GEOINFORMATICS
for
TROPICAL ECOSYSTEMS

Edited by
P.S. Roy

WORKING GROUP ON
TROPICAL ECOSYSTEM MANAGEMENT
Asian Association of Remote Sensing
M/s Bishen Singh Mahendra Pal Singh
CONTENTS

Tropical Forests, Deforestation and Ecosystems Services: Contributions of Remote Sensing
- R.S. DeFries

Assessment of tropical forest cover from satellite images at different geographical scales: case studies from Southeast Asia
- H.J Stibig and F. Achard

Global-scale AVHRR data for land cover analysis in the tropics
- S.S Young

Accuracy assessment of remote sensing in detecting tropical deforestation in Southeast Asia
- Yousif Ali Hussin

Forest Fire monitoring in East Kalimantan, Indonesia- An application of Multi- Temporal Microwave data
- P.K. Joshi and D.H. Hoekman

A new approach to woody biomass assessment in woodlands and shrublands
- Alfred de Gier

Satellite remote sensing for forest management
- P.S. Roy, Sameer Saran, P.K. Joshi and M.B. Chandrashekhar

Landscape ecology and biodiversity conservation
- P.S. Roy and P.K. Joshi

LiDAR remote sensing for forest ecosystem studies
- P.S. Roy, P.K. Joshi and B. Lohani

Tools for integrated land use planning in tropical countries
- Sylvia Herrmann, Luis Samaniego, Bipin Shinde and Manoj Kumar Roy
Spectral behaviour of tropical soils and implications for the monitoring of vegetation
- Lênio Soares Galvão and Ícaro Vitorello

Satellite Remote Sensing and geographic information system applications in sustainable agriculture
- N. R. Patel and S. K. Saha

Integrated remote sensing and GIS applications for agro-ecological zoning in Vietnam
- Nguyen Thanh Xuan

Water resource assessment using agro-hydrological model and Remote sensing (A case study on the River Ganges)
- S. Ochi, K.S. Rajan, S. Priya, G. X.Tan and R. Shibasaki

Grassland assessment using satellite remote sensing – A study in Himalayan landscape (India)
- M.C. Porwal, D.N. Pant and L. Sharma

Satellite images for the monitoring of wetlands and assessing their water budgets
- Allard M.J. Meijerink and Zoltán Vekerdy

Landscape dynamics in the Maipo Ramsar Wetland Site
- Fung Tung

Geo-spatial characterization of biodiversity at landscape level in the Andaman Islands: India
- M.C. Porwal, B.K. Rangnath, M.G. Rajshekhar, Stutee Gupta, Nidhi Chauhan, Hitendra Padaliya, N. Pradeep, Ram Chandra Prasad and P.S. Roy

Remote sensing application in glaciers: A review and case studies of Himalayan glaciers
- G. Philip and R. K. Mazari

Monitoring urban heat environment using MODIS data for main cities in East Asia
- Shiro Ochi, Daisuke Uchihama, Wataru Takeuchi and Yoshifumi Yasuoka
To alleviate flood disasters by integrating the hydrodynamic model MIKE 11 and geographical information system
– Nitin Kumar Tripathi, Farah Aziz and Ole Mark

Rethinking community geographic information system
– Ayon Tarafdar, Bal Krishna and Ravi Gupta
