The

EVERGLADES,
FLORIDA BAY,
and
CORAL REEFS
of the
FLORIDA KEYS
An Ecosystem Sourcebook

# Table of Contents

**Introduction**  The Everglades, Florida Bay, and Coral Reefs of the Florida Keys: An Ecosystem Sourcebook .................................................................1  
*James W. Porter*

**Section I — Florida Everglades**

A. Hydrology and Nutrients

**Chapter 1**  The Past, Present, and Future Hydrology and Ecology of Lake Okeechobee and Its Watersheds .................................................................19  
*Alan D. Steinman, Karl E. Havens, Hunter J. Carrick, and Randy VanZee*

**Chapter 2**  The Effects of Altered Hydrology on the Ecology of the Everglades ..............39  
*Fred Sklar, Christopher McVoy, Randy VanZee, Dale E. Gawlik, Ken Tarboton, David Rudnick, ShiLi Miao, and Tom Armentano*

**Chapter 3**  Effects of Anthropogenic Phosphorus Inputs on the Everglades ................83  
*Paul V. McCormick, Susan Newman, ShiLi Miao, Dale E. Gawlik, Darlene Marley, K. Ramesh Reddy, and Tom D. Fontaine*

**Chapter 4**  Quantifying the Effects of Low-Level Phosphorus Additions on Unenriched Everglades Wetlands with *In Situ* Flumes and Phosphorus Dosing .................................................................127  

B. Biota

**Chapter 5**  Ecological Scale and Its Implications for Freshwater Fishes in the Florida Everglades ..........................................................................................153  

**Chapter 6**  Linkages Between the Snail Kite Population and Wetland Dynamics in a Highly Fragmented South Florida Hydroscape ........................................183  
*Wiley M. Kitchens, Robert E. Bennetts, and Donald L. DeAngelis*
Chapter 7  Multi-Taxon Analysis of the “White Zone,” a Common Ecotonal Feature of South Florida Coastal Wetlands .................................................................205

Michael S. Ross, Evelyn E. Gaiser, John F. Meeder, and Matthew T. Lewin

C. Ecosystem Modeling

Chapter 8  Modeling Ecosystem and Population Dynamics on the South Florida Hydroscape .................................................................239

Donald L. DeAngelis, Sarah Bellmund, Wolf M. Mooij, M. Philip Nott, E. Jane Comiskey, Louis J. Gross, Michael A. Huston, and Wilfried F. Wolff

Chapter 9  Maps and GIS Databases for Environmental Studies of the Everglades...........259

Roy Welch, Marguerite Madden, and Robert Doren

Chapter 10 Nitrous Oxide, Methane, and Carbon Dioxide Fluxes from South Florida Habitats During the Transition from Dry to Wet Seasons: Potential Impacts of Everglades Drainage and Flooding on the Atmosphere .........................281

Thomas J. Goreau and William Zamboni de Mello

Section II — Florida Bay

A. Water Movements and Chemistry

Chapter 11 Transport Processes Linking South Florida Coastal Ecosystems ......................309

Thomas N. Lee, Elizabeth Williams, Elizabeth Johns, Doug Wilson, and Ned P. Smith

Chapter 12 Regional-Scale and Long-Term Transport Patterns in the Florida Keys ........343

Ned P. Smith and Patrick A. Pitts

Chapter 13 The Transport of Terrestrial Nutrients to South Florida Coastal Waters ........361

Larry E. Brand

Chapter 14 Linkages Between the South Florida Peninsula and Coastal Zone: A Sediment-Based History of Natural and Anthropogenic Influences ............415

Chapter 15 Rapid Remote Assessments of Salinity and Ocean Color in Florida Bay ........451

Eurico J. D’Sa, James B. Zaitzeff, Charles S. Yentsch, Jerry L. Miller, and Russell Ives
B. Biota

Chapter 16 Spatial and Temporal Patterns of Phytoplankton in Florida Bay: 
Utility of Algal Accessory Pigments and Remote Sensing 
to Assess Bloom Dynamics

Laurie L. Richardson and Paul V. Zimba

Chapter 17 Modern Diatom Distributions in Florida Bay: A Preliminary Analysis

Jacqueline K. Huvane

Chapter 18 Seagrass Distribution in South Florida: A Multi-Agency Coordinated 
Monitoring Program

