Luke Adams, Steven Cheshire, Lesley Collett, Erica Hemming, Paul Hughes, Sarah Lucas, Karen Nichols,
Peter Lorimer, Rosalyn Smith and Sam Whitby

Oxford Archaeology
Thames Valley Landscapes Monograph No. 17
2003
Contents

List of Figures ................................................................. vii
List of Plates ................................................................. xi
List of Tables ................................................................. xiii
Summary ................................................................................... xv
Acknowledgements .................................................................. xvii
Location of project archives ...................................................... xviii

CHAPTER 1: INTRODUCTION by Anne Dodd ........................................... 01
The city of Oxford .................................................................. 01
The development of archaeology at Oxford ................................. 01
Documentary sources, archaeological and historical societies .......... 01
Early excavations .................................................................... 04
The Oxenford ....................................................................... 05
The contents and structure of this monograph ............................... 05

CHAPTER 2: SYNTHESIS AND DISCUSSION by Anne Dodd ................. 07
Oxford before the burh .......................................................... 07
Neolithic and Bronze Age ....................................................... 07
A prehistoric ford at Oxford? by David R P Wilkinson ..................... 10
The Iron Age ....................................................................... 10
Roman ............................................................................... 11
Early Saxon ........................................................................ 12
An early Saxon crossing at Oxford? ............................................. 12
The mid Saxon period ............................................................ 13
The river crossing .................................................................. 13
Other mid Saxon evidence ....................................................... 16
St Frideswide's minster ............................................................ 17
Mid Saxon Oxford: conclusions ................................................ 19
The late Saxon town .............................................................. 19
The defences ........................................................................ 21
The eastern extension by Julian Munby ........................................ 24
Gates ............................................................................... 25
The street grid ..................................................................... 26
The burh interior: the form of the earliest occupation ....................... 29
The date and context of the burh's foundation ............................... 31
The Thames Crossing from the foundation of the burh to the Norman Conquest .................................................. 32
Life in the developing late Saxon town ....................................... 35
Buildings and street frontages: conclusions .................................. 40
Churches ........................................................................... 41
Suburbs ............................................................................. 41
Crafts, industries and trade ....................................................... 42
Diet, natural resources and the environment .................................. 44
Norman Oxford: the aftermath of the Conquest in the later 11th century ................................................................. 46
The castle and the defences ....................................................... 46
Oxford in Domesday Book by Julian Munby .................................. 50
Occupation in the town: 'waste' and continuity .............................. 51
Revival under the Normans: the later 11th and 12th centuries ........ 53
The Thames Crossing ............................................................. 53
Revival from the later 11th century: the mid-road drain .................... 56
Churches and religious houses in Norman Oxford ......................... 56
The King's Houses .................................................................. 59
Oxford in the 12th century: the development of the town and its suburbs ................................................................. 59
12th- and 13th-century houses by Julian Munby ............................ 60
Suburbs ............................................................................. 61
Crafts and industry in the 12th-century town .............................................. 62
From town to university ................................................................. 63

CHAPTER 3: THE ‘OXENFORD’: DETAILED STUDIES OF THE THAMES CROSING IN ST ALDATES by Mark Robinson and David R P Wilkinson .................................................. 65
Summary.................................................................................. 65
Introduction ........................................................................... 65
The development of the Thames Crossing study area.......................... 67
An idealised cross-section of the study area by Mark Robinson, David R P Wilkinson and Paul Hughes .................................................... 67
The palaeohydrology of the St Aldates area of Oxford in relation to archaeology and the Thames Crossing by Mark Robinson .......................................................... 69
A review of documentary sources for the south suburb by Julian Munby .......................................................... 82
Excavation reports .................................................................. 87
Excavations at 89–91 St Aldates (the Trill Mill Stream), 1982–5 by David R P Wilkinson ........................................ 87
Excavations at 24–26 St Aldates (St Aldate’s Police Station), 1987–9 by David R P Wilkinson .............. 103
Excavations at 30–31 St Aldates (Land adjoining the Police Station), 1987 by David R P Wilkinson 108
Excavations at 56–60 St Aldates, 1988–9 by David R P Wilkinson .................................................. 112
A Watching Brief on the British Telecom Tunnel, at the junction of Thames St and St Aldates, 1991 by Gregory Campbell .................................................. 118
Excavations at 42–43 St Aldate’s (the Head of the River), 1994 by Paul Booth ........................................... 127

CHAPTER 4: THE DEFENCES: DETAILED STUDIES OF SITES ON THE DEFENCES OF LATE SAXON AND MEDIEVAL OXFORD by Julian Munby and David R P Wilkinson .................................................. 135
Summary.................................................................................. 135
Introduction ........................................................................... 135
The development of study of the defences by Julian Munby .......................... 135
Historical sources by Julian Munby .................................................. 139
Excavation and building survey reports .................................................. 140
Excavations at 24A St Michael’s St, 1985 by David R P Wilkinson .................................................. 140
St Michael at the Northgate Tower Survey, 1985–6 by Brian Durham, Julian Munby, John Blair and Anne Dodd .................................................. 152
Excavations, survey and watching brief at the ‘Oxford Story’, Broad St (Bastion 4), 1986 by David R P Wilkinson .................................................. 164
Excavations on the line of the City Wall in the Clarendon Quadrangle, 1899 by Julian Munby .................................................. 172
Excavations on the line of the City Wall at New College, 1993 by Paul Booth .................................................. 183
Excavation and survey at Bastion 21, Corpus Christi College, 1981 by David R P Wilkinson .................................................. 186

