ASTRONOMICAL SOCIETY OF THE PACIFIC
CONFERENCE SERIES

Volume 283

A NEW ERA IN COSMOLOGY

Proceedings of a conference held at the
University of Durham, Durham, England
11-15 September 2001

Edited by

Nigel Metcalfe
Department of Physics, University of Durham, Durham, DH1 3LE, UK

and

Tom Shanks
Department of Physics, University of Durham, Durham, DH1 3LE, UK
Contents

Preface xi
Participants xiii
Conference photograph xxiii

Part 1. Survey Astronomy

Studying Structure Formation with the Sloan Digital Sky Survey 3
David H. Weinberg

Studying Large-scale Structure with the 2dF Galaxy Redshift Survey 19
John A. Peacock

Universal Star-Formation History from 2dF Galaxy Redshift Survey Spectra 39
Karl Glazebrook, Ivan Baldry and the 2dFGRS Team

The 2dF Galaxy Redshift Survey: The Population of Nearby Radio Galaxies at the 1 mJy Level 43
Manuela Magliocchetti and the 2dFGRS team

Dependence of Galaxy Clustering on Luminosity and Spectral Type 47
Peder Norberg and the 2DFGRS Team

Variations in the Bivariate Brightness Distribution with Different Galaxy Types 51
Nicholas Cross, Simon P. Driver, David Lemon and Jochen Liske

Beyond Second-Order Statistics 56
Peter Coles

The SDSS Quasar Survey 60
Donald P. Schneider, Gordon T. Richards, Xiaohui Fan, Michael A. Strauss, James E. Gunn, Patrick B. Hall, Daniel E. Vanden Berk, Donald G. York and the SDSS Collaboration

The 2dF QSO Redshift Survey 72
Brian J. Boyle, Scott M. Croom, Tom Shanks, Phil J. Outram, Robert J. Smith, Lance Miller and Nicola S. Loaring

The QSO Power Spectrum 78
Phil J. Outram, Tom Shanks, Brian J. Boyle, Scott M. Croom, Fiona Hoyle, Nicola S. Loaring, Lance Miller and Robert J. Smith

Statistical Lensing in the 2QZ 82
Adam Myers, Tom Shanks, Phil J. Outram and 2dF QSO Redshift Team

AGN-Galaxy Clustering with the Panoramic Deep Fields 86
Michael J.I. Brown

Studying the LSS Through Weak Gravitational Lensing Maps 90
Antonio C. C. Guimarães

Growing Supermassive Black Holes at the Centre of Galaxies 95
Martin G. Haehnelt
Contents

Different Views of the Evolution of Galaxies and Large Scale Structure 107
   Buell T. Jannuzi
The Evolution of Binary SMBHs Population in Hierarchical Clustering
   Cosmologies ................................. 111
   Marta Volonteri, Francesco Haardt and Piero Madau
Fires: First Results of the MS 1054-03 Field .......................... 115
   Natascha M. Förster Schreiber, Ivo Labbé, Marijn Franx,
   Paul van der Werf, Huub Röttgering, Lottie van Starkenburg,
   Arjen van de Wel, Pieter van Dokkum, Koen Kuijken, Alan Moorwood,
   Hans-Walter Rix and Gregory Rudnick

The Millennium Galaxy Catalogue .............................. 117
   David J. Lemon, Jochen Liske, Simon P. Driver and Nicholas J.G. Cross
The Evolution of Radio Galaxy Emission Line Regions: Breaking the P-z
   Degeneracy .................................... 121
   Katherine J. Inskip, Malcolm S. Longair and Philip N. Best

The Viramos-Vla Radio Survey .................................. 123
   Marco Bondi, Loretta Gregorini, Giampaolo Vettolani, Paola Parma,
   Paolo Ciliegi, Gianni Zamorani, Hans de Ruiter and Olivier Le Fèvre

Large Scale Galaxy Distribution in the SDSS. .................. 125
   Andrei Doroshkevich, Douglas Tucker and Sahar Allam

Quasar Clustering Redshift Distortion Constraints on Dark Energy . 127
   Maurício O. Calvão, João R. T. de Mello Neto and Ioaov Waga

The Large Zenith Telescope Survey: A Deep Survey Using a 6-m Liquid
   Mirror Telescope .................................. 129
   Rémi A. Cabanac, Paul Hickson and Valérie de Lapparent

The Different Clustering of Red and Blue Galaxies: A Robust Signal from
   \( \omega(\theta) \) ....................................... 132
   Rémi A. Cabanac, Valérie de Lapparent, Paul Hickson

Selection Effects in Surface Brightness in Deep Surveys ........ 135
   Luca Angeretti, Lucia Pozzetti and Gianni Zamorani

Part 2. Cosmic Microwave Background & Cosmologies

A New Era in the Cosmic Microwave Background: the CMB in 2002 . 141
   Andrew H. Jaffe

