Contents

Foreword .......................................................... III
List of Participants ............................................... IX

PRONAOS, a Scientific, Technical and Human Adventure:
Homage to Guy Serra
J.-M. Lamarre and M. Giard .................................. 1

PRONAOS Observations of the Interstellar Medium:
New Insights on Interstellar Dust
I. Ristorcelli, B. Stepnik, X. Dupac, A. Abergel, J.P. Bernard,
N. Boudet, M. Giard, J.-M. Lamarre, C. Meny, F. Pajot, J.-P. Torre
and G. Serra ...................................................... 9

Session I: Dust and Gas Properties

FIR-mm Optical Properties of Cosmic Dust Analog Materials
V. Mennella, J.R. Brucato and L. Colangeli .................... 21

Grain-Grain Coagulation in the ISM
B. Stepnik, A.P. Jones, A. Abergel, J.P. Bernard, F. Boulanger
and I. Ristorcelli .................................................. 31

Temperature-Dependent FIR/sub-mm Dust Emissivity Indices:
Some Implications for the Diffuse ISM Dust Composition
A.P. Jones .......................................................... 37

Heating of the Interstellar Medium
A.G.G.M. Tielens and E. Peeters ................................ 43

**Session III: Extragalactic Science**

- Far-Infrared Emission from Intracluster Dust in Abell Clusters
  M. Stickel, U. Klaas, D. Lemke and K. Mattila                          | 165  |
- The Extragalactic Background and its Contributing Galaxies            | 177  |
  G. Lagache                                                             |      |
- Identification of SCUBA Sources with ISOCAM                          | 187  |
- Submillimeter C and CO Lines in Galaxies                              | 193  |
  M. Gerin, T.G. Phillips and A. Contursi                                |      |

**Session IV: Instruments and Missions**

- Herschel: Science Objectives and Current Status                      | 201  |
  G.L. Pilbratt                                                          |      |
- Status of the Odin Project                                            | 211  |
  U.O. Frisk                                                            |      |
- Archeops: A CMB Anisotropy Balloon Experiment Measuring a Broad Range of Angular Scales | 219  |
  F.-X. Désert                                                          |      |
The Japanese Infrared Space Missions
H. Okuda .................................................. 225

Astro-F: Infrared Imaging Surveyor (IRIS) Mission
T. Onaka .................................................. 233

SOFIA and its Facility Far Infrared Camera HAWC
R. Evans, D.A. Harper, S. Casey, J.A. Davidson, I. Gatley, J. Kastner,
R. Loewenstein, S.H. Moseley, R. Pernic and J. Wirth ...................... 239

ELISA, a Small Experiment for a Large Sub-Millimeter Survey
J.P. Bernard, I. Ristorcelli, M. Armengaud, J.P. Crussaire,
M. Giard, G. Lagache, J.-M. Lamarre, B. Leriche, Y. Longval,
C. Meny, B. Stepnik and J.-P. Torre .................................. 245

Submillimeter Space Telescope Project “Submillimetron”
V.D. Gromov, N.S. Kardashev and L.S. Kuzmin .......................... 255

Posters

Dust Emission in Massive Star-Forming Regions with PRONAOS:
The Orion and M 17 Molecular Clouds
X. Dupac .................................................. 263

A Deep ISOCAM Survey in the SSA13
Y. Sato, K. Kawara, Y. Sofue, L.L. Cowie, D.B. Sanders,
R.D. Joseph, Y. Taniguchi, H. Matsuhara, T. Matsumoto,
H. Okuda and K. Wakamatsu ........................................... 269

Case for a Ground-Based Preparatory Program for HIFI Calibration
Sources
D. Teyssier, M. Gerin, C. Kramer and F. Helmich ......................... 275

Sub-Millimetre Analysis of a Compact Test Range for Planck
Application
J. Brossard, D. Dubrue1 and B. Buralli .................................. 281

The 3 Micron Band of Crystalline Water Ice Irradiated by Lyman-α
UV Photons: Comparison with Ion Irradiation Effects
G. Leto and G. Baratta .............................................. 285

