About the Editors xiii
Contributors xv
Preface xix

PART I: FOREST TREE FUNCTIONAL GENOMICS

Chapter 1. Functional Genomics in Forest Trees 3
Alison M. Morse
Janice E. K. Cooke
John M. Davis
Introduction 3
The Functional Genomics Tool Kit—Transcript Discovery
and Profiling 4
Functional Genomics in Action 10
En Route to Functional Genomics in Forest Trees 12
Conclusions 15

Chapter 2. Expressed Sequence Tag Databases
from Forestry Tree Species 19
Timothy J. Strabala
Introduction 19
Forestry Tree EST Databases 21
The Genesis Pine and Eucalyptus EST Projects 26
Special Purpose Libraries 41
Conclusion 47

Chapter 3. Proteomics for Genetic and Physiological
Studies in Forest Trees: Application in Maritime Pine 53
Christophe Plomion Jean-Marc Gion
Nasser Bahrman Céline Lalanne
Paulo Costa Delphine Madur
Christian Dubos Cédric Pionneau
Jean-Marc Frigerio Sophie Gerber
Introduction 53
Characterization of the Pine Proteome 55
PART III: FOREST TREE TRANSGENESIS

Christian Walter Armando McDonald
Julia Charity Ralf Möller
Lloyd Donaldson Armin Wagner
Lynette Grace

Introduction 215
Tissue Culture As a Tool for Molecular Research 216
Genetic Engineering in Conifers 218
Modification of Traits by Suppression of Gene Expression 222
Analysis of Promoters Controlling Gene Expression in Conifers 224
Tissue Culture Protocols for the Early Assessment of Gene Function 226
Tools to Assess Gene Function at the Micro Level 230
Conclusions 235

Chapter 10. Transgenic Forest Trees for Insect Resistance

Wang Lida
Han Yifan
Hu Jianjun

Introduction 243
Woody Plant Species Transgenic to Insect-Resistant Genes 244
Insect-Resistant Genes 248
Field Performance of Insect-Resistant Transgenic Trees 251
Biosafety of Insect-Resistant Transgenic Plants 254
Conclusion and Outlook 255

Chapter 11. Modification of Flowering in Forest Trees

Juha Lemmetyinen
Tuomas Sopanen

Introduction 263
Regulation of Flowering Time and Flower Development in Arabidopsis 264
Genes Regulating Flower Development in Trees 267
Chapter 12. Stability of Transgene Expression in Aspen

Sandeep Kumar
Matthias Fladung

Introduction
rolC Gene, a Phenotypic Marker for the Stability of Transgene Expression
Morphological Analysis of 35S-rolC Transgenic Aspen Plants
Transgene Silencing
Transgene Repeat Formation and Unstable Expression
Transgene Integration and Unstable Expression
Mechanisms of Transgene Integration and Repeat Formation
How to Obtain Stably Expressing Transgenic Plants
Future Perspectives

Chapter 13. Asexual Production of Marker-Free Transgenic Aspen Using MAT Vector Systems

Hiroyasu Ebinuma Saori Endo Koichi Sugita Keiko Yamada-Watanabe Etsuko Matsunaga

Introduction
Transformation Methods Using Agrobacterium
Problems of Antibiotic Selection
Principles of the MAT (Multi-Auto-Transformation) Vector System
Two-Step Transformation of Tobacco Plants Using the GST-MAT Vector
Transformation of Hybrid Aspen Using the GST-MAT Vector
Current Techniques for Removing Selectable Markers and Their Problems
Advantages of Selection Using the ipt Gene
Transgene Stacking Using the ipt-MAT Vector
Combination of the ipt and iaaM/H Genes
PART IV: GENOME MAPPING IN FOREST TREES

Chapter 14. High-Density Linkage Maps in Conifer Species and Their Potential Application

*Enrique Ritter*  
*Jean-Michel Favre*  
*Santiago Espinel*  
*Matthias Fladung*

Introduction 341  
Basic Aspects for Constructing High-Density Maps in Conifer Species 342  
Application of High-Density Maps in Forest Species 347  
Conclusions and Perspectives 352

Chapter 15. Microsatellites in Forest Tree Species: Characteristics, Identification, and Applications

*Giovanni G. Vendramin*  
*Ivan Scotti*  
*Birgit Ziegenhagen*

Introduction 359  
Microsatellites in the Nuclear Genome: Distribution and Variability 360  
From Genome to Populations: The Isolation of Microsatellites and the Development of Molecular Markers 364  
Microsatellites in Populations: SSRs As a Tool for the Screening of Diversity, Differentiation, and Evolution 365  
What is Different About Microsatellites of the Organelle Genomes? 370  
Conclusions 378

Chapter 16. Genome Mapping in *Populus*

*María Teresa Cervera*  
*Véronique Storme*  
*Mitchell M. Sewell*  
*Wout Boerjan*  
*Patricia Faivre-Rampant*

Introduction 387  
Marker Systems 388
Chapter 17. Genetic Mapping in Acacias

Penelope A. Butcher

Introduction
Aspects of the Reproductive Biology of Acacias That Affect Genetic Mapping Strategies
Linkage Mapping in Acacia mangium
Applications of the Acacia Map
Conclusions

Index