High Redshift Galaxies and the SZ Effect .......................... 154
   Daniel Rosa González, Elena Terlevich, Enrique Gaztañaga,
   Roberto Terlevich and Amancio Friaça

Cosmological Parameter Estimation from CMB and X-ray clusters ... 156
   Marian Douspis, Alain Blanchard, Rachida Sadat and James G. Bartlett

Aspects of Vacuum Energy ..................................... 158
   John C. Jackson
Contents

Are Cosmological $N$-body Simulations Reliable on Scales Below the Mean Separation Length of Particles? ........................................ 160
Takashi Hamana

Baryon Oscillations in the Large Scale Structure ........................................ 162
Asantha Cooray

New Era in Likelihood Analyses of the Local Group Acceleration ........ 164
Michal Chodorowski and Pawel Ciecielag

Part 3. Gravitational Lensing

Lensing Results from the Red-sequence Cluster Survey .......................... 169
Henk Hoekstra, Howard Yee and Mike Gladders

CDM and Strong Lensing: Concord or Conflict? ...................................... 173
Charles R. Keeton

Constraining Galaxy Halo Shapes with Weak Lensing .............................. 177
Tereasa G. Brainerd and Candace Oaxaca Wright

A Hubble Space Telescope Survey of X-ray Luminous Galaxy Clusters: Gravitationally Lensed Arcs and EROs .............................. 181
Graham P. Smith

A Weak Gravitational Lensing Study of Abell 1689 ................................ 186
Lindsay J. King

LENSCLEANing JVAS B0218+357 to Determine $H_0$ ............................ 190
Olaf Wucknitz

Cosmic Shear with Keck: Systematic Effects ......................................... 193
Richard Massey, David Bacon, Alexandre Refregier and Richard Ellis

Evidence for Structure in Cluster Weak Lensing Maps .......................... 195
Phil J. Marshall, Mike P. Hobson, Stephen F. Gull and Sarah L. Bridle

The Lensing System Towards the Quasar SBS1520+530 ............................ 197
Cécile Faure

Part 4. Cluster Cosmology

Cluster Evolution and Constraints on $\Omega_m$ .................................... 201
Piero Rosati and Stefano Borgani

Are Clusters Standard Candles? Using Galaxy Cluster Scaling Relations for Cosmology .............................................................. 214
Licia Verde, Zoltan Haiman and David N. Spergel

Cooling Flows: Rumours of Death Greatly Exaggerated .......................... 218
Alastair C. Edge
Contents

X-ray Clusters of Galaxies at High Redshifts 0.7<z<1  
Laurence R. Jones, Ben J. Maughan, Harald Ebeling, Eric Perlman, 
Chris Frye and Caleb Scharf  
223

Constraints on the $\Omega_M - \Omega_A$-plane from Elliptical Galaxy Counts?  
Simon P. Driver  
227

A Huge Structure at z=0.27 Traced by Radio Sources  
Gary J. Hill, Marcel Bergmann, Joseph R. Tufts, Katherine Brand, 
Steve Rawlings and Mark Lacy  
231

A Large Scale Structure Surrounding a z = 0.4 Cluster Traced by 
SUBARU  
Taddy Kodama, Ian Smail, Fumiaki Nakata, Sadanori Okamura and 
Richard G. Bower  
235

On the Merit of Observations Beyond the Cluster Core  
Kevin A. Pimbblet  
240

The $L_X - T$ Relations for Groups and Clusters  
Li Chen, Shu-Mei Jia, Xiao-Feng Wang and Zong-Wei Li  
242

Searching for Clusters of Galaxies with SUMSS  
Helen J. Buttery, Garret Cotter, Richard W. Hunstead and 
Elaine M. Sadler  
245

Part 5. Standard Candle Cosmology

The Status of the Hubble Constant  
Wendy L. Freedman  
249

Cepheids, Supernovae, $H_0$, and the Age of the Universe  
Gustav A. Tammann, Bernd Reindl, Frank Thim, Abhijit Saha and 
Allan Sandage  
258

Cepheid, Tully-Fisher and SN1a Distances.  
Tom Shanks, Paul D. Allen, Fiona Hoyle and Nial R. Tanvir  
274

Testing the Supernova, Cepheid, and Early-type Galaxy Distance Scales  
John P. Blakeslee  
280

A Robust Method for Measuring the Hubble Constant  
Martin A. Hendry  
285

Supernovae in Deep Hubble Space Telescope Galaxy Cluster Fields: 
Cluster Rates and Field Counts  
Avishay Gal-Yam, Dan Maoz and Keren Sharon  
289

Types of Type Ia Supernovae at Low and High Redshift  
Peter Meikle  
293

A Possible Revision of Current Cosmological Constraints from 
Type Ia Supernovae  
Xiao-Feng Wang, Li Chen and Zong-Wei Li  
301