Far-Infrared Dust Opacity and Visible Extinction
L. Cambrésy, F. Boulanger, G. Lagache and B. Stepnik .................. 291
Photophysics of Interstellar PAHs in the PIRENEA Experiment
  C. Pech, P. Boissel, M. Armengaud, P. Frabel and C. Joblin ........... 297

Far-Infrared Spectroscopy of Diffuse Interstellar Medium – Large
Silicon Abundance and Effects of UV Radiation
  T. Onaka, Y. Okada, M. Mizutani, Y. Doi and H. Shibai ............... 303

Evolution of Interstellar Dust Properties from Diffuse Medium
to a Dense Cloud
  B. Stepnik, A. Abergel, J.P. Bernard, F. Boulanger, L. Cambrésy,
  M. Giard, A.P. Jones, G. Lagache, J.-M. Lamarre, C. Meny, F. Pajot,
  F. Le Peintre, I. Ristorcelli, G. Serra and J.-P. Torre ............... 309

A Large-Scale Unbiased Survey for Outflows in Molecular Clouds
with Embedded IRAS Sources
  J.C. O'Linger and G.A. Wolf-Chase .................................. 315

SCUBA Observations of Pre-Stellar Cores
  J.M. Kirk, D. Ward-Thompson and P. André .......................... 321

Mid-IR Characterisation of Condensed Cores in Galactic GMC's
(IR Dark Clouds of the ISOGAL Project)
  P. Hennebelle, M. Pérauld and D. Teyssier .......................... 327

Far Infrared Study of the Giant Star Forming Complex W 51

Variations of IR Spectra in Carbon Mira, T Dra

The ISOGAL Point Source Catalog
  F. Schuller and A. Omont ............................................. 345

Starforming Region M 16: A Near and Mid IR Study
  U.C. Joshi, S. Ganesh, K.S. Bariyan, G. Simon, A. Omont,
  M. Schultheis and F. Schuller ...................................... 351

Constraining the LogN-LogS Relation of Far-Infrared Unresolved
Sources using a P(D) Analysis; Application to FIRBACK Maps
Obtained by ISO
  Y. Friedmann, F. Bouchet, J. Blaizot and G. Lagache .................. 357

Dust Destruction and Intermittent Star Formation History in Blue
Compact Dwarf Galaxies
  H. Hirashita, Y.Y. Tajiri and H. Kamaya ............................. 363

Infrared Number Count Model and Estimated Source Confusion Limits
  T.T. Ishii, T.T. Takeuchi and J.-J. Sohn ............................ 369
Statistical Studies on Galaxy Evolution from IR Observations
T.T. Takeuchi, T.T. Ishii and T. Totani .......................... 375

The Nature of the Low-Metallicity ISM in the Dwarf Galaxy NGC 1569
F. Galliano, S. Madden, A.P. Jones, C. Wilson, J.P. Bernard
and F. Le Peintre ............................................. 381

H₂ Absorption Measurement of Primordial Clouds
H. Shibai, T.T. Takeuchi, T.N. Rengarajan and H. Hirashita ...... 387

The ¹²CO(1–0) to H₂ Conversion Factor in Normal Late-Type Galaxies
A. Boselli, J. Lequeux and G. Gavazzi .......................... 393

Dust and CO Emission from High Z Sources
P. Cox, A. Omont and F. Bertoldi ................................ 399

FIRBE: New Japanese Balloon-Borne Infrared Telescope
H. Shibai, S. Arimura, T. Teshima, Y. Doi, T. Nakagawa,

Public Access to Infrared Data and Tools for Multiwavelength Analysis
D. Egret, F. Genova and T. Contini .............................. 413

Direct Detection Spectroscopy in the 350 μm Window:
SPIFI on the JCMT
G.J. Stacey, T. Nikola, C.M. Bradford, L. Hall, S. Unger,
M. Savage, J.A. Davidson, A.D. Bolatto and J.M. Jackson ......... 419

Index ............................................................... 425
