

Water Science and Application 8

Riparian Vegetation and Fluvial Geomorphology

Sean J. Bennett
Andrew Simon
Editors

 American Geophysical Union
Washington, DC

CONTENTS

Preface	vii
Part 1. Introduction:	
Riparian Vegetation and Fluvial Geomorphology: Problems and Opportunities <i>Andrew Simon, Sean J. Bennett, and Vincent S. Neary</i>	1
Part 2. Experimental and Theoretical Studies	
Flow, Turbulence, and Resistance in a Flume with Simulated Vegetation” <i>Marcelo H. García, Fabián López, Chad Dunn, and Carlos V. Alonso</i>	11
Effects of Emergent Riparian Vegetation on Spatially Averaged and Turbulent Flow Within an Experimental Channel <i>Sean J. Bennett</i>	29
Riparian Vegetation as a Primary Control on Channel Characteristics in Multi-thread Rivers <i>Michal Tal, Karen Gran, A. Brad Murray, Chris Paola, and D. Murray Hicks</i>	43
Transport Mechanics of Stream-Borne Logs <i>Carlos V. Alonso</i>	59
The Role of Riparian Shrubs in Preventing Floodplain Unraveling along the Clark Fork of the Columbia River in the Deer Lodge Valley, Montana <i>J. Dungan Smith</i>	71
Part 3. Large Woody Debris	
Spatial Pattern of Turbulence Kinetic Energy and Shear Stress in a Meander Bend With Large Woody Debris <i>Melinda D. Daniels and Bruce L. Rhoads</i>	87
Patterns of Wood and Sediment Storage Along Debris-flow Impacted Headwater Channels in Old-Growth and Industrial Forests of the Western Olympic Mountains, Washington <i>Jeremy T. Bunn and David R. Montgomery</i>	99
Part 4. Bank Erosion and Channel Stability	
Root-Soil Mechanics and Interactions <i>Donald H. Gray and David Barker</i>	113
Advances in Assessing the Mechanical and Hydrologic Effects of Riparian Vegetation on Streambank Stability <i>Natasha Pollen, Andrew Simon, and Andrew Collison</i>	125
The Influence of Trees on Stream Bank Erosion: Evidence from Root-Plate Abutments <i>Ian D. Rutherford and James R. Grove</i>	141

Effects of Riparian Vegetation on Stream Channel Stability and Sediment Budgets <i>Stanley W. Trimble</i>	153
Flow, Sediment, and Nutrient Transport in a Riparian Mangrove <i>S. Ikeda, Y. Akamatsu, and Y. Toda</i>	171
Part 5. Floodplains and Watershed Processes	
Sedimentation in Floodplains of Selected Tributaries of the Chesapeake Bay <i>K. M. Ross, C. R. Hupp, and A. D. Howard</i>	187
Vegetation Propagule Dynamics and Fluvial Geomorphology <i>A. M. Gurnell, J. M. Goodson, P. G. Angold, I. P. Morrissey, G. E. Petts, and J. Steiger</i>	209
Floodplain Stabilization by Woody Riparian Vegetation During an Extreme Flood <i>Eleanor R. Griffin and J. Dungan Smith</i>	221
Part 6. Numerical Studies	
Flow and Boundary Shear Stress in Channels With Woody Bank Vegetation <i>Jason W. Kean and J. Dungan Smith</i>	237
A Depth-Averaged Two-Dimensional Numerical Model of Flow and Sediment Transport in Open Channels With Vegetation <i>Weiming Wu and Sam S. Y. Wang</i>	253
Numerical Modeling of Bed Topography and Bank Erosion Along Tree-Lined Meandering Rivers <i>Marco J. Van De Wiel and Stephen E. Darby</i>	267
