28th International Cosmic Ray Conference

Proceedings of the 28th International Cosmic Ray Conference
held on July 31 - August 7, 2003,
at Tsukuba, Japan

Under the auspices of the International Union of Pure and Applied Physics (IUPAP)

Contributed Papers
Volume 4
OG Sessions 1.1 - 2.2

FRONTIERS SCIENCE SERIES NO. 41

Edited by

T. Kajita
Institute for Cosmic Ray Research, the University of Tokyo

Y. Asaoka
Institute for Cosmic Ray Research, the University of Tokyo

A. Kawachi
Institute for Cosmic Ray Research, the University of Tokyo

Y. Matsubara
Solar-Terrestrial Environment Laboratory, Nagoya University

M. Sasaki
Institute for Cosmic Ray Research, the University of Tokyo

Universal Academy Press, Inc.
Tokyo, Japan
Contents

Vol. 4 / 7

Preface
T. Kajita

Contents

OG: Cosmic Ray Origin and Galactic Phenomena

OG1: Direct Measurements and Origin of Cosmic Rays

OG 1.1 Cosmic rays observed with balloons and satellites

Protons with Energy E>70 MeV Trapped in the Earth’s Radiation Belts
Bruna Bertucci for the AMS-01 Collaboration

Leptons with E>200 MeV Trapped in the Earth’s Radiation Belts Observed with the AMS Experiment
Bruna Bertucci for the AMS-01 Collaboration

Search for Doubly Charged Anomalously Heavy Nuclei with AMS Detector in Space
Vitali Choutko for the AMS-01 Collaboration

Cosmic Ray Flux Measurements Made by MARIE in Mars Orbit
Kerry T. Lee et al.

Extended Energy Spectrum Measurements of Elements with the Cosmic Ray Isotope Spectrometer (CRIS)
Allan Wayne Labrador et al.

New Measurements of the Li, Be, and B Isotopes as a Test of Cosmic Ray Transport Models
Georgia A. de Nolfo et al.
Measurements of the Ultra-Heavy Galactic Cosmic-Ray Abundances between Z=30 and Z=40 with the TIGER Instrument

Jason T. Link et al. 1781

Observation of Atmospheric Antiproton with BESS

Kazuhiro Yamato for the BESS Collaboration 1785

Measurement of the Cosmic-Ray Antiproton Energy Spectrum with HEAT-pbar

Simon Swordy et al. 1789

Detecting $^3$H with the BESS Spectrometer

Zachary D. Myers and E.S. Seo 1793

Search for Cosmic-Ray Antideuteron with the BESS Spectrometer

Hideyuki Fuke for the BESS Collaboration 1797

Measurement of the Deuterium Flux in the Kinetic Energy Range 12-22 GeV/n with the CAPRICE98 Experiment

Elena Vannuccini for the WiZard/CAPRICE Collaboration 1801

Cosmic Ray $^3$He and $^4$He Spectra from BESS 98

Zachary D. Myers and E.S. Seo 1805

Measurement of High Energy $^3$He in Cosmic Rays by the CAPRICE98 Balloon Experiment

Emiliano Mocchiutti for the WiZard/CAPRICE Collaboration 1809

Measurement of Electron Spectrum to High Energies with the BESS-1999 Experiment

Thomas Hams et al. 1813

High Energy Cosmic Ray Electron Spectra Measured from the ATIC Balloon Experiment

Jin Chang for the ATIC Collaboration 1817

Observations of Primary Electrons with an Emulsion Chamber by Automatic Scanning Method

Yoshihiro Sato et al. 1821

Cosmic-Ray Proton and Helium Spectra Measured with BESS-TeV

Sadakazu Haino for the BESS Collaboration 1825

Rigidity Spectra of Protons and Helium as Measured in the First Flight of the ATIC Experiment

Victor I. Zatsepin et al. 1829
Atic Experiment: Elemental Spectra from the Flight in 2000
Hoseok Ahn for the ATIC-1 Collaboration ........................................ 1833

Primary Proton and Helium Spectra Observed by RUNJOB Collaboration
Makoto Hareyama for the RUNJOB Collaboration ................................. 1837

The Proton Spectrum in the 0.1-100 TeV Energy Range
Obtained from Direct Measurements of the All-Particle Spectrum
Ekaterina D. Tolstaya and N.L. Grigorov ......................................... 1841

The Origin of Galactic Cosmic Ray Protons
Ekaterina D. Tolstaya and N.L. Grigorov ......................................... 1845

The ATIC Science Flight in 2002-03: Description and Preliminary Results
John P. Wefel et al. ........................................................................... 1849

Atic Experiment: Preliminary Results from the Flight in 2002
Hoseok Ahn for the ATIC-2 Collaboration ............................................. 1853

Experience of Application of Silicon Matrix as a Charge Detector in the ATIC Experiment
Victor I. Zatsepin et al. ........................................................................ 1857

Comparison of Measured and Simulated Albedo Signals in the ATIC Experiment
Victor I. Zatsepin et al. ........................................................................ 1861

Heavy Primary Spectrum Obtained by “Jet Trigger” Method
Masakatsu Ichimura for the RUNJOB Collaboration .............................. 1865

Relative Abundances and Energy Spectra of C, N, and O as Measured by the Advanced Thin Ionization Calorimeter Balloon Experiment
Ali Reza-Fazely et al. ........................................................................... 1869

Energy Spectra and Relative Abundances of Heavy Cosmic-Ray Nuclei around 1 TeV/Nucleon
Dietrich Muller et al. ............................................................................ 1873

Primary Heavy Components Spectra and 2-ry/1-ry Ratio Observed by RUNJOB Collaboration
S. Kuramata for the RUNJOB Collaboration ......................................... 1877

