Selected Proceedings of the 3rd World Water Congress of the International Water Association, held in Melbourne, Australia, 7–12 April 2002

Issue Editors: IWA Programme Committee
Contents

Nutrient removal

1 The competition between PAOs (phosphorus accumulating organisms) and GAOs (glycogen accumulating organisms) in EBPR (enhanced biological phosphorus removal) systems at different temperatures and the effects on system performance  U.G. Erdal, Z.K. Erdal and C.W. Randall

9 Evaluation of influent prefermentation as a unit process upon biological nutrient removal  T. McCue, R. Shah, I. Vassilev, Y.-H. Liu, F.G. Eremektar, Y. Chen, A. A. Randall

17 Anoxic phosphorus removal by denitrifying heterotrophic bacteria  N. Lacko, G.D. Drysdale and F. Bux

31 The ScanDeNi® process could turn an existing under-performing activated sludge plant into an asset  B. Rosen and C. Huijbregtsen

37 The effect of GAOs (glycogen accumulating organisms) on anaerobic carbon requirements in full-scale Australian EBPR (enhanced biological phosphorus removal) plants  A.M. Saunders, A. Oehmen, L.L. Blackall, Z. Yuan and J. Keller

45 Nitrification of high strength ammonia wastewater and nitrite accumulation characteristics  D.J. Kim, J.S. Chang, D.I. Lee, D.W. Han, I.K. Yoo, G.C. Cha

53 Enhanced nitrogen removal in SBRs bypassing nitrate generation accomplished by multiple aerobic/anoxic phase pairs  A.N. Katsogiannis, M. Kornaros and G. Lyberatos

61 Induction of denitrification in a pilot-scale trickling filter by adding nitrate at high loading rate  H. Vanhooren, D. De Pauw and P.A. Vanrolleghem

69 Fuzzy-control for improved nitrogen removal and energy saving in WWT-plants with pre-denitrification  U. Meyer and H. J. Pöpel

77 Use of pH as fuzzy control parameter for nitrification under different alkalinity in SBR process  Y.-Z. Peng, J.-F. Gao, S.-Y. Wang and M.-H. Sui

85 Nitrification preservation in activated sludge during curative bulking chlorination  E. Cotteux and P. Duchene

93 Partial nitrification in a high-load activated sludge system by biofilter backwash water recirculation  Z. Melicz

101 Nutrient removal from wastewaters using high performance materials  I.D.R. Mackinnon, K. Barr, E. Miller, S. Hunter and T. Pinel

109 Controlling nitrogen removal using redox and ammonium sensors  D. Cecil

115 Design of nutrient removal activated sludge systems  J. Manga, J. Ferrer, A. Seco and F. Garcia-Usach

123 A thermal adaptation of bacteria to cold temperatures in an enhanced biological phosphorus removal system  U.G. Erdal, Z.K. Erdal and C.W. Randall

129 Nitrification in biofilters under variable load and low temperature  J.-P. Canler, J.-M. Perret, F. Lengrand and A. Iwema

137 Adaptive control of the nitrate level in an activated sludge process  M. Ekman, P. Samuelsson and B. Carlsson

145 Fenton's reagent and coagulation-floculation as pretreatments of combined wastewater for reuse  A. Durán Moreno, E. González Lorenzo, J. Malpica De La Torre, C. Durán De Bazúa and R.M. Ramirez Zamora
Nitrification and denitrification using a single biofilter packed with granular sulfur  
J.-S. Kim, Y.-W. Hwang, C.-G. Kim and J.-H. Bae

Phased upgrading for nitrogen removal - a low cost approach  
D. Solley and M. Armstrong

Molecular biological methods (DGGE) as a tool to investigate nitrification inhibition in wastewater treatment  
N. Kreuzinger, A. Farnleitner, G. Wandl, R. Hornek and R. Mach

Pre-nitrification by encapsulated nitrifiers - a possibility for self-sufficient energy operation of domestic WWTPs  
M. Sievers, K.D. Vorlop, J. Hahne, M. Schlieker and S. Schäfer

Nitrogen removal in industrial wastewater by nitration and denitration - 3 years of experience  
P. Degn Pedersen, K. Jensen, P. Lyngsie and N. Henrik Johansen

Biofilm processes

Development of a two-stage flexible fibre biofilm reactor for treatment of food processing wastewater  
Q.J. Yu, H. Xu, D. Yao and P. Williams

Bacteria reduction and nutrient removal in small wastewater treatment plants by an algal biofilm  
G. Schumacher, T. Blume and I. Sekoulov

Activated sludge

The effect of low sludge age on wastewater fractionation ($S_f$, $S_l$)  
S. Haider, K. Svardal, P.A. Vanrolleghem and H. Kroiss

Efficiency of the Activated Sludge Model no. 3 for German wastewater on six different WWTPs  
M. Wichern, M. Lübben, R. Blömer and K.-H. Rosenwinkel

Modification of Activated Sludge Model no. 3 considering direct growth on primary substrates  
Ö. Karahan-Gül, M.C.M. van Loosdrecht and D. Orhon

Polyhydroxyalkanoate form and polyphosphate regulation: keys to biological phosphorus and glycogen transformations?  
A.A. Randall, Y. Chen, Y.-H. Liu and T. McCue

The effect of organic loading rate on the aerobic granulation: the development of shear force theory  

Elevated precursor 16S rRNA levels suggest the presence of growth inhibitors in wastewater  
P.G. Stroot and D.B. Oerther

Modelling the effect of shear history on activated sludge flocculation  
C. Biggs, P. Lant and M. Hounslo

Improving titrimetric techniques by modelling pH change in activated sludge systems  
S. Pratt, Z. Yuan and J. Keller

Structure-function dynamics and modeling analysis of the micro-environment of activated sludge floc  
B. Li and P. Bishop

Dimensional analysis for establishing the testing criteria of kinetic study with respirometry  
Y.-S. Wu, C.-F. Chiang and C.-J. Lu

Effect of nitrite and nitrate on biogenic sulfide production in sewer biofilms determined by the use of microelectrodes  
S. Okabe, T. Ito, H. Satoh and Y. Watanabe

Non-filamentous sludge bulking caused by a deficiency of nitrogen in industrial wastewater treatments  
Y. Peng, C. Gao, S. Wang, M. Ozaki and A. Takigawa

Aeration in wastewater treatment plants

Oxygen transfer into activated sludge with high MLSS concentrations  
J. Krampe and K. Krauth

Optimum aerobic volume control based on continuous in-line oxygen uptake monitoring  
K. Svardal, S. Lindtner and S. Winkler

Investigation of oxygen transfer rates in full scale membrane bioreactors  
P. Cornel, M. Wagner and S. Krause
