Contents

List of figures vii
List of tables viii
List of contributors ix
Preface xi

1. Ecological economics: prospects for integration and interdisciplinarity
   Stephen Dovers, David I. Stern and Michael D. Young 1

FIRST DIMENSION: CHALLENGES AND REVIEWS

2. Research challenges in the twenty-first century
   John Proops 13

3. Passion and ecological economics: towards a richer coevolution of value systems and environmental systems
   Richard B. Norgaard 23

4. Beyond disciplines: exploring exploratory research as a framework for integration
   Lorrae van Kerkhoff 35

SECOND DIMENSION: REORIENTATIONS AND OPENINGS

5. Sustainability and interdisciplinarity
   Jon Barnett, Heidi Ellemor and Stephen Dovers 53

6. Environmental, ecological and behavioural economics
   Jack L. Knetsch 77

7. Economic psychology and ecological economics
   Stephen E.G. Lea 88

8. A policy orientation as integrative strategy
   Stephen Dovers 102

THIRD DIMENSION: FRAMEWORKS AND APPLICATIONS

9. Towards an ecological-economic theory of nature policy
   C. Martijn van der Heide, Jeroen C.J.M. van den Bergh and Ekko C. van Ierland 121
10. Modelling stochastic technological change in economy and environment using the Kalman filter
   David I. Stern

11. Effective policy interventions in environmental systems using material budgets
   Robert J. Wasson

12. Expanding the concept of flows and developing frameworks for linking social, economic and environmental accounting systems: two approaches for integration
   Sasha Courville
