# Contents

### Preface xi

1 Nonlinear Systems and Classical IST 1
   1.1 Introduction 1
   1.2 Definition of Integrability 2
   1.3 Lax Pair Technique 4
   1.4 Inverse Scattering Transform 5
   1.5 Hamiltonian Structure 10

2 Coordinate Bethe Ansatz 15
   2.1 Introduction 15
   2.2 Nonlinear Systems and the CBA 18
   2.3 Fermionic System 26
   2.4 Boundary Condition in the Bethe Ansatz 33
      2.4.1 Semi-infinite axis 35
   2.5 Heisenberg Spin Chain 37
   2.6 Spin of the Bethe Ansatz State 42
   2.7 Other Integrable Models 43
      2.7.1 Supersymmetric NLS equation 44
      2.7.2 Three-wave interaction problem 47

3 Yang-Baxter Equation 51
   3.1 Introduction 51
   3.2 General Description 51
   3.3 Factorized Scattering 57
   3.4 Baxter’s Star-Triangle Relation 68
   3.5 Vertex Models 74
   3.6 Reflection Equation Algebra 83

4 Continuous Integrable Systems 97
   4.1 Introduction 97
   4.2 Quantum Continuous Integrable Systems 97
      4.2.1 Nonlinear Schrödinger model 98
### 7.8 SoV and Boundary Conditions
- **7.8.1 Periodic Toda lattice**
- **7.8.2 Nonperiodic case**
- **7.8.3 Quantum determinant**

### 8 Backlund Transformations
- **8.1 Introduction**
- **8.2 Permutability Theorem**
- **8.3 Backlund Transformations and Classical Inverse Scattering**
- **8.4 Backlund Transformations from the Riccati Equation**
- **8.5 Darboux-Bäcklund Transformations**
- **8.6 The Exponential Lattice**
- **8.7 Canonical Transformations**
- **8.8 Group Property of Bäcklund Transformations**
- **8.9 Recent Developments in the Bäcklund Transformation Theory**
  - **8.9.1 Spectrality**
  - **8.9.2 Properties of the $Q$ operator**
  - **8.9.3 Application of spectrality to the separation of variables**
- **8.10 Sklyanin's Formalism for Canonical Bäcklund Transformations**
- **8.11 Extended-Phase Space Method**
- **8.12 Quantization of Bäcklund Transformations**
  - **8.12.1 Analytical properties of the $Q$ operator**
- **8.13 Method of Projection Operators**

### 9 Quantum GLM Equation
- **9.1 Introduction**
- **9.2 Quantum GLM Equation**
- **9.3 Quantum Floquet Function**
- **9.4 Exact Quantization**
- **9.5 Quantum GLM Equation in a Continuous System**
  - **9.5.1 Quantum GLM equation**
- **9.6 Bound States and an Alternative Approach**

### A Direct Product Calculus

### B Grassman Algebra
