantic coastal plain <i>J. T. Sims, M. C. Pautler, K. L. Gartley, P. A. Vadas, R. O. Maguire, A. B. Leytem, M.-F. Lavahun, N. J. Luka &amp; R. A. Eaton</i>	119
The impact of farmstead operation on groundwater quality <i>Barbara Sapek</i>	125
Nitrate leaching: comparing conventional, integrated and organic agricultural production systems <i>Guido Haas, Martin Berg &amp; Ulrich Köpke</i>	131
Management of quantitative and qualitative river runoff characteristics with measures in the catchment <i>Yelena V. Fyodorova</i>	137

### **3 Hydrological and Environmental Policy in a Region**

#### **3.1 Models for risk assessment**

Risk oriented cultivation scheme for agricultural land in water resource catchment areas <i>Stefan Wallisch, Susanne Hildebrandt &amp; Paul M. Kirch</i>	145
Selecting effective areas for development of buffer strips at farm and river basin scale <i>P. Domburg, A. Lilly, S. M. Dunn &amp; A. C. Edwards</i>	151
Defining land zones for minimizing nitrate leaching to groundwater using a combined spatial data and risk based approach <i>S. W. Fletcher, S. Evers, R. S. Ward &amp; R. C. Harris</i>	157
Geological reconstruction using conditional stochastic simulation for uncertainty analyses of water resources management (Liebenau, northwest Germany) <i>Matthias Schöniger, Jörg Dietrich &amp; Fred Hattermann</i>	163
Water levels in the Echten polder: improving agriculture and reducing land subsidence risks <i>J. M. Schouwenaars</i>	169
Predicting land use change effects on nitrogen dynamics with a GIS coupled, process-oriented model <i>Michael Trepel &amp; Ernst-Walter Reiche</i>	177
The impact of land use changes on the future load of nitrogen to a Danish inlet: quantification of leaching from the root zone <i>Jørgen Ole Jørgensen, Dirk-Ingmar Müller-Wohlfel, Brian Kronvang, Hans Estrup Andersen, Lisbeth Wiggers &amp; Jørgen Bidstrup</i>	183
Long-term effects on groundwater quality through agricultural land use and remediation strategies <i>Rolf Menden &amp; Christoph Schöpfer</i>	189

SOIL and SOILN_NO at the catchment scale: a case study of an agriculture dominated catchment <i>Johannes Deelstra &amp; Marianne Bechmann</i>	195
Model-based regional estimation of groundwater nitrogen loads from diffuse sources <i>Dirk-I. Müller-Wohlfel, Jørgen Ole Jørgensen, Claes Björklund, Åsa Forsman, Ralf Kunkel &amp; Frank Wendland</i>	201
Agricultural and environmental methodologies to describe nonpoint source phosphorus pollution <i>Oscar Schoumans, Janet Mol-Dijkstra &amp; Coen Roest</i>	207
Effect of nutrient loading on surface waters in polder Bergambacht, The Netherlands <i>Lowie van Liere, Jan Janse, Michel Jeuken, Oscar Schoumans, Rob Hendriks, Jan Roelsma &amp; Douwe Jonkers</i>	213
Modelling subsurface nonpoint source nitrogen inputs to the Odra River <i>Ralf Dannowski, Jörg Steidl, Waldemar Mioduszezski &amp; Ireneusz Kajewski</i>	219
<b>3.2 Decision support for regional policy</b>	
An actor game on implementation of environmental quality standards for nitrogen <i>Hans B. Wittgren, Lena Gipperth, Lars Jonasson, Anna Pettersson, Roger Thunvik &amp; Gunnar Torstensson</i>	227
Changes in agricultural practices and regional export of nitrogen from land to sea <i>A. Grimvall, Å. Forsman, B. Kronvang, D.-I. Müller-Wohlfel, F. Wendland &amp; R. Kunkel</i>	233
On-farm water resources management: an approach to optimize regional hydrology <i>J. R. Hoekstra &amp; J. M. P. M. Peerboom</i>	239
Impact of long-term land use change on the hydrological regime of the Dyle catchment <i>Abdel El Idrissi, Ingrid Ruthy, Peou Hang, Marnik Vanclooster &amp; Etienne Persoons</i>	247
Policy change and learning in the Western Mancha aquifer between 1985 and 2000 <i>Elena Lopez-Gunn</i>	255
<b>3.3 Risk assessment by monitoring</b>	
Impact of land use changes in the Drömling fen area on nutrient fluxes to the groundwater <i>Holger Rupp, Karsten Kalbitz &amp; Ralph Meissner</i>	261
Trends in nutrient runoff from agricultural basins in Norway <i>Per Stålnacke &amp; Marianne Bechmann</i>	267
Nitrate export from an agricultural basin: control mechanisms and nitrate residence times <i>Jerome Molénat, Chantal Gascuel-Odoux, Philippe Davy, Patrick Durand &amp; Gerard Gruau</i>	273
Analysis of sediment and nutrient loads due to soil erosion in rivers in the Odra catchment <i>Detlef Deumlich, Waldemar Mioduszezski &amp; Adam Kocmit</i>	279
A pilot monitoring network for groundwater in the Upper Noteć catchment, Poland <i>Irena Pijewska, Waclaw Plenzler, Lech Rapacki, H. Uil &amp; F. H. Kloosterman</i>	287

