ENGINEERING, CONSTRUCTION, AND OPERATIONS IN CHALLENGING ENVIRONMENTS

Earth & Space 2004

PROCEEDINGS OF THE NINTH BIENNIAL ASCE AEROSPACE DIVISION INTERNATIONAL CONFERENCE ON ENGINEERING, CONSTRUCTION, AND OPERATIONS IN CHALLENGING ENVIRONMENTS

March 7–10, 2004
League City/Houston, Texas

EDITED BY

Ramesh B. Malla
University of Connecticut

Arup Maji
University of New Mexico

ASCE
Contents

Lunar and Martian Exploration and Development

Engineering and Construction of Lunar and Martian Bases

Numerical and Experimental Study of Strength Properties of Martian Regolith .......... 1
Khalid A. Alshibli, Mustafa I. Alsleh, David L. Godbold,
and Emir J. Macari

Concepts for the Design and Construction of a Modular Inflatable Habitat ................. 9
Marvin E. Criswell and Jeffrey S. Carlson

Structural Design of a Lunar Base ........................................................................... 17
F. Ruess, U. Kuhlmann, and H. Benaroya

Ground Penetrating Radar Technology to Locate Plastic Pipes and Lava Tubes ........ 24
Leonhard E. Bernold and Mark Immer

In situ Utilization for Lunar and Martian Base

Solar Cell Development on the Moon from In-Situ Resources .................................. 32
Alex Ignatiev, Alexandre Freundlich, and Charles Horton

The Potential of Microwaves in Processing Martian Soil: Metals Extraction Using
Microwaves ............................................................................................................. 37
Walter Boles, Laurent Sibille, Subhaya Sen, Paul Carpenter,
and David G. Agresti

Design Note on Post-Tensioned Cast Basalt .............................................................. 45
Kevin A. Greene

Engineering Properties of Regolith, Granular Soils

Yielding of Fiber-Reinforced Granular Soils ............................................................. 51
R. L. Michalowski and J. Cermák

Investigation of Moisture Effect on Tensile Strength in Granular Soil .................. 57
T.-H. Kim, S. Sture, and J.-M. Yun

Interface Behavior of Granular Soils ....................................................................... 65
J. David Frost, Gregory L. Hebeler, T. Matthew Evans, and Jason T. DeJong

Sliding and Rolling Constitutive Theory for Granular Materials ............................. 73
A. Anandarajah

Properties of Sand under Low Effective Stresses ................................................... 78
Stein Sture, Susan N. Batiste, Mark Lankton, and Jill Parisi
Remote Sensing Framework for Transportation Infrastructure Environmental Assessment
M. El-Gafy and Y. Abdelrazig

Remote Estimation of Phytoplankton Distribution in Aquatic Ecosystems
A. A. Gitelson, R. Khanbilvardi, Boris Shteinman, and Yosef Yacobi

Remote Monitoring of Water Dynamics and Estimation of Chlorophyll Concentration
R. Khanbilvardi, A. Gitelson, S. Stanichny, A. Mandychev, V. Kushnir, V. Khazin, and B. Shteinman

Earth-Atmosphere Interaction, Space-Based Water Resources and Hydrology

Impacts of Fractional Snow Cover on Surface Air Temperature in the NCAR Community Atmosphere Model (NCAR-CAM2)
Zong-Liang Yang, Guo-Yue Niu, and Qianru Zeng

Efficient Uncertainty Assessment for Satellite Rainfall Observations with Application to Flood Prediction
Faisal Hossain, Emmanouil N. Anagnostou, and Amvrossios C. Bagtzoglou

Modeling the Continental Hydrology: The Interplay Between Canopy Interception and Hill-Slope Runoff
Guo-Yue Niu and Zong-Liang Yang

Progress Towards Developing a Radar Calibration Method for Improved Rainfall Estimation
Sandrine A. Baun, Amvrossios C. Bagtzoglou, Marios N. Anagnostou, Ryan G. Knox, and Emmanuel N. Anagnostou

Fluid Distribution and Flow in Porous Media with Applications for Life Support Systems I

Flow and Distribution of Fluid Phases Through Porous Plant Growth Media in Microgravity

Effect of Vibrations on Pore Fluid Distribution in Porous Media—Experimental Investigations
Ming Xiao and Lakshmi N. Reddi

Understanding Boundary Layers Surrounding Plant Organs to Reduce Indirect Effects of Microgravity on Plant Growth
O. Monje, M. Zebuhr, and G. W. Stutte

Liquid-Gas Interfacial Configurations in Angular Pores under Microgravity
Dani Or, Markus Tuller, and Scott B. Jones

Fluid Distribution and Flow in Porous Media with Applications for Life Support Systems II

Performance Evaluation of a Submerged-Membrane Bioreactor for Lunar Applications

Pore-Size-Distribution and Porosity Measurements in Soil Porous Media by MRI

Automated Systems for Oxygen Diffusion Measurements in Porous Media at 1g and 0g
Scott B. Jones, Dani Or, Gail E. Bingham, and T. Shane Topham

Life Support Systems I

Development of a Nitrifying Bioreactor for the Treatment of Wastewater in Long-Term Space Applications
Eric McLamore, A. Morse, A. Jackson, K. Rainwater, and D. Muirhead

Graywater Treatment Using Biofilm Reactors for Water Recycling in Advanced Life Support
Sybil Sharvelle, M. Katherine Banks, Erin Maloney, and Katherine Graham

