

Groundwater Quality: *Natural and Enhanced Restoration of Groundwater Pollution*

Edited by

STEVEN F. THORNTON & SASCHA E. OSWALD

Groundwater Protection and Restoration Group, Department of Civil and Structural Engineering, University of Sheffield, Mappin Street, Sheffield S1 3JD, UK

Selected and reviewed papers presented at the
Groundwater Quality 2001 Conference
held in Sheffield, UK, from 18 to 21 June 2001.

This conference was jointly convened by
the Groundwater Protection and Restoration Group,
Department of Civil and Structural Engineering,
University of Sheffield, UK

and

the International Commission on Groundwater of the
International Association of Hydrological Sciences (IAHS)

Contents

Preface by Steve Thornton & Sascha Oswald

v

1 Site Characterization

Integrating geophysical and tracer test data for accurate solute transport modelling in heterogeneous porous media <i>C. Rentier, S. Brouyere & A. Dassargues</i>	3
Interpreting tracer data to forecast remedial performance <i>Carl G. Enfield, A. Lynn Wood, Michael C. Brooks & Michael D. Annable</i>	11
Natural gradient partitioning and interfacial tracer tests for NAPL source zone characterization at a former coal gasification plant <i>M. Piepenbrink, T. Ptak & P. Grathwohl</i>	17
A new method for quantifying contaminant flux at hazardous waste sites <i>Kirk Hatfield, Michael D. Annable, Suzannah Kuhn, P. Suresh C. Rao & Tim Campbell</i>	25
A scoping study of the use of colloids in evaluating low concentration inorganic pollutants in pumped groundwaters <i>U. O. Kleinert, K. A. Stagg, J. H. Tellam & J. W. Lloyd</i>	33
Occurrence and fate of chlorofluorocarbon plumes in groundwater <i>P. Höhener, D. Werner, C. Balsiger & G. Pasteris</i>	41
Are bioassays useful tools to assess redox processes and biodegradation? <i>H.-J. Albrechtsen, P. G. Pedersen & L. Ludvigsen</i>	49
Microbial ecology of a crude oil contaminated aquifer <i>B. A. Bekins, I. M. Cozzarelli, E. Warren & E. M. Godsy</i>	57
The impact of contaminated land on groundwater quality in the Wolverhampton conurbation (UK) <i>M. A. Czerewko, J. C. Cripps, C. C. Smith & G. M. Williams</i>	65
Impacts of contaminated groundwater on urban river quality—Birmingham, UK <i>P. A. Ellis, M. O. Rivett, J. E. Henstock, J. W. Dowle, R. Mackay, R. S. Ward & R. C. Harris</i>	71
The impact of horse dung on urban groundwater quality in the Birmingham Triassic sandstone aquifer, UK <i>Patricia Fernandes Alves & John H. Tellam</i>	79
Groundwater quality considerations related to artificial recharge to the aquifer of the Korinthos Prefecture, Greece <i>M. Hionidi, A. Panagopoulos, I. Koumantakis & K. Voudouris</i>	85
Microbiological quality of groundwater in UK urban aquifers: do we know enough? <i>K. L. Powell, A. A. Cronin, S. Pedley & M. H. Barrett</i>	91
SIReN: the site for innovative research into monitored natural attenuation <i>Richard Swannell, Sarah MacNaughton, Gordon Lethbridge, Chris Neaville & Alwyn Hart</i>	97

