PART I. INTELLIGENCE IN THE UNITED STATES: AN INTRODUCTION

Introduction .............................................. 1

1. The Evolution of the U.S. Intelligence Community—An Historical Overview ............................... 5
   Aspin-Brown Commission
   Written by Commission staff member Phyllis Provost McNeil, this history of the U.S. intelligence community traces how today’s intelligence institutions, while shaped by the Cold War, are based on an American tradition of supporting foreign and defense policy with clandestinely acquired information.

2. The Quaintness of the U.S. Intelligence Community: Its Origin, Theory, and Problems .................. 21
   Thomas F. Troy
   This overview of the evolution of the U.S. intelligence “community,” offers some insights into why it is so difficult to get various intelligence agencies to set aside their own agendas and work toward improving the overall intelligence picture available to policymakers.

3. The Use and Limits of U.S. Intelligence .......................................................... 33
   Frank J. Cilluffo, Ronald A. Marks, and George C. Salmoiraghi
   This discussion of the “new terrorism” explains why the intelligence community was not well prepared to meet the new threat, exemplified by the September 11 terrorist attacks.

PART II. INTELLIGENCE COLLECTION

Introduction .............................................. 41

4. CIA and Its Discontents .................................................. 48
   Patrick R. Riley
   A former Directorate of Operations case officer explores whether the CIA can cope with all the intelligence requirements placed on it since the end of the Cold War and calls for a more discriminating list of targets for intelligence collection.

5. Re-examining Problems and Prospects in U.S. Imagery Intelligence ........................................ 56
   John M. Diamond
   A perennial problem of intelligence collection is how to acquire useful knowledge from the glut of information gathered by spy machines and human agents. This article fo-
cuses on how to cope with the flood of photographs (or images) that pour back to the United States from surveillance satellites.

6. The Satellite Gap

Jeffrey T. Richelson

A researcher in the National Security Archives in Washington, D.C., Richelson warns of an impending gap in U.S. surveillance satellite coverage, as one generation of "birds" begins to wear out and fall to earth without another generation ready to replace them in space.

7. The Time of Troubles: The U.S. National Security Agency in the Twenty-First Century

Matthew M. Aid

America's largest intelligence organization, the National Security Agency, is beset with a variety of bureaucratic problems according to this expert on signals intelligence, who recommends improvements in management and outreach, as well as technological remedies.

PART III. INTELLIGENCE ANALYSIS

Introduction

8. Analysis, War, and Decision: Why Intelligence Failures Are Inevitable

Richard K. Betts

This history of diplomatic and military affairs is riddled with instances when intelligence analysts failed to provide timely warning of what was about to unfold. Betts presents a strong explanation of why intelligence failures are envitable, as well as insights into the myriad challenges that analysts must overcome to offer useful estimates of future events.

9. The Importance of Open Source Intelligence to the Military

Robert D. Steele

Steele describes various types of information available on the World Wide Web and explains how these sources can be exploited by intelligence organizations to supplement the classified information they traditionally rely upon as a basis for their estimates.

10. A Policymaker's Perspective on Intelligence Analysis

Robert D. Blackwill and Jack Davis

Policymakers must focus on the pressing issues of the day, leaving little time to peruse finished intelligence products. Blackwill offers the reader a glimpse into the lives of policymakers and analysts as they interact.

11. Intelligence Estimates and the Decision-Maker

Shlomo Gazit

Gazit highlights the importance of establishing what he describes as a "reciprocal relationship" between analysts and policymakers and ways to bridge the gap that exists between them.

12. CIA's Strategic Intelligence in Iraq

Richard L. Russell

This report on the CIA's performance prior to the first Gulf War gives analysts high marks for accurate estimates of Iraqi intentions and capabilities and the performance of U.S. forces in battle.
13. Early Warning Versus Concept: The Case of the Yom Kippur War 1973

Ephraim Kahana

This study of Israeli intelligence performance prior to the 1973 Yom Kippur War describes how the analytic framework that dominated Israeli perceptions of events in the fall of 1973 led both analysts and officials to misinterpret information about the threats they faced.

PART IV. THE DANGER OF INTELLIGENCE POLITICIZATION

Introduction

14. The Politicization of Intelligence

Harry Howe Ransom

This overview of how politicization occurs within the intelligence community suggests that it is inherent in the production of intelligence, because information is crucial to gaining and preserving political power.

15. Intelligence to Please? The Order of Battle Controversy During the Vietnam War

James J. Wirtz

In this account of a dispute that occurred within the U.S. intelligence community on the eve of the 1968 Tet offensive, Wirtz explores charges made by Samuel Adams, a CIA analyst, that a conspiracy existed to prevent accurate information about enemy troop strength from reaching senior members of the Johnson administration.

16. Inside Ivory Bunkers: CIA Analysts Resist Managers' 'Pandering'

H. Bradford Westerfield

Westerfield describes the controversy surrounding the 1991 nomination of Robert Gates as Director of Central Intelligence, who was disliked by many analysts because they believed that he pressured them to produce finished intelligence that supported White House policy preferences.

PART V. INTELLIGENCE AND THE POLICYMAKER

Introduction

17. Intelligence and National Action

Michael Herman

In this introduction to the role played by intelligence in shaping diplomacy and military action, Herman suggests that many things can influence the making of policy in peacetime and war, not just information.

18. Tribal Tongues: Intelligence Consumers, Intelligence Producers

Mark M. Lowenthal

Lowenthal suggests that the different bureaucratic cultures of the policymaking and intelligence communities often form a significant barrier to a close relationship between the consumers and producers of intelligence.