Gas Bubble Dissolution in a Non-Venting Gas Trap
Laura A. Crenwelge, Eugene K. Ungar, and Karen D. Pickering
Time-Dependent Mechanical Property Changes of Glass Fiber-Reinforced Polymers Exposed to High pH Environments

Francisco Aguiniga, Timothy E. Bradberry, and David Trejo

Advanced Composites and Structures I
Civil Infrastructure Applications

Design and Construction for CFRP/GFRP Composite Trimaran
Andrew Green

Effects of Freeze-Thaw and Dry-Wet Conditionings on the Mode-I Fracture of FRP-Concrete Interface Bonds
Pizhong Qiao and Yingwu Xu

Realistic Bond Strength of FRP Rebars in NSC from Beam Specimens
Roman Okelo and Robert L. Yuan

Impact Analysis of Composite Sandwich I-Lam System
Pizhong Qiao, Mijia Yang, and Ayman S. Mosallam

Advanced Composites and Structures II
Mechanics and Structural Health Monitoring

Behavior of Honeycomb FRP Sandwich Sinusoidal Core Panels with Skin Effect
An Chen and Julio F. Davalos

Development and Implementation of Rate Dependent Composite Material Model for Shell Element Application in LSDYNA
Xiahua Zheng, Robert K. Goldberg, Wieslaw K. Binienda, and Gary D. Roberts

Fracture Analysis of Shear Deformable Bi-Layer Structures
Jialai Wang and Pizhong Qiao

Damage Detection of Composite Laminates Using Smart Piezoelectric Materials
Cole S. Hamey, Wahyu Lestari, and Pizhong Qiao

Applications of Smart Materials

Development and Characterization of Piezoresistive Smart Structural Materials
C. Vipulanandan (Vipu) and Kallof Sett

Micropumps Actuated by Smart Materials
Gongbing Song, Bin Fan, and Fazle Hussain

Hysteresis Compensation Using LPV Control
Charudatta S. Mehdendale and Karolos M. Grigoriadis

Application of the Piezoelectric Materials for Health Monitoring in Civil Engineering: An Overview
Gangbing Song, Haichang Gu, and Hongnan Li

Infrastructure, Technologies

A Study of the Thermal Performance of Cold-Formed Thin-Walled Perforated Steel Studs (Thermal Studs) in Fire
B. Salhab and Y. C. Wang

Optimization of the Allowed Drilling Domain in the Exploitation of Marine Floating Platforms
H. Mamedov and Ch. Hajiyev

Considerations on the Design of Space Structures—Active Design and Inclusion of Nonlinear Effects
Y. Cengiz Toklu

The Building of Theoretical Model and Analysis of Deformations of an Anchor-Grouting Soft Rock Tunnel
H. L. Dai, X. Wang, and G. X. Xie

Engineering and Architecture in Extreme Environments

Building and Living in Earth's Extreme Environments: Theory and Practice

Construction of a Modernized South Pole Station: Progress and Challenges
Jerry W. Marty

Ocean Base One ... Conquering the Ocean Frontier: The OASIS Program
R. A. Cooper, W. E. Colburn, and C. G. Cooper

Infrastructure Assessment in the Context of Rapid Urbanization: The Case of Cambodia
Kelly Seshimo and Maijinn Chen

Providing Effective Science Support and Logistics in the Arctic
J. Burnside and D. Garcia-Novick

Engineering in Extreme Environments

The NEEMO Project: A Report on How NASA Utilizes the "Aquarius" Undersea Habitat as an Analog for Long- Duration Space Flight
Bill Todd and Marc Reagan

Selection of Appropriate Materials at the South Pole for the 9-Meter Full Motion Antenna
Vikas K. Verma and Steven P. Krueger

Soil Model Selection in Earth-Based Extreme Region with Peat Foundation under Large Loading Area
Mark Nakher
Spacecraft Thermal Protection Systems

Carbon Foam Thermal Protection Systems for Space Applications ............................................. 960
    Dwayne R. Morgan, Sherrill B. Biggers, and Mica Grujicic

Fiber Reinforced Silica Aerogel Composites: Thermal Insulation for High-Temperature Applications ............................................. 968
    Dmitry V. Fomitchev, Roxana Trifu, and George Gould

Ultra-Lightweight Aerogel Superinsulation as an MLI Replacement ............................................. 976
    Roxana M. Trifu, George L. Gould, Ken Qassim, and Jim L. Clark

Enabling Technologies for Space Exploration and Transportation

Structural Dynamic Response of a Square Solar Sail under Solar Pressure and Thermal Loading ............................................. 983
    Ramesh B. Malla and Chijie Lin

The ExoMars Mission of ESA’s Aurora Programme ............................................. 991
    M. Van Winnendael, B. Gardini, R. Roumeas, and J. Vago

Estimating the Integrated Radiation Dose for a Conjunction-Class Mars Mission Using Early MARIE Data ............................................. 999
    John F. Connolly

A Novel Approach to Intra-Station Transfers Between Large Centripetal Habitation Wheels and Stationary Utility Cores ............................................. 1007
    Stephen A. Sywak

Systems in Space

Industrial Processes in Space Manufacturing for Converting Asteroidal Materials into Useful Construction Elements ............................................. 1015
    Serkan Anilir

Aerodynamic Analysis of Flat and Curve Shaped Hypersonic Forebodies at Low Speeds ............................................. 1023
    S. Nadaraja Pillai, M. Santhosh kumar, T. A. Sundaravadivel, M. Gopinath,
    K. M. Parammasivam, and Dr. K. Jayaraman

Subject Index ............................................. 1031

Author Index ............................................. 1035