2 Natural Attenuation Processes

The longer-term behaviour of selected coal tar organics from a natural gradient, emplaced source experiment, CFB Borden	<i>F. A. Blaine, J. F. Barker & M. W. G. King</i>	103
Attenuation processes in the Vejen Landfill leachate plume—10 years on	<i>T. H. Christensen, A. Baun, L. Ask, A. Ledin & P. L. Bjerg</i>	107
Reactivity of chemical reductants as a function of redox zonation	<i>E. J. Weber, J. F. Kenneke & L. A. Hoferkamp</i>	113
Assessing biotic and abiotic contributions to chlorinated solvent transformation in iron-reducing and sulphidogenic environments	<i>Michael L. McCormick, Peter T. Jung, Paul G. Koster Van Groos, Kim F. Hayes, Peter Adriaens, Erik Petrovskis & Karen L. Skubal</i>	119
Natural restoration of heavy metal contaminated soils: the role of interfacial processes	<i>N. P. Nikolaidis & H. A. Hellerich</i>	127
Modelling the seasonal variation in bioavailability of residual NAPL in the vadose zone	<i>Arturo A. Keller, Patricia A. Holden & Alicia M. Wilson</i>	133
Natural attenuation of volatile hydrocarbons in the unsaturated zone and shallow groundwater plumes: scenario-specific modelling and laboratory experiments	<i>Peter Grathwohl, Ingo D. Klenk, Uli Maier & Sayonara B. F. Reckhorn</i>	141
The release of pollutants from aged field sediments	<i>Jürgen Dermietzel & Gernot Christoph</i>	147
Surface observations applied to the interpretation of unsaturated column experiments	<i>K. A. Evans & S. A. Banwart</i>	153
Leachate attenuation characteristics of colliery spoils	<i>R. J. Freedwood, J. C. Cripps & C. C. Smith</i>	159
An overview of factors influencing the colloid/particle favoured relocation of contaminants	<i>T. Hofmann</i>	165
Natural attenuation of remnant coking liquor contamination from a deep unsaturated zone	<i>I. Jones & D. N. Lerner</i>	169
Role of electron acceptors and donors in the breakdown of chlorinated hydrocarbons	<i>Xiaoxia Lu, Guanghe Li, Shu Tao, John A. Dijk, Tom N. P. Bosma & Jan Gerritse</i>	175
Sorption mechanism of organic compounds in karst: SOM or HSACM dependent?	<i>A. O. Odutola & K. P. Walsh</i>	181
Atrazine removal in Danish anaerobic aquifers	<i>P. G. Pedersen, N. P. Arildskov & H.-J. Albrechtsen</i>	187
Organic contaminant sorption in Triassic sandstone deposits, Birmingham, UK	<i>K. A. Shepherd, M. O. Rivett & R. G. R. Mitchener</i>	193
Natural attenuation of herbicides: importance of growth-based degradation	<i>N. Tuxen, A. L. Højberg, M. M. Broholm, H.-J. Albrechtsen & P. L. Bjerg</i>	199
Assessing the transport and fate of MTBE-amended petroleum hydrocarbons in the Chalk aquifer, UK	<i>G. P. Wealthall, S. F. Thornton & D. N. Lerner</i>	205

The influence of water table fluctuations on the volatilization of contaminants from groundwater <i>D. Werner & P. Höhener</i>	213
Microbial production of fatty acids in phenol-contaminated groundwater and its significance in subsurface bioremediation <i>Youxian Wu, S. A. Banwart, S. F. Thornton & D. N. Lerner</i>	219
LNAPL redistribution on a fluctuating water table: column experiments <i>S. Chompusri, M. O. Rivett & R. Mackay</i>	225

3 Natural Attenuation Applications

Funnel-and-gate vs innovative pump-and-treat systems: a comparative economic assessment <i>P. Bayer, M. Morio, C. Bürger, B. Seif, M. Finkel & G. Teutsch</i>	235
Evaluating natural attenuation in a controlled field experiment by mass balances, flux fences and snapshots: a comparison of results <i>J. F. Devlin, M. McMaster, D. Katic & J. F. Barker</i>	245
A phenol-contaminated groundwater site: a microbiological perspective <i>R. W. Pickup, H. E. H. Mallinson, G. Rhodes, M. L. Alamillo, S. F. Thornton & D. N. Lerner</i>	251
Estimation of contaminant mass flows in a multi-layered aquifer using pumping tests: numerical experiments at field-scale <i>M. Bayer-Raich, R. Baumann & T. Ptak</i>	257
Multiphase flow and enhanced biodegradation of dense non-aqueous phase liquids: experimental design <i>L. Bouw, S. M. Hassanzadeh & A. Leijnse</i>	265
Using Fe(II) adsorption and surface-catalysed oxidation for Fe(II) removal from predicted mine water discharges <i>S. P. Burke & S. A. Banwart</i>	271
A non-invasive imaging technique to investigate solute transport in porous media <i>W. Huang, D. N. Lerner, C. C. Smith & S. F. Thornton</i>	277
Stable isotope ratios as a tool to assess biodegradation of methyl <i>tert</i> -butyl ether (MTBE) and <i>tert</i> -butyl alcohol (TBA) <i>D. Hunkeler, B. J. Butler, R. Aravena & J. F. Barker</i>	283
Removal of petroleum hydrocarbons from the vadose zone during multi-phase extraction at a contaminated industrial site <i>C. D. Johnston, S. Fisher & J. L. Rayner</i>	287
The use of enantiomeric ratios to identify natural attenuation of mecoprop in the Lincolnshire Limestone <i>G. M. Williams, I. Harrison, D. J. Noy, O. Crowley & R. Kalin</i>	295

