Functionally Graded Materials VII

Proceedings of the Seventh International Symposium on Functionally Graded Materials (FGM2002), Beijing, China, October 15-18, 2002

Edited by

Wei Pan (Tsinghua University, China)

Jianghong Gong (Tsinghua University, China)

Lianmeng Zhang (Wuhan University of Technology, China)

Lidong Chen (Shanghai Institute of Ceramics, China)

TRANS TECH PUBLICATIONS LTD
Switzerland • Germany • UK • USA
# Table of Contents

**Committees** ................................................................. v

**Preface** ........................................................................ vii

**The Activities of FGM on New Application**
S. Uemura ............................................................................. 1

**New Progress of Metal-Based Functionally Graded Plasma-Facing Materials in China**
C.-C. Ge, Z.-J. Zhou and Y.-H. Ling .......................................................... 11

**Industrial Applications of FGM Solutions**
M.M. Gasik ............................................................................... 17

**Design and Fabrication of Symmetric FGM Plates**
M.M. Gasik, B.-S. Zhang, O. Van der Biest, J. Vleugels, G. Anné and S. Put .............................................. 23

**Design and Densification of W-Mo Functionally Graded Materials with Smooth Changes of Composition by Co-Sedimentation**
Z. Yang, D. Gong and L. Zhang ............................................................... 29

**Functionally Graded Hardmetals with a Continuously Graded Symmetrical Profile**
S. Put, J. Vleugels, G. Anné and O. Van der Biest ........................................... 33

**Large-Size-WC/Co Functionally Graded Materials Fabricated by Spark Plasma Sintering (SPS) Method**
M. Tokita ................................................................................ 39

**Fabrication of WC-Co Cemented Carbides with Gradient Distribution of WC Grain Size and Co Composition by Tape Casting**
J. Cheng, Y. Wu and Y. Xia ................................................................... 45

**Design and Thermal Shock Performance of W/Cu Functionally Graded Material used as Plasma Facing Component**
Y. Ling, X. Bai and C. Ge ................................................................. 49

**Fabrication and Properties of Axisymmetric WC/Co Functionally Graded Hard Metal via Microwave Sintering**
W. Lin, X. Bai, Y. Ling, Z. Jiang and Z. Xie ....................................................... 55

**The Anisotropy of Nanocomposite Nd$_{0.5}$Fe$_{84.5}$Nb$_{0.5}$B$_{0.5}$Melt Spun Ribbons**

**Gradient Ni-Cr-Mo-Nb Surface Alloying Layer**
X. Zhang, X. Xie and Z. Xu .................................................................. 63

**Study on the Arc-Added Glow Discharge Plasma Non-Hydrogen Carburizing on Titanium Alloy Surfaces**
F. Chen and J. Pan ........................................................................ 69

**Functionally Graded Boron Carbide-Aluminum Composites**
F. Zhang, K.P. Trumble and K.J. Bowman .................................................. 73

**Preparation of Flier-Plate Materials with Graded Impedance Used for Hypervelocity Launching**
C.B. Wang, L.M. Zhang, Q. Shen, H. Tan and J.S. Hua ........................................ 77
Oxidation Resistance of TiAl-Inconel625 Graded Alloying Layer
C.L. Zheng, F.Z. Cui, Q.L. Feng, Z. Xu, X.S. Xie and Z.Y. He .................................................. 81

Thermal Shock Resistance and Ablation Behaviour of Titanium Diboride-Copper-Nickel FGM via SHS
Q. Xu, X. Zhang, J. Han, X. He and V.L. Kvalin ................................................................. 85

Friction and Wear Properties of Functionally Graded Aluminum Matrix Composites

Characterization of Interface between Particles in Al Powder Compacts by Pulse Electric Current Sintering
G. Xie, O. Ohashi, N. Yamaguchi, M. Song, K. Furuya and T. Noda ..................................... 97

Formation of Niobium Aluminide Layers on Niobium Plate by Arc Surface Alloying
K. Matsuura, T. Koyanagi, M. Kudoh and Y. Miyamoto ...................................................... 103

Development of Shape Memory Alloy Fiber Reinforced Smart FGMs
E. Miyazaki and Y. Watanabe ..................................................................................................... 107

Improvement of Diffusion Bonding Joint by Ar Ion Bombardment
A. Wang, O. Ohashi, M. Aoki and N. Yamaguchi ............................................................... 113

Graded Machinable Ceramics: Concept and Practice
P. Wei, W. Ruigang, F. Minghao, C. Jian and C. Zhenzhu .................................................... 119

Graded Ceramics for Improved Contact-Damage Resistance
N.P. Padture ............................................................................................................................... 125