James W. Fourqurean, Michael J. Durako, Margaret O. Hall, and Lee N. Hefty

Chapter 19 Patterns of Change in the Seagrass-Dominated Florida Bay Hydroscape

Michael J. Durako, Margaret O. Hall, and Manuel Merello

Chapter 20 Linkages Between Estuarine and Reef Fish Assemblages: Enhancement 
by the Presence of Well-Developed Mangrove Shorelines

Janet A. Ley and Carole C. McIvor

Chapter 21 Nesting Patterns of Roseate Spoonbills in Florida Bay 1935–1999: 
Implications of Landscape Scale Anthropogenic Impacts

Jerome J. Lorenz, John C. Ogden, Robin D. Bjork, and George V. N. Powell

Section III — Florida Reef Tract
A. Water Movements and Nutrients

Chapter 22 A View from the Bridge: External and Internal Forces Affecting 
the Ambient Water Quality of the Florida Keys 
National Marine Sanctuary (FKNMS)

Joseph N. Boyer and Ronald D. Jones

Chapter 23 Biotic Phase-Shifts in Florida Bay and Fore Reef Communities 
of the Florida Keys: Linkages with Historical Freshwater Flows 
and Nitrogen Loading from Everglades Runoff

Brian E. Lapointe, William R. Matzie, and Peter J. Barile

Chapter 24 Shoreline Nutrients and Chlorophyll a in the Florida Keys, 1994–1997: 
A Preliminary Analysis

Brian D. Keller and Arthur Itkin
Chapter 25  Tidal and Meteorological Influences on Shallow Marine Groundwater Flow in the Upper Florida Keys .................................................................659
Christopher D. Reich, Eugene A. Shinn, Todd D. Hickey, and Ann B. Tihansky

Chapter 26  The “Ostrich” Component of the Multiple Stressor Model: Undermining South Florida .................................................................677
Sydney T. Bacchus

B. Reef Biota

Chapter 27  Detection of Coral Reef Change by the Florida Keys Coral Reef Monitoring Project ..............................................................................749
James W. Porter, Vladimir Kosmynin, Kathryn L. Patterson, Karen G. Porter, Walter C. Jaap, Jennifer L. Wheaton, Keith Hackett, Matt Lybolt, Chris P. Tsokos, George Yanev, Douglas M. Marcinek, John Dotted, David Eaken, Matt Patterson, Ouida W. Meier, Mike Brill, and Phillip Dustan

Chapter 28  The Influence of Nearshore Waters on Corals of the Florida Reef Tract .................................................................771
Clayton B. Cook, Erich M. Mueller, M. Drew Ferrier, and Eric Annis

Chapter 29  Differential Coral Recruitment Patterns in the Florida Keys ..................................................................................................789
Jennifer I. Tougas and James W. Porter

Chapter 30  Aspergillosis of Sea Fan Corals: Disease Dynamics in the Florida Keys ..............................................................................813
Kiho Kim and C. Drew Harvell

Section IV — Policy, Management, and Conservation

Chapter 31  Water Quality Concerns in the Florida Keys: Sources, Effects, and Solutions ........................................................................827
William L. Kruczynski and Fred McManus

Chapter 32  The Role of the Florida Keys National Marine Sanctuary in the South Florida Ecosystem Restoration Initiative ........................................................................883
Billy D. Causey

Chapter 33  The Role of a Nonprofit Organization, Reef Relief, in Protecting Coral Reefs ............................................................................895
DeeVon Quirolo
Section V — International Analog: An Integrated Watershed Approach to Coral Reef Management in Negril, Jamaica

Chapter 34 Patterns of Coral Reef Development in the Negril Marine Park: Necessity for a Whole Watershed Management Plan
Karen G. Porter, James W. Porter, Delene W. Porter, Katy Thacker, Courtney Black, Webster Gabbidon, Linval Getten, Craig Quirolo, Douglas M. Marcinek, and Phillip Dustan

Chapter 35 Community-Based Water Quality and Coral Reef Monitoring in the Negril Marine Park, Jamaica: Land-Based Nutrient Inputs and Their Ecological Consequences
Brian E. Lapointe and Katy Thacker