4 In Situ Remediation

Surfactant enhanced aquifer remediation: application of mathematical models in the design and evaluation of a pilot-scale test <i>Linda M. Abriola, Chad D. Drummond, Lawrence D. Lemke, Klaus M. Rathfelder, Kurt D. Pennell, Erik Petrovskis & Gary Daniels</i>	303
Investigations of surfactant facilitated removal of coal tar contaminants from manufactured gas works soils <i>Stephen Leharne & Jingfeng Dong</i>	311

Strategies for <i>in situ</i> bioremediation of chlorinated solvent contaminated groundwater <i>P. L. McCarty</i>	319
Plume control using bioaugmentation with halo respiration microorganisms <i>J. M. Lendvay, M. J. Barcelona, G. Daniels, M. Dollhopf, B. Z. Fathepure, M. Gebhard, R. Heine, R. Hickey, F. Löffler, C. L. Major Jr, E. Petrovskis, J. Shi, J. Tiedje & P. Adriaens</i>	325
<i>In situ</i> treatment of MTBE-contaminated groundwater at two sites in California <i>D. M. Mackay, R. D. Wilson, C. Naas, I. Wood, K. Scow, A. Smith, D. Gandhi, K. Hristova, B. Watanabe & M. Einarson</i>	333
The use of electrokinetics as a tool to investigate bioavailability <i>S. A. Jackman, C. J. Knowles, G. Maini, A. K. Sharman & J. G. Sunderland</i>	341
Polymer mats for reactive/sorptive barrier remediation of diverse contaminants in groundwater <i>B. M. Patterson, G. B. Davis, M. E. Grassi & A. J. McKinley</i>	347
Performance assessment of the phased remediation of a former gas manufacturing plant <i>A. P. Butler, A. Shields, H. S. Wheater, J. N. B. Bell, J. R. Mason, S. Smith & A. D. G. Jones</i>	353
Soil remediation using an electrokinetic method <i>K. Arnerdal & I. Neretnieks</i>	361
Successful field demonstration of bioaugmentation to degrade PCE and TCE to ethene <i>P. Morgan, D. W. Major, M. L. McMaster, E. E. Cox, E. Hendrickson, E. Edwards & S. Dworatzek</i>	369
5 Permeable Reactive Barriers	
MNA and <i>in situ</i> reactive barrier approaches for groundwater contaminated by petroleum hydrocarbons <i>J. F. Barker</i>	377
Reductive degradation of azo dyes in aqueous solution by zero-valent iron <i>T. Bigg & S. J. Judd</i>	383
Technique for arsenic removal from groundwater utilizing geological options—an innovative low cost remediation <i>R. Bhattacharyya, D. Chatterjee, G. Jacks & S. S. De Dala</i>	391
Kinetics of trichloroethene (TCE) reduction by zero-valent iron: effect of medium composition <i>J. Dries, L. Bastiaens, D. Springael, L. Diels & S. N. Agathos</i>	397
Evaluating the performance of palladium-plated granular iron for reductive dechlorination of TCE <i>Lai Gui & Robert W. Gillham</i>	403
Removal of chromate in a permeable reactive barrier using zero-valent iron <i>P. Kjeldsen & T. Locht</i>	409
Enhanced microbial dechlorination of chloroethenes and chloroethanes: from laboratory tests to application in a bioscreen <i>H. Slenders, M. van Eekert, H. Rijnaarts, J. Ter Meer, T. Verheij, P. Verhaagen & J. Theeuwes</i>	415
Factors in the long-term performance of granular iron PRBs <i>Robert W. Gillham, Kaylene Ritter, Yousheng Zhang & Marek S. Odziemkowski</i>	421
Kinetics of reduction of TNT by iron metal <i>P. G. Tratnyek, R. Miehr & J. Z. Bandstra</i>	427

