Small Water and Wastewater Treatment Systems V

Selected Proceedings of the 5th IWA International Specialised Conference on Small Water and Wastewater Treatment Systems, held in Istanbul, Turkey, 24–26 September 2002

Issue Editors: İ Öztürk*, G Ho**, D Orhon*, A Tanik* and H Z Sarikaya*

* Istanbul Technical University, Environmental Engineering Department, 34469, Maslak, Istanbul, Turkey
** Murdoch University, Environmental Technology Centre, Perth, Australia
Contents

Preface ix

Keynote addresses

1 Changing needs for appropriate excreta disposal and small wastewater treatment methodologies or The future technology of small wastewater treatment systems
   C. W. Randall

7 Small water and wastewater systems: pathways to sustainable development?
   G. Ho

15 Scientific basis for the design of small activated sludge systems
   D. Orhon, Ö. Karahan-Güli, S. I. Sözen and N. Artan

23 Innovative technologies for decentralised water, wastewater and biowaste management in urban and peri-urban areas
   R. Otterpohl, U. Braun and M. Oldenburg

33 Sludge management of small water and wastewater treatment plants
   O. Nowak, V. Kuehn and M. Zessner

43 Developments in the application of chemical technologies to wastewater treatment
   O. Tüney

Decentralised wastewater collection and treatment

53 Centralised versus decentralised sewage systems: a comparison of pathogen and nutrient loads released into Sydney's drinking water catchments
   K. Charles, N. Ashbolt, C. Ferguson, D. Roser, R. McGuinness and D. Deere

61 Evaluation of small wastewater treatment systems
   D. Hellström and L. Jonsson

69 Joint operation of small wastewater treatment plants in southern Turkey
   H. Z. Sarikaya, M. F. Sevimli, I. Koyuncu and E. Yuksel

77 A collection and treatment system for organic waste and wastewater in a sensitive rural area
   L. Malmén, O. Palm and E. Norin

85 Application of small community sewer system for improving the quality of the water resource in Korea
   G. N. Myung and M. J. Yu

93 Ten years' experience of treating all flows from combined sewerage systems using package plant and constructed wetland combinations
   P. Griffin

101 Greywater treatment by constructed wetlands in combination with TiO$_2$-based photocatalytic oxidation for suburban and rural areas without sewer system
   Z. Li, H. Gulyas, M. Jahn, D. R. Gajurel and R. Otterpohl

107 Cost-effective treatment solutions for rural areas: design and operation of a new package treatment plant for single households
   D. Daude and T. Stephenson

115 Design of water hyacinth ponds for removing algal particles from waste stabilization ponds
   Y. Kim, D. L. Giokas, P.-G. Chung and D.-R. Lee

125 Vermiculture as a tool for domestic wastewater management
   O. Bajsa, J. Nair, K. Mathew and G. E. Ho

133 Pre-treatment of domestic wastewater with pre-composting tanks: evaluation of existing systems
   D. R. Gajurel, O. Benn, Z. Li, J. Behrendt and R. Otterpohl

139 Oxidation processes and clogging in intermittent unsaturated infiltration
   A. Bancolé, F. Brissaud and T. Gnagne
Intermittent sand filtration for wastewater treatment in rural areas of the Middle East – a pilot study  I. Sabbah, B. Ghattas, A. Hayek, J. Omari, Y. Haj, S. Admon and M. Green

Sand filter clogging by septic tank effluent  M. Spychata and R. Btazejewski

Low-tech/appropriate systems

A small scale hydroponics wastewater treatment system under Swedish conditions  A. Norström, K. Larsdotter, L. Gumaelius, J. la Cour Jansen and G. Dalhammar

Treatment of mountain refuge wastewater by fixed and moving bed biofilm systems  G. Andreottola, E. Damiani, P. Foladori, P. Nardelli and M. Ragazzi

Removal of ammonia from tannery effluents in a reed bed constructed wetland  O.S. Kucuk, F. Sengul and I.K. Kapdan

Performance of a small wastewater stabilisation pond system in tropical climate in Dar es Salaam, Tanzania  L. Mbwele, M. Rubindamayugi, A. Kivaisi and G. Dalhammar

Aerobic treatment systems

Low cost anaerobic system for Indonesia: single baffled septic tank  G. Wibisono, K. Mathew and G. Ho

Treatment of domestic sewage at low temperature in a two-aerobic step system followed by a trickling filter  T.A. Elmitwalli, J. van Lier, G. Zeeman and G. Lettinga

Effect of high salinity on anaerobic treatment of low strength effluents  G. Ozalp, C.Y. Gomec, I. Öztürk, S. Gonuldinc and M. Altınbas

Small sewage treatment system with an anaerobic–anoxic–aerobic combined biofilter  S.-M. Park, H.-B. Jun, S.-P. Hong and J.-C. Kwon

The UASB reactor as an alternative for the septic tank for on-site sewage treatment  A.L.S.S. Coelho, M.B.H. do Nascimento, P.F.F. Cavalcanti and A.C. van Haandel