CHAPTER 5: THE TOWN: DETAILED STUDIES OF SITES WITHIN THE LATE SAXON AND MEDIEVAL TOWN edited by Anne Dodd .................................................. 201
Summary.................................................................................. 201
Background to the excavations and research objectives ..................... 201
Excavation reports .................................................................. 204
Introduction ........................................................................... 204
Excavations at All Saints Church 1973–4 ........................................ 204
Excavations at four sites on the frontage of Queen Street ................. 242
Excavations at No. 4 Queen St, 1986 ........................................... 245
Excavations at Nos 7–8 Queen St, 1985 ........................................ 247
Excavations at Nos 33–35 Queen St, 1988 ........................................ 254
Excavations at Nos 43–44 Queen St, 1989 ........................................ 254
Discussion .................................................................................. 256
Observations of the early streets: surfaces and drains ....................... 258
Early street surfaces .................................................................. 258
The medieval mid-road drain or kennel ........................................... 264

CHAPTER 6: FINDS ........................................................................ 271
Finds from the Thames Crossing sites .................................................. 271
Finds from the excavations at 89–91 St Aldate’s by Leigh Allen and Brian Durham .................................................. 271
## Contents

Finds from the excavations at 24–26 St Aldate’s, 30–31 St Aldate’s and 56–60 St Aldate’s  
by Leigh Allen and Brian Durham ............................................ 276

Finds from the British Telecom Tunnel by Catherine Underwood-Keevil............. 284

Pottery from the Thames Crossing sites ........................................ 288

Pottery from the excavations at 89–91 St Aldate’s by Maureen Mellor ............ 288

Pottery from the excavations at 56–60 St Aldate’s, 30–31 St Aldate’s and 24–26 St Aldate’s  
by Catherine Underwood-Keevil ............................................. 296

Pottery from the British Telecom Tunnel by Catherine Underwood-Keevil ........ 301

Pottery from the Head of the River by Lucy Whittingham .......................... 302

Catalogue of illustrated sherds (89–91 St Aldate’s, 56–60 St Aldate’s, 30–31 St Aldate’s,  
24–26 St Aldate’s) .................................................................. 303

The defences: finds from 24A St Michael’s St and Corpus Christi Bastion 21  
by Leigh Allen .................................................................. 304

Building stone from St Michael at the Northgate by Philip Powell ............... 305

Mortar from 24A St Michael’s St by Peter McKeague .................................. 307

The ceramic finds from sites on the defences by Maureen Mellor ................. 307

Pottery from 24A St Michael’s St ..................................................... 307

Pottery from the ‘Oxford Story’, Broad St ........................................... 310

Pottery from Bastion 21, Corpus Christi College ......................................... 310

Pottery from Pembroke College New Library, 1973 ...................................... 311

The town: finds from All Saints Church, 4 Queen St, 7–8 Queen St, 33–35 Queen St  
and the High St Surface Water Drain by Leigh Allen and Brian Durham .... 311

The Saxon and medieval ceramic finds from the town sites by Maureen Mellor .... 326

Pottery from 4 Queen St ................................................................ 326

Pottery from 7–8 Queen St ................................................................ 326

Pottery from 33–35 Queen St ............................................................ 335

Pottery from 43–44 Queen St ............................................................ 336

Pottery from excavations at All Saints Church 1973–4 .................................. 336

Pottery from the High St Surface Water Drain ........................................... 339

Discussion: the pottery used at the town sites ........................................... 340

Catalogue of illustrated sherds (7–8 Queen St, 4 Queen St, All Saints Church) .... 343

Late Saxon pottery at Oxford: conclusions by Maureen Mellor ...................... 345

### CHAPTER 7: THE ENVIRONMENTAL REMAINS ........................................ 347

Animal bone reports ........................................................................ 347

Introduction by Bob Wilson ............................................................. 347

Animal bones from the Trill Mill Stream by Bob Wilson ............................ 347

The faunal remains from 56–60 St Aldate’s, 30–31 St Aldate’s (Land adjoining  
the Police Station) and 24–26 St Aldate’s (the Police Station) by Miranda Armour-Chelu ...... 347

Bones from the rampart at 24A St Michael’s St by Bob Wilson ..................... 359

Animal bones and marine shells from late Saxon levels at All Saints Church  
by Bob Wilson with †Don Bramwell .................................................. 359

The bird bones from late Saxon deposits at All Saints by †Don Bramwell ...... 361

Animal bones from 7–8 Queen St by Bob Wilson with Alison Locker ............... 361

Animal bones from the High St Surface Water Drain by Bob Wilson ............. 362

Mapping the household activity of early Oxford; the spread of domestic and other bone refuse  
by Bob Wilson ........................................................................ 362

Environmental reports ..................................................................... 365

Environmental investigations of the Trill Mill Stream by Mark Robinson .......... 365

The pollen from 89–91 St Aldate’s (the Trill Mill Stream) by James Greig ........ 373

Environmental investigations at the Thames Crossing: 56–60 St Aldate’s, 24–26 St Aldate’s  
(the Police Station) and 30–31 St Aldate’s (Land adjoining the Police Station)  
by Mark Robinson ........................................................................ 374

Environmental investigations at the British Telecom Tunnel by Mark Robinson .... 378

Pedological analysis of a sample of blue/grey clay 112 from the British Telecom Tunnel  
by Richard I Macphail .................................................................. 383

Environmental evidence from 42–43 St Aldate’s, the Head of the River by Mark Robinson .... 384

Environmental evidence from 24A St Michael’s Street by Mark Robinson .......... 387

Environmental evidence from All Saints Church by Mark Robinson ............... 388

Biological remains from the High St Surface Water Drain by Mark Robinson ...... 389

Tree-ring analysis of timbers from the Thames Crossing sites by Jennifer Hillam and Dan Miles ...... 390
