Linear and Quasilinear Complex Equations of Hyperbolic and Mixed Type

Guo Chun Wen

School of Mathematical Sciences,
Peking University, Beijing, China

London and New York
Contents

Introduction to the series viii
Preface ix

Chapter I
Hyperbolic complex equations of first order 1

1 Hyperbolic complex functions and hyperbolic pseudoregular functions 1
2 Complex forms of linear and nonlinear hyperbolic systems of first order equations 10
3 Boundary value problems of linear hyperbolic complex equations of first order 18
4 Boundary value problems of quasilinear hyperbolic complex equations of first order 25
5 Hyperbolic mappings and quasi-hyperbolic mappings 35

Chapter II
Hyperbolic complex equations of second order 39

1 Complex form of hyperbolic equations of second order 39
2 Oblique derivative problems for quasilinear hyperbolic equations of second order 43
3 Oblique derivative problems for general quasilinear hyperbolic equations of second order 50
4 Other oblique derivative problems for quasilinear hyperbolic equations of second order 59
5 Oblique derivative problems for degenerate hyperbolic equations of second order 66
Chapter III
Nonlinear elliptic complex equations of first and second order

1 Generalizations of Keldych–Sedov formula for analytic functions 79
2 Representation and existence of solutions for elliptic complex equations of first order 90
3 Discontinuous oblique derivative problems for quasilinear elliptic equations of second order 95
4 Boundary value problems for degenerate elliptic equations of second order in a simply connected domain 108

Chapter IV
First order complex equations of mixed type

1 The Riemann–Hilbert problem for simplest first order complex equation of mixed type 119
2 The Riemann-Hilbert problem for first order linear complex equations of mixed type 126
3 The Riemann–Hilbert problem for first order quasilinear complex equations of mixed type 134
4 The Riemann–Hilbert problem for first order quasilinear equations of mixed type in general domains 138
5 The discontinuous Riemann–Hilbert problem for quasilinear mixed equations of first order 143

Chapter V
Second order linear equations of mixed type

1 Oblique derivative problems for simplest second order equation of mixed type 157
2 Oblique derivative problems for second order linear equations of mixed type 162
3 Discontinuous oblique derivative problems for second order linear equations of mixed type 171
4 The Frankl boundary value problem for second order linear equations of mixed type 177
5 Oblique derivative problems for second order degenerate equations of mixed type 194
Chapter VI
Second order quasilinear equations of mixed type  200

1  Oblique derivative problems for second order
    quasilinear equations of mixed type  200
2  Oblique derivative problems for second order
    equations of mixed type in general domains  209
3  Discontinuous oblique derivative problems for second
    order quasilinear equations of mixed type  218
4  Oblique derivative problems for quasilinear equations
    of mixed type in multiply connected domains  227