Surface Modification Technique of Structural Ceramics: Ion Implantation-Assisted Multi-Arc Ion Plating
Z. Peng, H. Miao, W. Si, L. Qi and W. Li .................................................................................. 131

Hardness and Tribological Properties of Silicon Nitride Ceramics Implanted by Titanium Ions with MEVVA Sources
H. Miao, Z. Peng, W. Si, L. Qi and W. Li .............................................................................. 137

Preparation of Core-Shell Type Particles by Injection Method
Q. Li, Y. Chen, H. Nakamura and P. Dong ............................................................................. 143

Hydrolysis Mechanism and Method to Improve Water Resistance of Long-After-Glow Phosphor
J. Zhang, Z. Zhang, Z. Tang and T. Wang .............................................................................. 147

Mechanism of Forming the Nanocrystalline Mg,Al-Hydrrotalcite and Its Crystal Processing under Hydrothermal Conditions
Q. Ren, Q. Luo, D. Liu and S. Chen ....................................................................................... 151

Effect of Si4+ Doping on the Thermal Property and Thermal Decomposition Mechanism of Nanocrystalline Mg,Al-Hydrrotalcite
Q. Ren, Q. Luo, D. Liu and S. Chen ...................................................................................... 157

Modification of Photophysical Properties of WO3 by Doping Different Metals
J. Tang, D. Wang, Z. Zou and J. Ye ....................................................................................... 163

Characterization of Plasma Facing SiC/C Functionally Graded Material
A.-H. Wu, W.-B. Cao, C.-C. Ge, J.-F. Li and A. Kawasaki ..................................................... 167

Preparation of Graded-Index Polymer Optical Fiber Preform
W. Ding, C. Xu and S. Wang ............................................................... 505

Structure Study of Polymer Gradient Materials
B. Wen, Q. Li, S. Hou and G. Wu ................................................... 509

Rheological Properties of Polyacrylate Thickening Agent by Model Experiments
J. Wang, F. Zhang, L. Fan, S. Yu and D. Liu ..................................... 515
Factors of Refractive Index Distribution of GI POF Perform
W. Ding, C. Xu and S. Wang ............................................. 519

The Influence of Bond Coat and Oxide Layer on the Debonding of Graded Coatings
F. Erdogan and T.-C. Chiu ............................................. 523

Formation Kinetics and Properties of CrNx/H13 Functionally Graded Coating
Fabricated by PVD

Preparation of Functionally Graded Coating on AlN Surface by Molten Salt Reaction
J. Li, P. Wei, D. Xie, J. Chen and W. Fu ..................................... 535

Behavior of Ti Coating in CBN/Ti/Vitrified Bond Gradient Materials
Y. Zhu, Z. Li and X. Wu .................................................... 539

TiN Coating Deposited by ARC Method
S. Wang, S.-H. Li and H.-M. Tan ........................................... 543

Al2O3-Al2Cu3 Coating Produced by SHS Reactive Spraying

Thermal Shock Resistance of Ceramic/Metal Gradient Thermal Barrier Coating
J. Xiao, J. Liu, W. Zhao and W. Fu ............................................... 551

Analysis and Measurement of Thermal Residual Stresses in Ceramic/Metal Gradient Thermal Barrier Coatings
J. Xiao, C. Liu, W. Zhao and W. Fu ............................................. 555

Study on Plasma-Carburization Process of Ni-Base Self Fluxing Alloy Coating
H. Han, H. Kitagawa, Y. Noda, K. Arakawa and N. Kanayama .................... 561

The Fabrication and Characteristics of Sr1-xBaxBi4Ti4O15 Functionally Graded Thin Films by Sol-Gel Method
D. Xie, W. Pan and J. Li .............................................................. 565

Synthesis of Nanocrystalline Magnetite (Fe3O4) Films by Self-Reduction Sol-Gel Route
Q. Wang, J. Shi, L. Chen and D. Yan ........................................... 569

A New Application of Pulsed Laser Deposition to Produce Functional Graded Material Thin Films

Investigation of Al2O3 Coating with FGMs Structure by SHS
Z. Lingzhen, S. Suilin and H. Hongjun ........................................ 577

Preparation and Optical Properties of Strontium-Barium-Bismuth Titanate Graded Thin Films
D. Xie, W. Pan and L. Hou .......................................................... 579

Tetrahedral Amorphous Carbon Films Prepared by Filtered Catholic Vacuum Arc Deposition
X. Zhang, X. Wu, H. Zhang and T. Zhang ........................................ 585