Coupled <i>in situ</i> reactors using Fe ⁰ and activated carbon for the remediation of complex contaminant mixtures in groundwater <i>R. Köber, D. Schäfer, M. Ebert & A. Dahmke</i>	435
Numerical modelling of the simultaneous degradation of TCE and <i>cis</i> -DCE by zero-valent iron <i>D. Schäfer, R. Köber, M. Ebert & A. Dahmke</i>	441
Combined removal of chlorinated ethenes and heavy metals in zero-valent iron systems <i>J. Dries, L. Bastiaens, D. Springael, L. Diels & S. N. Agathos</i>	447
6 Flow and Transport Modelling	
DNAPL migration through interbedded clay-sand sequences <i>B. H. Kueper & D. A. Reynolds</i>	455
Solute transport in flow fields influenced by decimetre-scale preferential flow paths: implications for groundwater remediation <i>Chunmiao Zheng & Steven M. Gorelick</i>	463
Natural attenuation in heterogeneous aquifers: combined effect of biodegradation and rate-limited mass transfer <i>Sten Berglund, Vladimir Cvetkovic & Roy Haggerty</i>	471
Multicomponent reactive transport modelling of natural attenuation in a phenol-contaminated sandstone aquifer <i>K. Ulrich Mayer, S. G. Benner, E. O. Frind, S. F. Thornton & D. N. Lerner</i>	479
Travel-time based model of bioremediation using circulation wells <i>O. A. Cirpka & P. K. Kitanidis</i>	485
Groundwater flow into mining lakes <i>E. Bozau & G. Strauch</i>	493
Modelling the oxidation of residual sulphide tailings in soil near Aznalcóllar (southwest Spain) <i>C. Domènech, C. Ayora, M. W. Saaltink & J. Carrera</i>	501
Process modelling of oxygen supply for aerobic biodegradation in the presence of an oxygen bubble wall <i>H. Geistlinger, D. Lazik, D. Eisermann & H. Weiss</i>	507
Experimental and theoretical investigations of oxygen phase transfer <i>H. Geistlinger, D. Lazik, A. Beckmann & G. Krauss</i>	513
Natural attenuation of common agricultural and atmospheric pollutants: reactive transport of nitrate, potassium and aluminium in sandy sediments of northwestern Germany <i>Georg J. Houben</i>	519
A modelling feasibility study of hydraulic manipulation: a groundwater restoration concept for reluctant contaminant plumes <i>I. Jones, D. N. Lerner & S. F. Thornton</i>	525
Simulating natural attenuation and ethanol-induced benzene persistence in gasoline-contaminated aquifers <i>J. W. Molson, J. F. Barker, E. O. Frind & M. Schirmer</i>	533
Conceptualization of gas tracer tests within a fracture <i>H. Ramajo, J. Jodar, J. Carrera & S. Olivella</i>	539
Transport in heterogeneous media: modelling mass-transfer rate-limited processes by means of temporal moments <i>X. Sanchez-Vila & Y. Rubin</i>	547

Groundwater flow from disused landfills in the UK Chalk <i>G. M. Williams, D. J. Noy & R. D. Ogilvy</i>	553
7 Integrated Technologies and Decision Making	
Arsenic and lead pollution of the Salamanca aquifer, Mexico: origin, mobilization and restoration alternatives <i>Ramiro Rodriguez, Aurora Armienta, Joel Berlin & J. Angel Mejia</i>	561
The impact of the gasoline additive methyl tertiary-butyl ether (MTBE) on groundwater: a German perspective <i>M. Schirmer, M. Effenberger & H. Weiss</i>	567
Technology integration for contaminated site remediation: clean-up goals and performance criteria <i>P. Suresh C. Rao, James W. Jawitz, Carl G. Enfield, Ronald W. Falta Jr, Michael D. Annable & A. Lynn-Wood</i>	571
Containment of groundwater contaminated with chlorinated hydrocarbons, Umbogintwini Industrial Complex, South Africa <i>J. A. Palmer, A. J. Oliver & I. S. Cameron-Clarke</i>	579
Time-scale issues in the remediation of pervasively-contaminated groundwaters at abandoned mine sites <i>P. L. Younger & S. A. Banwart</i>	585
Protecting “Living Water”: involving Western Australian Aboriginal communities in the management of groundwater quality issues <i>S. J. Appleyard, K. MacIntyre & B. Dobson</i>	593
Key word index	601
