CONTENTS

American Memory: Historical Collections from the Library of Congress
   Martha Anderson ................................................................. 1

Linux and Open Source Software:
It’s Working for the Millersville University Library
   Scott R. Anderson and Michael W. Mitton ............................ 3

Master Trainer Program: State Library of North Carolina
   Ron Andrews and Elaine Christian ........................................ 9

Multimedia and Copyright: What Educators Need to Know
   Connie Bakker ................................................................. 10

Getting Down to Business: How Super Searchers Find Business Information Online
   Mary Ellen Bates ................................................................... 21

Managing Print Costs—A Case Study in Managing Patron Printing
   David Bennett ...................................................................... 23

Security and Access: New Technologies in Wide Area Networks
   Cheryl A. Bower and Sally J. Lodico .................................... 25

E-Reserves Made Easy: Linking Reserve Records in Your Library Catalog to Scanned Documents on Your Web Server
   Terry W. Brandsma ............................................................. 31

Ciao: Developing an Architecture for User Profile Management
   Kevin Broun ....................................................................... 34

The Library of the Future & the World Network
   Jo Bryant ........................................................................... 38

Teaching How to Search on a Mutating Web
   Laura B. Cohen .................................................................. 47

From Paper and Pencil to NT Server: Tracking Electronic Journals
   Fannie M. Cox and Weiling Liu ............................................ 54
Successful Web Page Design: *Neither Accident nor Frill*
Francie C. Davis ................................................................. 58

Building Blocks for Encoded Text: Analytical Interpretive Encoding of
Electronic Texts at Wilson Library’s Electronic Text Research Center
William Fietzer ................................................................. 64

Online Learning Communities
Leslie Fournier and Darryl A. Pieber ........................................ 67

Building Community using Internet Tools
Leslie Fournier ................................................................. 70

Building the AgNIC Alliance and a Distributed
System for Electronic Agricultural Information
Melanie Gardner, Janet McCue, Barbara Hutchinson and Jeanne Pfander .......... 76

Creating a Structure for Collaboration and Technological Innovations for AgNIC
Melanie A. Gardner ............................................................ 77

Case Study in Digitization: The Army Research Laboratory (ARL)
Lillian W. Gassie ............................................................... 81

New Technologies, New Strategies, New Teams:
Learning in the Government Environment
Deirdre Grimes ................................................................. 87

Powerful Partnerships: Principals and Media Specialists Leading Change
Scott Hannon and Mary Alice Anderson .................................. 93

CIL 2000: Digital Licensing
Lesley Ellen Harris ............................................................. 94

Virtual Instruction—Tutorials & Literacy:
Providing Library Services for Off-Campus Library Users
Karen Hartman ................................................................. 104

The Invisible Web
Karen Hartman and Ernest Ackermann .................................... 105

The Essential Web: What to Teach in 50 Minutes
Karen Hartman and Ernest Ackermann .................................... 106
MEDLINE\textit{Plus}: Technical Abstract
Joseph Hutchins .............................................................. 107

Retrieving America's Past: Digitizing 150 Years of the Chicago Tribune
John F. Jansson, John R. Yokley and Deborah O. Harmer .................. 108

UNCLE Help Command Center: An Intranet Hub Process
Dan Keefer ........................................................................... 132

Keeping It in the Family: The Library in Today's Business Environment
Carol J. Knoblauch ............................................................... 141

Erase the Lines! Integrating Library and Computer Services for the User
Leah Krevit and James M. Spence ........................................... 146

MEDLINE\textit{plus}: Delivering Health Information to Consumers
Eve-Marie Lacroix ................................................................. 147

The Connected Library—How IT is Transforming Library Building Design
Alex Lamis ............................................................................. 148

Winners All! Unique Technology Grants for Public Libraries
Kathy Leeds ........................................................................... 149

The United Nations Digitization Programme at the Dag Hammarskjöld Library
Nathalie Leroy ....................................................................... 152

Virtual End User Training—Online and Hands-On
Gretchen Leslie, Barbara Herzog and Carole Myles ....................... 154

The Long and Winding Road to a Virtual College Library of the 21st Century
Judith Liebman ..................................................................... 162

Write Once, Use Many: Creating Web-Based Tutorials to Extend Instructional Outreach
Erica B. Lilly ........................................................................ 170

NAS and SAN: Implications for Library Use
Byron C. Mayes ..................................................................... 184

Becoming Grant Savvy
Ray McBride ........................................................................ 187
Resolving Two Congressional Duties: Electronic Copyright and the Electronic Post-Offices—and—Post-Roads
G. Arthur Mihram and Danielle Mihram ................................. 195

RIP this Content: A New Model for Publishing on the Internet
Mike O’Donnell ................................................................. 205

The Biologist’s Guide to Library Resources:
A Library/Faculty Collaboration on the Web
Regina Fisher Raboin ...................................................... 214

Meeting Diverse Information Needs through PubMed.
Barbara A. Rapp ............................................................. 216

Tracking Workflow in a Virtual Environment
Jan Rivers ................................................................. 218

The Camel Project at Oregon State University:
Collecting and Managing Access to Faculty-Created Web-Based Resources
Richard E. Sapon-White and May Chau ............................. 219

Virtual Libraries: Issues & Supports
Laverne Saunders ......................................................... 225

Using the Internet As a Reference Tool
Michael Sauers ............................................................ 230

Extending Access and Managing Metadata with the Web:
Digital Possibilities in Interlibrary Loan, Circulation, and Collections
Pamela Sawallis and Georgia Allen ................................. 241

Building a Knowledgebase
Davida Scharf ............................................................. 247

Virtual End-User Training
Judy Sherman ............................................................. 249

Erasing the Lines: Integrating Libraries and Technology Functions at Universities
Part One: We’re Doing What for Whom??!!??
Jack T. Smith, Jr. .......................................................... 250
From Billings to Lindberg: A Continuing Story of Discovery
Kent A. Smith ................................................................. 252

Product and Relationship Management: Building Knowledge Bridges in Organizations
Rebecca A. Smith ............................................................... 254

The Balancing Act: Print and Electronic Collection Development
Patty Sorensen ................................................................. 264

The Nuts & Bolts: Developing a Technology Training Program for the Public Library
Michael Stephens ............................................................. 266

Developing an Intranet for an International Audience
Kathleen Swantek ............................................................ 272

New Methods of Identifying and Accessing Electronic Journals in Libraries
Jennifer Weintraub .......................................................... 275

E-Services: Beyond Automation
Scott Wheelhouse ............................................................ 277

Beyond the Basics: Delivering Subject-Specific Internet Classes in a Public Library
Janie L. Hassard Wilkins and Billie E. Walker .......................... 279

Linux: An Introduction
Sharon Yang ........................................................................ 287

Beyond Search Engines: Collected Resources on the Web
Imogene Zachery ............................................................... 291
