Table of Contents

Acknowledgments ................................................................. iii
About the Editors ..................................................................... v
Introduction ........................................................................... ix

CHAPTER 1
Horizontal Drilling—A Global Perspective .......................... 1
   Philip H. Stark

Turbidite and Deltaic Reservoirs

Chapter 2
Characterization and Exploitation of the Distal Margin of a Fan-shaped Turbidite Reservoir—The ARCO-DOE 91X-3 Horizontal Well Project, Yowlumne Field, San Joaquin Basin, California ...................................................... 11
   Michael S. Clark, Rick K. Prather, and John D. Melvin

Chapter 3
Three-dimensional Geologic Modeling and Horizontal Drilling Bring More Oil out of the Wilmington Oil Field of Southern California ................................................................. 27
   Donald D. Clarke and Christopher C. Phillips

Chapter 4
Results and Conclusions of a Horizontal-drilling Program at South Pass 62 Salt-dome Field .......... 49
   E. P. Mason, M. J. Bastian, R. Detomo, M. N. Hashem, and A. J. Hildebrandt

Chapter 5
The Use of Horizontal Wells to Optimize the Development of Andrew—A Small Oil and Gas Field in the UKCS North Sea ................................................................. 67
   Liz Jolley, Matt Nicol, Amy Frankenbourg, Andy Leonard, and John Wreford

Chapter 6
Planning, Evaluation, and Performance of Horizontal Wells at Ram Powell Field, Deep-water Gulf of Mexico ........................................................................... 95
   Peter A. Craig, Timothy J. Bourgeois, Zaheer A. Malik, and Terrell B. Stroud
Fluvial and Eolian Reservoirs

CHAPTER 7
Unique Horizontal-well Designs Boost Primary and EOR Production,
Prudhoe Bay Field, Alaska ........................................ 113
R. S. Tye, B. A. Watson, P. L. McGuire, and M. M. Maguire

CHAPTER 8
Horizontal-well Drilling in the Heavy-oil Belt, Eastern Venezuela Basin:
A Postmortem of Drilling Experiences .......................... 127

CHAPTER 9
Structural and Stratigraphic Compartments in a Horizontal Well Drilled in the Eolian
Tensleep Sandstone, Byron Field, Wyoming ................. 143
N. F. Hurley, A. A. Aviantara, and D. R. Kerr

Chalk Reservoirs

CHAPTER 10
Reservoir Characterization, Well Planning, and Geosteering in the Redevelopment of
Ekofisk Field, North Sea ........................................ 163
Charles T. Feazel and Hardy H. Nielsen

CHAPTER 11
Interpreting Natural Fracture Directions in Horizontal Wells from Wellbore Image Logs ...... 173
O. Jørgensen and N. W. Petersen

CHAPTER 12
Appraisal of an Extensive Thin Chalk Reservoir with Long Horizontal Wells:
Cyclostratigraphy as Complementary Steering Tool .......... 183
N. W. Petersen, J. Toft, and P. M. Hansen

Carbonate Reservoirs

CHAPTER 13
Horizontal Drilling in the Northern Reef Trend of the Michigan Basin ..................... 193
Lester A. Pearce, Christine M. Hewitt, and Lisa M. Corder
CHAPTER 14
Cost-effective Techniques for the Independent Producer to Identify Candidate Reservoirs for Horizontal Drilling in Mature Oil and Gas Fields .................................................. 205
Saibal Bhattacharya, Paul M. Gerlach, and Timothy R. Carr

Techniques

CHAPTER 15
Flexible Well-path Planning for Horizontal and Extended-reach Wells .......................... 227
E. J. Stockhausen, G. E. Smith, J. A. Peters, and E. T. Bornemann

CHAPTER 16
Geosteering of High-angle Wells Using Heavy-mineral Analysis: The Clair Field, West of Shetland, U.K. .............................................................. 249
Andrew C. Morton, Patrick J. Spicer, and David Ewen

Index ........................................................................................................... 261