Biofilm reactors

Experimental study on carbon removal in biological aerated filters  G. Farabegoli, A. Carucci, G. Gandolfo, E. Rolle and P. Viotti

A new low-cost biofilm carrier for the treatment of municipal wastewater in a moving bed reactor  J.C. Orantes and S. González-Martínez

Moving bed biofilm reactors: a small-scale treatment solution  D. Daude and T. Stephenson

A software nitrate sensor based on ammonium and redox signals  D. Cecil

An off-line respirometric procedure to determine inhibition and toxicity of biodegradable compounds in biomass from an industrial WWTP  A. Guisasola, J.A. Baeza, J. Carrera, C. Casas and J. Lafuente

Design operation and monitoring of wastewater treatment systems

Treatment of landfill leachate – high tech or low tech? A case study  N. Schwarzenbeck, K. Leonhard and P.A. Wilderer

Design procedure for carbon removal in contact stabilization activated sludge process  M. Sarioğlu, D. Orhon, E. Görgün and N. Artan

Investigation of sludge re-circulating clarifiers design and optimization through numerical simulation  S. Davari and M.J. Lichyae
Experimental study on sequencing batch biofilm reactor with biological filtration (SBBR-BF) for wastewater treatment  
T.W. Li, Y.Z. Peng, Y.Y. Wang, G.B. Zhu, W.Q. Chi and G.W. Gu

Performance of a hybrid SBR with fixed bed and suspended growth  
H. Kim, D. Rhu, H. Hwang and E. Choi

Effect of temperature on the nitrogen removal performance of a sequencing batch reactor treating tannery wastewater  
S. Murat, G. Insel, N. Ariel and D. Orhon

Feasibility study of sequencing batch reactor system for upgrading wastewater treatment in Malaysia  
S. Al-Shididi, M. Henze and Z. Ujang

An alternate oxic-anoxic process automatically controlled. Theory and practice in a real treatment plant network  
P. Battistoni, R. Boccadore, D. Bolzonella and M. Marinelli

Integrated control of nitrate recirculation and external carbon addition in a predenitrification system  
Z. Yuan and J. Keller

Nitrogen removal during secondary treatment by aquatic systems  
B. Erol Nalbur, L. Akça and H. Bayhan

Effects of SRT and DO on N₂O reductase activity in an anoxic-oxic activated sludge system  
N. Noda, N. Kaneko, M. Mikami, Y. Kimochi, S. Tsuneda, A. Hirata, M. Mizuochi and Y. Inamori

Comparison of intermittently aerated continuous and batch biofilm reactor in nutrient removal  
Ufuk Altınbaş and İzzet Öztürk

Nutrient removal of ammonia rich effluents in a sequencing batch reactor  
G. Yılmaz and İ. Öztürk

Consumer managed co-operative - a solution for progressing wastewater management in rural areas  
H. Mattila, E. Santala and J. Aho

Development of a knowledge-based decision support system for identifying adequate wastewater treatment for small communities  
J. Comas, J. Alemany, M. Poch, A. Torrens, M. Salgöktürk and J. Bou

A system for on-site performance evaluation of small wastewater treatment plants according to the European procedure  
J.L. Vasel and H. Jupsin

Carbonate addition - an effective remedy against poor activated sludge settling properties and alkalinity conditions in small wastewater treatment plants  
B. Wett, A. Eladawy and W. Becker

Improving nitrogen removal in predenitrification-nitrification biofilters  
L. Larrea, A. Abad and J. Gayarre

Optimizing nitrogen removal in the BioDenitro process  
I. Irizar, J. Suescun, F. Plaza and L. Larrea

Upgrading of the biotreatment in a pharmaceutical industry with activated carbon addition  
F. Çeçen and Ö. Aktaş

Enhancing biological nitrogen removal in a small wastewater treatment plant by regulating the air supply  
M. Fiter, J. Colprim, M. Poch and I. Rodríguez-Roda

Alternatives for upgrading the Wilderness Wastewater Treatment Plant for biological nutrient removal  
E.U. Cokgor and C.W. Randall
Water treatment

463 Biofilm bacteria Inactivation by citric acid and resuspension evaluations for drinking water production systems Y. P. Tsai, T. Y. Pai, J. Y. Hsin and T. J. Wan

473 Direct filtration with preozonation for small water treatment systems E. Yüksel, Ö. Akgiray and E. Soyer

481 Use of reflectors to enhance the synergistic effects of solar heating and solar wavelengths to disinfect drinking water sources G. K. Rijal and R. S. Fujioka

489 Biological denitrification of drinking water using various natural organic solid substrates Ş. Aslan and A. Türkman

497 On the use of crushed shells of apricot stones as the upper layer in dual media filters S. Aksogan, A. Baştürk, E. Yüksel and Ö. Akgiray

505 Kinetic study of reactions between ozone and benzothiazole in water H. Valdés, C. A. Zaror and M. Jekel

511 β-endosulfan removal from water by ozone oxidation M. S. Yazgan and C. Kinaci