19. Building Leverage in the Long War: Ensuring Intelligence Community Creativity in the Fight Against Terrorism

James W. Harris

In this call for intelligence reform in the wake of the September 11 tragedy, Harris highlights the role elected officials can play in shaping the intelligence community to meet the terrorist threat.

PART VI: COVERT ACTION

Introduction
20. **Interfering With Civil Society: CIA and KGB Covert Political Action During the Cold War** ........................................... 260
   
   **Kevin A. O'Brien**
   
   The Cold War was in large part a subterranean battle between the intelligence services of the two superpowers, the United States and the Soviet Union, as carried out by their premier intelligence services: the CIA and the KGB. O'Brien examines the political dimension of covert actions undertaken by these two intelligence behemoths.

21. **Covert Action: Swampland of American Foreign Policy** ........................................... 274
   
   **Senator Frank Church**
   
   The chairman of the Senate Intelligence Committee that investigated intelligence abuses in 1975–76 finds in the excesses of the CIA abroad the symptoms of an illusion of American omnipotence that entrapped and enthralled the nation's presidents throughout the Cold War.

22. **Covert Action Can Be Just** ........................................... 278
   
   **James A. Barry**
   
   Exploring the use of covert action from the point of view of just-war theory, Barry establishes benchmarks for judging the morality of this controversial form of secret foreign policy. He eschews highly invasive operations but advances an ethical justification for certain forms of covert action.

### PART VII. COUNTERINTELLIGENCE

| Introduction | 287 |

| 23. **Cold War Spies: Why They Spied and How They Got Caught** | 294 |

   **Stan A. Taylor and Daniel Snow**
   
   Why do some people commit treason against their own country? Taylor and Snow examine this question and find that the answer is simple enough: for money.

| 24. **Bane of Counterintelligence: Our Predisposition for Self-Deception** | 304 |

   **Tennent H. Bagley**
   
   Former CIA officer Bagley claims to have found the counterintelligence enemy and the enemy is us: or at least the penchant of intelligence bureaucracies to avoid the reality that they may have been penetrated by a hostile intelligence service.

| 25. **OSS and the Venona Decrypts** | 315 |

   **Hayden B. Peake**
   
   Examining the Soviet "Venona" cables intercepted by U.S. Army intelligence during the Cold War, former CIA officer Peake finds evidence of KGB and GRU infiltration of the Office of Strategic Services, the forerunner of the CIA.

| 26. **Counterintelligence: The Broken Triad** | 327 |

   **Frederick L. Wettering**
   
   An expert on counterintelligence formerly with the CIA, Wettering sees U.S. counterintelligence as a discipline in disarray and in need of radical reform.

### PART VIII. ACCOUNTABILITY AND CIVIL LIBERTIES

| Introduction | 345 |

| 27. **Intelligence: Welcome to the American Government** | 351 |

   **Gregory F. Treverton**
   
   Treverton explores the merits of viewing intelligence organizations as a regular part of America's government, as subject to constitutional safeguards as any other department or agency.
28. Covert Action and Accountability: Decision-Making for America's Secret Foreign Policy
   Loch K. Johnson
   Johnson examines the specifics of congressional oversight and its implications for covert action.

29. Unleashing the Rogue Elephant: September 11 and Letting the CIA Be the CIA
   Frederick P. Hitz
   In hopes of maintaining accountability without stifling the effectiveness of intelligence officers, intelligence reformers and anti-reformers have debated the proper level of supervision of the CIA. Hitz argues that the leash on the CIA is too tight and suggests how to improve effectiveness without eroding civil liberties.

30. Ethics and Intelligence
   E. Drexel Godfrey, Jr.
   Godfrey maintains that even in the dark domain of intelligence one must have certain limits of restraint—at least in nations like the United States that have long displayed a concern for morality in the making of foreign policy.

31. Another System of Oversight: Intelligence and the Rise of Judicial Intervention
   Frederic F. Manget
   The judicial branch of government is a latecomer to the world of intelligence, but, as Manget notes, it is now very much a part of that world as the courts provide yet another check on intelligence abuse.

32. Congressional Supervision of America's Secret Agencies: The Experience and Legacy of the Church Committee
   Loch K. Johnson
   A former assistant to Senator Frank Church, who led the Senate inquiry into alleged CIA abuses of power in 1975, Johnson reviews the experiences of that investigation and gauges the contribution made by the Church Committee.

PART IX. INTELLIGENCE IN OTHER LANDS

33. The Heritage and Future of the Russian Intelligence Community
   Robert W. Pringle
   In this postmortem of the KGB, Pringle describes how it kept Soviet citizens in line and protected the regime from both internal and external political threats. He also describes the difficult task facing the Russian government as it creates new intelligence organizations from the remnants of the KGB.

34. The Fall and Rise of France's Spymasters
   Percy Kemp
   Following the upheaval that accompanied the collapse of the Soviet Union and the first Gulf War, Hemp explains how the French government realized that it needed a competent intelligence community to cope with emerging challenges.

35. Controlling Intelligence in New Democracies
   Thomas C. Bruneau
   Bruneau describes an issue that is often overlooked in the literature on transitions to democracy: the reform of intelligence organizations and their role in fledgling democracies.
36. **Intelligence and Policy** ................................................................. 454

*Percy Craddock*

Cradock, a former senior British intelligence officer, assesses the performance of British intelligence since World War II.
