Subvolume B
Linear Triatomic Molecules

Part 8
CHSi (HCSi), ClHNe (NeHCl), Cl2H+ (ClHC1), FHO (FHO), FHO+ (FHO+), F2H+ (FHF+), FN2+ (FNN+), HN2+ (HNN+), HNSi (HNSi), HOSi+ (HOSi+), N2S (NNS), NOP (PNO), NOSi (NSiO), NOSi (SiNO), NOSi (SiON)

### II/20 Molecular Constants

#### Subvolume B: Linear Triatomic Molecules

**Part 8:** CHSi (HCSi), CIHNe (NeHCl), CIHCl (CIHCl\(^-\)), FHO (FHO), FHO\(^+\) (FHO\(^+\)), F\(_2\)H\(^-\) (FHF\(^-\)), FN\(_2\)\(^+\) (FNN\(^+\)), HN\(_2\)\(^+\) (HNH\(^+\)), HNSi (HNSi), HOSi\(^+\) (HOSi\(^+\)), N\(_2\)S (NNS), NOP (PNO), NOSi (NSiO), NOSi (SiNO), NOSi (SiON)

### Introduction

(Specific comments related to some of the molecules considered in the previous subvolumes II/20B1 ... 6 are retained in the present introduction due to their possible general applicability)

VIII Contents

VI.8.3 Line coupling .......................................................... XL
VI.8.4 Temperature dependence of broadening ........................... XL
VI.9  Einstein coefficient of spontaneous emission .................. XLI
VI.10 Rotational state transfer .............................................. XLI
VII Renner-Teller effect (some aspects) ................................. XLII
VIII  Some functional relations specially applicable to the molecular constants of CO₂ ........................................... XLIV
VIII.1 Designations of the energy levels of CO₂ .......................... XLIV
VIII.2 Resonances in CO₂ ..................................................... XLIV
VIII.3.1 Potential-energy function (PEF) .................................. XLVII
VIII.3.2 Interaction potential ................................................. XLVII
VIII.4.1 Dipole moment ....................................................... XLVIII
VIII.4.2 Transition dipole moment .......................................... XLVIII
VIII.5 HITELOR (High Temperature Low Resolution data base) .... XLI
VIII.6 Line mixing ............................................................. XLI
VIII.7 Several functional relations in which effects of collisions are included .................................. LI
VIII.7.1 Collisional broadening .............................................. LI
VIII.7.2 Binary absorption coefficient .................................... LI
VIII.7.3 Normalized absorption coefficient ............................... LI
VIII.7.4 Collision induced contribution in the band intensity ....... LII
VIII.8 Self broadening and its temperature dependence ............... LII
VIII.9 Foreign gas broadening ............................................... LII
VIII.10 Transmittance at the center of a spectral line ................ LII
VIII.11 Line mixing (temperature and pressure dependence) ......... LIII
VIII.11.1 Temperature dependence of line mixing ............... LIII
VIII.11.2 Pressure dependence of line mixing ............................ LIII
VIII.12 Some formulas for the absorption coefficient \( K(v) \) ........... LIII
VIII.12.1 Impact approximation .............................................. LIII
VIII.12.2 First order theory of Rosenkrantz ............................. LIV
VIII.13 CO₂ laser wave guide amplification and power saturation LIV
IX  Some symbolism appearing in \( N_2O \) data ............................. LV
X Some symbolism appearing in \( CO_2^+, CFeO, CFeO^+ \), CNN, CNO and CNO⁻ data ............................. LVIII
X.1 Aspects of some notations in polyatomic molecules .......... LVIII
X.2 \( CO_2^- \) ............................................................... LVIII
X.3 CFeO for which the electronic ground state is \( \Sigma^+ \) ....... LXXX
X.4 CNN (NCN) ............................................................ LXXX
XI Some functional relations for CS₂, CSe₂ and C₂N molecules and ions ................................................... LXXVI
XI.1 CS₂ (SCS) and CSe₂ (SeCSe) ........................................... LXXVI
XI.2 C₂N (CCN) and C₂N (CNC) ............................................ LXXVI
XII Some symbolism appearing in \( C_2H \) ................................. LXXXII
XIII List of symbols ........................................................ LXXXIII

Data for B1 ... B7

1 \( HC\)I\( H^+ \) (\( HBCI^+ \)) ................................................. see subvolume II/20B1
40.1 \( ^{12}C^{16}\)O\( ^{16}\)O\( ^{12}\)C\( ^{16}\)O ........................................ see subvolume II/20B2α
40.2 ... 40.14 \( ^{12}C^{16}\)O\( ^{17}\)O (\( ^{16}\)O\( ^{12}\)C\( ^{17}\)O) ... \( ^{14}C^{18}\)O\( ^{18}\)O (\( ^{18}\)O\( ^{14}\)C\( ^{18}\)O) ........................................ see subvolume II/20B2β
41.1 ... 41.12 \( ^{14}N^{14}\)N\( ^{16}\)O (\( ^{14}\)N\( ^{14}\)N\( ^{16}\)O) ... \( ^{15}N^{15}\)N\( ^{18}\)O (\( ^{15}\)N\( ^{15}\)N\( ^{18}\)O) .................. see subvolume II/20B3
42 COO⁻ (OOC⁻) ... 50 CNO⁻ (NCO⁻) ................................... see subvolume II/20B4
51 CS₂ (SCS) ... 58 C₂N⁻ (CNN⁻) ........................................ see subvolume II/20B5
59 \( C_2H \) (CCH) .......................................................... see subvolume II/20B6
60.1 \( C_3H^+ \) (HCC⁺) ... 66.1 \( C_3^+ \) (CCC⁺) ............................ see subvolume II/20B7

Tables for B8

67.1 CHSi (HCSi) ... 81.1 NOSi (NSiO), NOSi (SiNO), NOSi (SiON) .................. 1