Fabrication of the Volatile Corrosion Film with FGMs Structure
H. Hongjun, W. Hongjing, L. Zhiguang and Z. Min .................................. 591
The Strength of Functionally Graded Joints: Crack Paths and Residual Stress for Cracks Perpendicular to the Gradient  
I. Reimanis and J. Chapa ................................................................. 593

Development of Functionally Gradient Materials  
M. Zhang, H. Huang, H. Wang and Z. Li ........................................... 599

An Interface Crack between a Functionally Graded Coating and a Homogeneous Substrate under Thermo-Mechanical Loading  
S. El-Borgi, F. Erdogan and F.B. Hatira ........................................... 601

Two-Cracks Propagation Problem in a Functionally Graded Material Plate under Thermal Loads  
N. Noda, M. Ishihara, N. Yamamoto and T. Fujimoto ........................... 607

Energy Release Rate of Functionally Graded Materials with Interface Edge-Cracks under Uniform Temperature Change  
P.-C. Zhai, T. Hashida and Q.-J. Zhang ............................................. 613

Fractal Discrimination of Toughness/Fragileness on In-Situ FGM of Aluminum Base by Centrifugal Casting  
Z. Xu .................................................................................................. 619

Analysis of a Model III Crack in a Functionally Gradient Piezoelectric Material  
Z. Zhong, D.W. Shu and B. Jin ............................................................ 623

Estimate of Crack Speed in Functionally Graded Material Based on T* Crack  
M. Nakagaki, H. Chang and K. Yamazaki ............................................ 629

Surface Cracking of Functionally Graded Materials with Arbitrarily Distributed Properties  
B.L. Wang, Y.-W. Mai, X.H. Zhang and J.C. Han .................................. 635

Impact Characteristic Analysis of Ceramic/Metal FGM  
L.-S. Liu, Q.-J. Zhang, P.-C. Zhai and C.-C. Zhu .................................. 641

Dynamic Fracture of a Functionally Graded Coating  
G.Y. Huang and Y.-S. Wang .............................................................. 645

Cohesive Model for Thin Graded Film/Substrate Interfacial Cleavage Fracture  
R. Li and S. Yu .................................................................................... 651

FEM Simulations and Optimization about Residual Stresses in Coating Structures with Functionally Graded Materials Layer  
C. Huang, S. Chen and Z. Duan .......................................................... 659

Transient and Residual Stresses in a Hollow Cylinder of Functionally Graded Materials  
C. Chen and H. Awaji ................................................................. 665

Heat Transfer and Thermal Stress Analysis of Ceramic/Metal Gradient Cylinder Model  
J. Xiao, F. Qin, J. Liu and Z. Zhan ...................................................... 671

Finite Element Analysis of Thermal Residual Stress in Ceramic Functional Graded Material: Interface Optimization for Residual Reduction  
L. Hou, W. Pan, R. Wang and D. Xie ............................................... 677

Thermal Elastic-Plastic Limit Analysis and Optimal Design for Composite Cylinders of Ceramic/Metal Functionally Graded Materials  
J. Huang, Y. Lu and C. Shen ............................................................ 681
Computational Micromechanics Analysis of the Functionally Graded Materials under Thermal Shock Loading
S. Yang, Q. Zhang and P. Zhai ................................................. 687

Stress Analysis in Multilayered FGM Plates under Thermal Shock
G. Jin, T. Nishikawa, S. Honda and H. Awaji .................................. 693

Thermal Stress Research on the Functionally Gradient Material
S. Li, S. Wang, J. Chen and R. Yang ........................................... 699

Analysis of Gradient Forming Design for FGM of Axisymmetrical Geometries with Thermal Stress Relaxation
Z. Xu ....................................................................................... 703

Development and Experimental Validation of a Numerical Thermal Model for the Evaluation of the Depth of Laser Treated Zone in the Laser Transformation Hardening Process
N. Cheung, M.A. Pinto, M.C.F. Lerardi and A. Garcia .................................. 707

Optimization of Material Composition of FGM Coating under Thermal Loading by Micro Genetic Algorithms
G. Chen, P.-C. Zhai and Q.-J. Zhang .............................................. 713

Axisymmetric Post-Buckling of a Functionally Graded Circular Plate Subjected to Uniformly Distributed Radial Compression
L.S. Ma and T.J. Wang ............................................................... 719

Using the Adjoint Equation Method to Optimize FGM Thermoelastic Structures
D. Boussaa and L. Jaballah .......................................................... 725

Elastic and Plastic Analyses of Functionally Graded Elements
L. Ma, X.-Q. Feng, K.-W. Gao and S.-W. Yu ...................................... 731

Assessment on Anisotropic Properties of Particle-Dispersed Composites with Debonded Interface
