List of Contributors ............................................................................................... xv
Preface .................................................................................................................... xix

**Chapter 1**
Introduction: Ideas on Human Impact on Environment and Prospects for a Sustainable Future in Africa................................. 1
M.B.K. Darkoh and A. Rwomire

**Chapter 2**
A Socio-Economic Analysis of Environmental Degradation in Africa .................................................................................. 29
R.N. Ogbudinkpa

**Chapter 3**
Political and Social Dimensions of Environmental Crisis in Nigeria ..................................................................................... 43
C. Obi

**Chapter 4**
Environmental Security in the Drylands of Africa: The Role of Science and Technology ......................................................... 55
M.B.K. Darkoh

**Chapter 5**
Environmental Security in South Africa: A Prognosis for Regional Security ........................................................................... 75
J.K. Van Wyk

**Chapter 6**
G. Letamo and O. Totolo

**Chapter 7**
Environment and Forced Migration: A Review ............................................. 141
W.F.G. Cardy
Chapter 8
International Migration in Southern Africa:
A Retrospective Benefit-Cost Analysis ............................................ 163
A. Rwomire

Chapter 9
Desertification: Myths and Realities ............................................. 183
O.B. Smith and S. Koala

Chapter 10
The Nature, Causes and Consequences of Desertification
in the Drylands of Africa ................................................................. 199
M.B.K. Darkoh

Chapter 11
The Sahel Dust Bowl: Processes and
Control Strategies ....................................................................... 237
O.B. Smith and S. Koala

Chapter 12
Agriculture and Biodiversity in the Drylands
of Africa ......................................................................................... 253
M.B.K. Darkoh

Chapter 13
Indigenous Systems of Land Evaluation:
Some Examples from Eastern and Southern Africa ................... 283
H.M. Mushala

Chapter 14
The Livestock Industry and the Subsistence
Economy of Rangelands in Africa with
Special Reference to Botswana ....................................................... 305
B.T. Kgabung

Chapter 15
Globalisation and Wildlife Resource Sustainability
in Botswana ..................................................................................... 349
J.E. Mbaiwa, M.B.K. Darkoh and J. Nakizito
Chapter 16
Community-Based Tourism in Ngamiland District, Botswana: Development, Impacts and Challenges ..................... 379
J. E. Mbaiwa

Chapter 17
Urban Poverty and Environmental Health:
The Case of Kampala City, Uganda ................................................. 403
A. Nuwagaba

Chapter 18
Government Policy and Environmental Waste Management in Maiduguri Urban Area, Nigeria ......................... 429
S. O. Okafor
