

# Winning Ways

for Your Mathematical Plays

Volume 2, Second Edition

Elwyn R. Berlekamp, John H. Conway, Richard K. Guy

A K Peters  
Natick, Massachusetts

# Contents

Preface to Second Edition	xiii
Preface	xiv
Change of Heart	xvii
<b>9 If You Can't Beat 'Em, Join 'Em!</b>	<b>277</b>
All the King's Horses . . . . .	277
We Can Join Any Games . . . . .	278
How Remote Is a Horse? . . . . .	278
What If the First Horse to Get Stuck Wins? . . . . .	281
A Slightly Slower Join . . . . .	283
Moving Horses Impartially . . . . .	283
Cutting Every Cake . . . . .	284
Eatcakes . . . . .	286
When to Put Your Money on the Last Horse . . . . .	286
Slow Horses Join the Also-Rans . . . . .	286
Let Them Eat Cake . . . . .	289
All the King's Horses on a Quarter-Infinite Board . . . . .	292
Cutting Your Cakes and Eating Them . . . . .	292
References and Further Reading . . . . .	298
<b>10 Hot Battles Followed by Cold Wars</b>	<b>299</b>
Cold Games – Numbers Are Still Numbers . . . . .	300
Hot Games – The Battle Is Joined! . . . . .	300
Tolls, Timers and Tallies . . . . .	301
Which Is the Best Option? . . . . .	303
Hot Positions . . . . .	304
Cold Positions . . . . .	304
Tepid Positions . . . . .	306
A Tepid Game . . . . .	308
Select Boys and Girls . . . . .	310
Mrs. Grundy . . . . .	310
How to Play <i>Misère Unions of Partizan Games</i> . . . . .	312
Urgent Unions (Shotgun Weddings?) . . . . .	312
Predeciders – Overriders and Suicides . . . . .	312

Falada . . . . .	312
Two More Falada Games . . . . .	320
Baked Alaska . . . . .	321
A Felicitous Falada Field . . . . .	324
The Rules for Tallies on Infinite Tolls . . . . .	325
Time May Be Shorter than You Think! . . . . .	326
<b>11 Games Infinite and Indefinite . . . . .</b>	<b>327</b>
Infinite Enders . . . . .	329
The Infinite Ordinal Numbers . . . . .	329
Other Numbers . . . . .	330
Infinite Nim . . . . .	330
The Infinite Sprague-Grundy and Smith Theories . . . . .	333
Some Superheavy Atoms . . . . .	334
Fixed, Mixed and Free . . . . .	335
Onsides and Offsides, Upsums and Downsums . . . . .	336
Stoppers . . . . .	337
<b>on, off and dud</b> . . . . .	337
How Big Is <b>on</b> ? . . . . .	338
It's Bigger than All of Them! . . . . .	338
Sidling Towards a Game . . . . .	338
Sidling Picks Sides . . . . .	340
Stoppers Have Only One Side . . . . .	340
'Tis!-'Tis n!-'Tis!-'Tis n!-.... . . . . .	342
Loopy Hackenbush . . . . .	343
Disentangling Loopy Hackenbush . . . . .	343
Loopily Infinite Hackenbush . . . . .	344
Sisyphus . . . . .	346
Living with Loops . . . . .	348
Comparing Loopy Games . . . . .	348
The Swivel Chair Strategy . . . . .	349
Stoppers Are Nice . . . . .	350
Plumtrees Are Nicer! . . . . .	353
Taking Care of Plumtrees . . . . .	354
Working With Upsums and Downsums . . . . .	355
<b>on, off and hot</b> . . . . .	356
A Summary of Some Sum Properties . . . . .	357
The House of Cards . . . . .	357
The Degree of Loopiness . . . . .	361
Classes and Varieties . . . . .	362
No Highway . . . . .	364
Backsliding Toads-and-Frogs . . . . .	367
Bach's Carousel . . . . .	369
Getting <b>on</b> in Checkers . . . . .	370
Proof of the Sidling Theorem . . . . .	371
Answer to Exercise One . . . . .	374
<b>tis and tism</b> . . . . .	374
<b>upon</b> . . . . .	375

Backsliding Toads-and-Frogs . . . . .	375
KOs in Go . . . . .	377
References and Further Reading . . . . .	377
<b>12 Games Eternal – Games Entailed</b>	<b>379</b>
Fair Shares and Varied Pairs . . . . .	379
How Soon Can You Win? . . . . .	381
There May Be Open Positions ( <i>O</i> -Positions) . . . . .	382
Adders-and-Ladders . . . . .	386
Just How Loopy Can You Get? . . . . .	391
Corrall Automotive Betterment Scheme . . . . .	391
Sharing Out Other Kinds of Nut . . . . .	393
Fair Shares and Unequal Partners . . . . .	394
Sweets and Nuts, and Maybe a Date? . . . . .	395
The Additional Subtraction Games . . . . .	395
Horsefly . . . . .	395
Selective and Subselective Compounds of Impartial Games . . . . .	396
Entailing Moves . . . . .	396
Sunny and Loony Positions . . . . .	397
Calculating with Entailed Values . . . . .	398
Nim with Entailing Moves . . . . .	400
Goldbach's Nim . . . . .	401
Wyt Queens with Trains . . . . .	402
Adding Tails to Prim and Dim . . . . .	404
Complimenting Moves . . . . .	405
On-the-Rails . . . . .	407
De Bono's <i>L</i> -Games . . . . .	408
Proving the Outcome Rules for Loopy Positions . . . . .	408
Fair Shares and Unequal Partners . . . . .	410
Were Your Ways Winning Enough? . . . . .	410
Did You Move First in Horsefly? . . . . .	411
References and Further Reading . . . . .	412
<b>13 Survival in the Lost World</b>	<b>413</b>
Misère Nim . . . . .	413
Reversible Moves . . . . .	415
The Endgame Proviso . . . . .	416
The Awful Truth . . . . .	416
What's Left of the Old Rules? . . . . .	417
As Easy as Two and Two? . . . . .	418
The Misère Form of Grundy's Game . . . . .	419
Animals and Their Genus . . . . .	421
What Can We With the Genus? . . . . .	423
Firm, Fickle and Tame . . . . .	423
Which Animals are Tame... . . . .	424
... and Which are Restive? . . . . .	425
Some Tame Animals in the Good Child's Zoo . . . . .	426
Misère Wyt Queens . . . . .	426

Jelly Beans and Lemon Drops . . . . .	427
Stalking Adders and Taking Squares . . . . .	429
“But What if They’re Wild?” Asks the Bad Child . . . . .	430
Misère Kayles . . . . .	431
The Noah’s Ark Theorem . . . . .	432
The Half-Tame Theorem . . . . .	435
Guiles . . . . .	435
Dividing Rulers . . . . .	436
Dawson, Officers, Grundy . . . . .	438
All Subtraction Games Reduce to Nim . . . . .	442
Prim and Dim . . . . .	442
Proof of the Noah’s Ark Theorem . . . . .	443
Misère Octal Games . . . . .	444
Notes . . . . .	444
Stop Press: Even More Games are Tameable! . . . . .	446
 Glossary . . . . .	 453
Index . . . . .	455
