CONTENTS

Preface
Eugene W. Domack ix

Introduction
Environmental Setting of the Antarctic Peninsula
Eugene W. Domack, Adam Burnett, and Amy Leventer 1

Meteorological Record and Modeling Results 15

Antarctic Peninsula Climate Variability and its Causes as Revealed by Analysis of Instrumental Records

Regional and Large-Scale Influences on Antarctic Peninsula Climate
Ian Simmonds 31

Response of Wintertime Antarctic Temperatures to the Antarctic Oscillation: Results of a Regional Climate Model
Michiel R. Van den Broeke and Nicole P. M. van Lipzig 43

Glaciological Climate Relationships 59

Spatial and Temporal Variation of Surface Temperature on the Antarctic Peninsula and the Limit of Variability of Ice Shelves
Elizabeth M. Morris and David G. Vaughan 61

Impact Assessment of Regional Climatic Warming on Glaciers and Ice Shelves of the Northeastern Antarctic Peninsula
Pedro Skvarca and Hernán De Angelis 69

Climate-Induced Ice Shelf Disintegration in the Antarctic Peninsula
Ted Scambos, Christina Hulbe, and Mark Fahnestock 79

Terrestrial Archives of Paleoenvironmental Change 93

The Late Pleistocene and Holocene Glacial and Climate History of the Antarctic Peninsula Region as Documented by the Land and Lake Sediment Records—A Review
Christian Hjort, Ólafur Ingólfsson, Michael J. Bentley, and Svante Björck 95

An Overview of the Late Pleistocene Glaciation in the South Shetland Islands
Brenda L. Hall 103

Ice Core Paleoclimate Histories from the Antarctic Peninsula: Where Do We Go From Here?
Ellen Mosley-Thompson and Lonnie G. Thompson 115

Ecologic Responses 129

Palmer Long-Term Ecological Research on the Antarctic Marine Ecosystem
Raymond C. Smith, William R. Fraser, Sharon E. Stammerjohn, and Maria Vernet 131
Maritime Antarctic Peninsula Climate Change: Signals from Terrestrial Biology
*Peter Convey*  
145

Ecological Responses of Maritime Antarctic Lakes to Regional Climate Change  
*A. Quayle, Peter Convey, L. S. Peck, C. J. Ellis-Evans, H. G. Butler, and H. J. Peat*  
159

Late Holocene Penguin Occupation and Diet at King George Island, Antarctic Peninsula  
*Steven D. Emslie, Peter Ritchie, and David Lambert*  
171

**Marine Geological Records**  
181

*V. M. Willmott, Miquel Canals, and José L. Casamor*  
183

Deglacial History of the Greenpeace Trough: Ice Sheet to Ice Shelf Transition in the Northwestern Weddell Sea  
*Robert Gilbert, Eugene W. Domack, and Angelo Camerlenghi*  
195

Marine Sedimentary Record of Natural Environmental Variability and Recent Warming in the Antarctic Peninsula  
*E. W. Domack, Amy Leventer, Stephanie Root, Jim Ring, Eric Williams, David Carlson, Emily Hirshorn, William Wright, Robert Gilbert, and George Burr*  
205

Origins and Paleoceanographic Significance of Layered Diatom Ooze Interval from Bransfield Strait in the Northern Antarctic Peninsula around 2500 Yrs. BP  
*H. I. Yoon, Byong-Kwon Park, Yeadong Kim, Cheon Y. Kang, and Sung-Ho Kang*  
225

Foraminiferal Distributions in the Former Larsen-A Ice Shelf and Prince Gustav Channel Region, Eastern Antarctic Peninsula Margin: A Baseline for Holocene Paleoenvironmental Change  
*Scott E. Ishman and Phillip Szymcek*  
239