## 4 Hydrological and Environmental Policy at National Level

### 4.1 Decision support for national policy analysis

Social factors and making water clean <i>Cees van Woerkum</i>	295
Credibility and acceptability of mathematical models of environmental impacts of agriculture in The Netherlands <i>D. T. van der Molen &amp; P. C. M. Boers</i>	303

Policies for reducing environmental impacts from farming: a methodology for interdisciplinary analyses <i>Arild Vatn</i>	311
Changes in land use and the growing number of flash floods in Germany <i>Rienk R. van der Ploeg, Galina Machulla, Dirk Hermsmeyer, Jan Ilsemann, Matthias Gieska &amp; Joerg Bachmann</i>	317
<b>4.2 Models and methods for national policy analysis</b>	
Pesticide river load from diffuse sources in Germany: a modelling approach <i>Martin Bach, Hans-Georg Frede &amp; Andreas Huber</i>	323
Scenario analysis supporting fertilizer management strategies in the agricultural region of the Brusselean aquifer <i>Juan David Piñeros Garcet, Amaury Tilmant, Luce Bellefontaine, Andre Guns &amp; Marnik Vanclooster</i>	329
Contribution of agriculture to the heavy metal loads of Dutch surface waters <i>P. F. A. M. Römkens, A. C. C. Plette &amp; G. G. C. Verstappen</i>	337
Supporting the Flemish groundwater policy with respect to nitrate pollution <i>K. Walraevens, R. Eppinger, D. de Smet &amp; M. van Camp</i>	343
Regulatory systems to control mineral losses from agriculture <i>Henk Westhoek</i>	349
<b>4.3 The state of affairs of ground and surface water</b>	
The impact of land use in Europe on N inputs to rivers and estuaries and related N <sub>2</sub> O emissions: a scenario analysis <i>Carolien Kroeze &amp; Sybil P. Seitzinger</i>	355
Monitoring erosion and nutrient losses from small basins representative of Norwegian agriculture <i>Marianne Bechmann &amp; Per Ivar Våje</i>	361
Baltic agriculture in transition—the contribution to nutrient loads in the Gulf of Riga drainage basin <i>Nils Vagstad, Johannes Deelstra, Viesturs Jansons &amp; Enn Loigu</i>	367
Nutrients in water of the Orhon River in the Arctic Ocean basin of Mongolia <i>P. Batima</i>	373
Nutrient losses from agriculture: effects on Canadian surface and ground waters <i>Patricia A. Chambers, Martha Guy, Gary Grove, Robert Kent, Elizabeth Roberts &amp; Christian Gagnon</i>	379
The impact of agriculture on ground and surface water quality in Poland: state of affairs and policy <i>Andrzej Sapek</i>	385
Monitoring the effectiveness of the Dutch Mineral Policy on nitrate in groundwater <i>Dico Fraters, Leo Boumans, Hans Reijnders, Ton van Leeuwen &amp; Wim de Hoop</i>	391
<b>5 Scaling Up and Down</b>	
Models and monitoring: scaling-up cause-and-effect relationships in nutrient pollution to the catchment scale <i>Paul Quinn</i>	397
Choosing appropriate upscaling and downscaling methods for environmental research <i>Peter A. Finke, Marc F. P. Bierkens &amp; Peter de Willigen</i>	405
Key word index	411
