List of figures.x
Foreword xi
Introduction xiii
Overview of the contents – Acknowledgments

Part I

Chapter 1 Information literacy programs: People, politics and potential – Christine Bruce and Philip Candy, Australia
Information literacy programs – Varying approaches to information literacy – Characteristics of programs that may be applicable elsewhere – Curriculum design – Emerging research orientations – Challenges for the future – References

Chapter 2 Meeting the needs of distance education students – Margaret Appleton and Debbie Orr, Australia
Information literacy at Central Queensland University – Strategies for different client groups – Videoconferencing – Computer-assisted learning programs – Web-based courses/tutorials – Virtual workshops – Future developments
References

Chapter 3 The development of Web-based programs to support information literacy courses – Nancy Fjällbrant, Sweden

Chapter 4 INFOLIT: A South African experience of promoting quality education – Cathy-Mae Karelse, South Africa
Contextualising the spread of information literacy – INFOLIT: A smart solution – Information literacy: Theories and practice – The educational environment in which INFOLIT has operated – The need for curriculum integration and appropriate professional education – Challenges for the spread of information literacy education – Conclusion – References
Chapter 5  Developing information literacy programs in Singapore

- Mark Hepworth, Singapore

The meaning of information literacy and skills - Information literacy in Singapore’s school curriculum - Information literacy and skills of tertiary students at Nanyang Technological University - Incorporating information literacy and skills into the undergraduate curriculum - Implications for staff and the tertiary institution - Conclusion - References

Chapter 6  Framing information literacy: The University of Ballarat experience

- Natalie Radomski, Australia

Framing information literacy: A critical view - The University of Ballarat context: Organisational development and policy perspectives - Recent history of information literacy development within the University of Ballarat context - Case study one: Introducing information literacy in a first year education course - Case study two: Finding a place for information literacy within a University of Ballarat tertiary bridging program - Case study three: Negotiating information literacy within the curriculum: Changing roles and emerging partnerships - Reflections on the struggle: Themes, issues and future directions - Conclusion - References

Chapter 7  Integrating information literacy: University of Wollongong experience

- Lynne Wright and Catriona McGurk, Australia

Early policy at the University of Wollongong - Working parties and policy - Tertiary Literacies Project Officer - Policy development workshops - University support staff working together - Developing exemplars of information literacy programs - Curriculum integration: Principles for the future - Campus-wide recognition of information literacy - Conclusion - References - Appendix

Chapter 8  Australian Indigenous Communities Online

- Mary Mortimer, Australia

Information access in remote Australian indigenous communities - Indigenous Communities Online - The training program - A community Web-site - Cultural protocols influencing the program - Program outcomes and evaluation - Ongoing issues - Follow-up - Conclusion - Acknowledgments
Chapter 9  Working towards an information literate law firm  
Gayle Gasteen and Carmel O'Sullivan, Australia  
The place of information in the practice of law  — The development of information literate lawyers  — Profile of an information literate law firm: Blake Dawson Waldron's information literacy strategy — Lessons learned and gaps to be filled — References

Chapter 10  Tools to assist physicians to manage their information needs  
John Parboosingh, Canada  
Traditional continuing medical education will not meet the needs of physicians  — The Maintenance of Competence (MOCOMP®) Program  — Self-directed activities of specialists  — Differentiating scanning from self-directed learning  — The physicians' perceptions of their learning needs  — The development of a diary to help physicians manage their information needs  — The experiences of physicians using the MOCOMP® paper diary  — Experiences with a software diary (PCDiary®)  — The development of a library of physicians' learning on the Internet  — PCDiary® software (Version 3.0)  — A new generation of tools to facilitate information access and use - References

Part II  Research

Chapter 11  Mining in Cyberia: Researching information literacy for the digital age  
Philip Candy, Australia  
Introduction  — The nature of information literacy  — The relationship between information literacy and the technologies used to locate and retrieve information  — The impact of the situation or context on the qualities or attributes of information literacy  — How is it acquired or developed?  — The relationship between information literacy and the individual learner or enquirer  — Conclusion  — References

Chapter 12  Information literacy: A critical realist perspective  
Alistair Mutch, United Kingdom  
Information in the workplace  — The need for theory  — Agency and structure  — Agency and structure in the creation of information  — Conclusion  — References
Chapter 13  
A theory of information literacy: Information and outward looking – Ross J Todd, Australia

A theoretical framework for information literacy – View of people as active consumers of information – Cognitive perspectives of information processing – Summary – References

Chapter 14  
Exploring information literacy in the workplace: A process approach – Bonnie Wai-yi Cheuk, Singapore

Adopting a process approach to explore information literacy in the workplace – Adopting a user-centred approach to information literacy education – Alternative sense-making assumptions for exploring information literacy processes – Methodology: Data collection and data analysis – Research findings – Information literacy education in the workplace – A call for re-thinking information literacy education – Information literacy culture in the workplace – Conclusion – References

Chapter 15  
Is there a relationship between information seeking and learning outcomes? – Louise Limberg, Sweden

The research design – Students’ experience of information seeking and use – Variation in students’ understanding of the topic – The interaction between information seeking and learning – Implications for future research – Do librarians encourage the conception of fact-finding? – Are A-conceptions misconceptions? – Implications for information literacy education: Applying a relational model – Conclusion – References

Chapter 16  
Understanding scholarly and professional communication: Thesauri and database searching – Helmut Klaus, Australia

Literature searches and information literacy – Thesauri and the online dialogue in professional and scholarly communication – Ways of understanding thesauri – Understandings in the online dialogue – Teaching and learning database searching - References

Chapter 17  
Personal research information management: Information literacy and the research student – Paul Genoni and Jan Partridge, Australia

Personal research information management – Personal research information management competencies – University support and supervision – Implications for University policy and practice - References
Chapter 18 Socio-economic status and information literacy in South Africa – Yusuf Sayed, South Africa
The concept of information literacy – Research design and methodology – Students’ information literacy abilities and needs – Conclusion – Acknowledgment – References

Chapter 19 Learning together: Staff development for information literacy education – Penny Moore, New Zealand
Research context and professional development – Findings – Workshop activities: What is information? – Evaluating information sources for teaching and learning – Conclusion – References

Chapter 20 Some issues in assessing information literacy – Ralph Catts, Australia
Is information literacy assessable? – Institutional program and unit evaluation – Formative and summative assessment of students – Methods of assessment – Analysis of assessment data – Conclusion – References
