### Section 1  
**Introduction to research methods**  
1

### Chapter 1  
**Introduction to research in relation to professional practice**  
Kirsty Williamson with Frada Burstein and Sue McKemmish  
5

Introduction – What is research? – The major elements of a research project or proposal – The role which research can and should play in professional practice – Conclusion – Discussion questions – Further readings – References

### Chapter 2  
**The two major traditions of research**  
Kirsty Williamson with Frada Burstein and Sue McKemmish  
25

Introduction: The two major traditions of research – Reasoning styles – Positivism and post-positivism – Interpretivism – Combining quantitative and qualitative methods – Summary of research approaches – Examples of quantitative and qualitative research in professional practice – Discussion questions – Further readings – References

### Chapter 3  
**The beginning stages of research**  
Kirsty Williamson  
49

Research problems and research questions – Hypotheses: Their role in research and their formulation – Theory: Its role in research and its development – The literature review – Conclusion – Discussion questions – Further readings – References

### Chapter 4  
**Ethics in research**  
Graeme Johanson  
67

The practice of ethics in research – Social ideals and research – Principles and ethical codes – Ethics committees – Power and influence – Publishing research – Hypothetical dilemmas – Conclusion – Further readings – References

### Section 2  
**Methods**  
85
### Chapter 5
**Survey research – Kerry Tanner**

Introduction – Sampling and the ability to generalise –
Descriptive surveys – Explanatory surveys – Telephone surveys –
Electronic surveys – Conclusion – Discussion questions – Further readings – References

### Chapter 6
**Case study research – Peta Darke and Graeme Shanks**

The case study as a research approach – Philosophical traditions and case study research – Designing case study research – Conducting case study research – Conclusion – Discussion questions – Further readings – References

### Chapter 7
**Experimental research designs – Kerry Tanner**

Introduction – Key research concepts – The true experiment –
Pre-experimental research designs – Quasi-experimental research designs – Conclusion – Discussion questions – Further readings – References

### Chapter 8
**System development in information systems research – Frada Burstein**

Specifics – Systems development approach – Where systems development fits into the research cycle – Generalised research process model – Systems development research procedure – Conclusion – Discussion questions – Further readings – References

### Chapter 9
**Action research – Majola J.H. Oosthuizen**

The philosophy of action research – Sources of action research –
The nature of action research – Rigorous action research –
Techniques – Conclusion – Discussion questions – Further readings – References

### Chapter 10
**Ethnography – Solveiga Saule**

Introduction – Positivist approaches to the analysis of culture and social phenomena – Interpretivist philosophical frameworks –
Critiques of the frameworks – Post-modern ethnography –
Conclusion – Discussion questions – Further readings – References

### Chapter 11
**Historical research – Graeme Johanson**

All around us – Evidence – Critiquing the evidence – Uses of history – Discussion questions – Further readings – References

| Chapter 14 | Research techniques: Questionnaires and interviews – Kirsty Williamson | 235 |
| Questionnaires – Interviewing – Discussion questions – Further readings – References |

| Chapter 15 | Research techniques: Focus groups – Kirsty Williamson | 251 |
| Introduction – Setting up focus groups – Uses of focus groups – Advantages and disadvantages of focus groups – Design of focus groups – Conclusion – Discussion questions – Further readings – References |

| Chapter 16 | Ethnographic techniques – Amanda Bow | 265 |
| Introduction – What is ethnography? – The variety of ways of doing participant observation – Other ways of doing ethnography – When to undertake an ethnography – Gaining permission to enter the field – Planning the research – Entering the field – Collecting the data – Analysis – Presenting the findings – Discussion questions – Further readings – References |

Chapter 18  Evaluation of published research – Kirsty Williamson  305

Introduction – Strategy for reading and evaluating research reports – Major components of a research report – Conclusion – Discussion questions – References

Postscript  Seven questions for information management and systems researchers – Don Schauder  323

Information management and systems research: A tough mission – Seeing, observing and modelling – Two final questions – References