The CAKE Balloon Experiment
Stefano Cecchini et al. .......................................................................... 1881

All Particle Spectrum, Average Mass from RUNJOB Data
L. G. Sveshnikova for the RUNJOB Collaboration ............................. 1885
The GCR All-Particle Spectrum in the 0.1-100 TeV Energy Range
Ekaterina D. Tolstaya and N.L. Grigorov ............................... 1889

OG 1.2 Cosmic ray source composition

A Possible Causal Relation of the Source Composition of Cosmic Rays with the Elemental Depletion in the Interstellar Space
Kunitomo Sakurai ............................................................... 1895

Refractory Nuclides in the Cosmic-Ray Source
M. E. Wiedenbeck et al. ......................................................... 1899

Confidence Levels for Distinguishing Galactic Cosmic-Ray Source Models
B. A. Weaver and A.J. Westphal ............................................ 1903

Acceleration of the Cosmic Rays by Stellar Collapse
Volodymyr Kryvdyk ............................................................... 1907

Search for an Evidence of Fermi Acceleration for SNR in a Time Dependence of Metal Abundance
Satoko Osone ................................................................. 1911

OG 1.3 Cosmic ray propagation

Propagation of Light Elements in the Galaxy
Igor V. Moskalenko et al. ......................................................... 1917

Antiprotons in CR: What Do They Tell Us?
Igor V. Moskalenko et al. ......................................................... 1921

GALPROP: New Developments in CR Propagation Code
Frank C. Jones et al. ............................................................... 1925

Dissipation of Hydromagnetic Waves on Energetic Particles: Impact on Interstellar Turbulence and Cosmic Ray Transport
Frank C. Jones et al. ............................................................... 1929

On Fluctuations of Cosmic Rays in the Galaxy with Random Supernova Outbursts
Eun-Suk Seo et al. ................................................................. 1933

A New Thought on the Energy Dependence of the \(^{10}\text{Be}/^{9}\text{Be}\) Ratio
Manfred Simon and A. Molnar ............................................... 1937
Cosmic-Ray Propagation and the Energy Spectra Observed on Earth
Makoto Hareyama et al. .................................................. 1941
Abundance Ratio of Secondary to Primary Expected from the Boundaryless Galaxy Model
Makoto Hareyama et al. .................................................. 1945
Propagation of Radioactive Secondaries in Cosmic Rays
Toru Shibata, T. Ito, and M. Hareyama ................................ 1949
Stable and Radioactive Nuclei in a Diffusion Model
Fiorenza Donato, D. Maurin, and R. Tailliet .......................... 1953
Calculation of Elemental and Isotopic Abundance of Cosmic Rays Using Markov Stochastic Theory: The Effect of Local Superbubble
Ashraf M. Farahat et al. .................................................... 1957
Atmospheric and Galactic Production and Propagation of Light Antimatter Nuclei
Michel J. Buenerd et al. .................................................... 1961
The Growth of Parker Instability with the Effect of Cosmic-Ray Diffusion
Takuhito Kuwabara, K.E. Nakamura, and C.M. Ko ...................... 1965
Evaluation of Production Cross Sections of Li, Be, B in CR
Igor V. Moskalenko and S.G. Mashnik .................................. 1969
The Flux of Cosmic-Ray Deuterons in Simplified Propagation Models
Eun-Suk Seo and V. S. Ptuskin ............................................ 1973
The Size of Collecting Regions in the Galactic Disk for Proton, Beryllium, Carbon and Iron Cosmic Rays
Antonio Codino and F. Plouin ........................................... 1977
First Results of a New Cosmic Ray Propagation Code
Ingo Buesching et al. ..................................................... 1981
A New Propagation Code for Cosmic Ray Nucleons
Ingo Buesching et al. ..................................................... 1985
Stochastic Effects on the Electron Spectrum above TeV Energies
Simon P. Swordy .......................................................... 1989
The Origin of High Energy Cosmic-Ray Electrons and Nearby Supernova Remnants
Kenji Yoshida et al. ....................................................... 1993
Second-Order Fermi Acceleration in the Interstellar Medium and Its Effects on Cosmic-Ray Electrons
Yoshiko Komori .................................................. 1997

The Local Interstellar Spectrum of Cosmic Ray Electrons
Diego Casadei and V. Bindi .................................. 2001

OG 1.4 Acceleration of cosmic rays

The Cosmic Rays and Gamma-Quanta Local Sources Spectra Distinction and Formation of Uniform Cosmic Ray Spectrum
Vera Georgievna Sinitysria and S.I. Nikolsky .................. 2007

Variational Principle for Fokker-Planck Cosmic Rays Transport Equation
Osman H. Burgoa .................................................. 2011

First-Order Fermi Particle Acceleration at Relativistic Shock Waves with a ‘Realistic’ Magnetic Field Turbulence Model
Jacek Niemiec and M. Ostrowski ................................ 2015

Cosmic Ray Acceleration at Parallel Relativistic Shocks in the Presence of Finite-Amplitude Magnetic Field Perturbations
Jacek Niemiec and M. Ostrowski ................................ 2019

Monte Carlo Simulations of Electron Acceleration in Parallel Relativistic Shocks
Rami O. Vainio and J. Virtanen .................................. 2023

Electron and Proton Acceleration in SNR
Paolo Lipari and Giovanni Morlino ................................ 2027

Cosmic Ray Acceleration by Spiral Shocks in the Galactic Wind
Heinrich J. Voelk and V.N. Zirakashvili ......................... 2031

Simulating Particle Acceleration in Modified Shocks Using a New Coarse-Grained Finite Momentum-Volume Scheme
Thomas W. Jones and H. Kang .................................. 2035

Cosmic Ray Acceleration at Quasi-Parallel Plane Shocks
Hyesung Kang and T.W. Jones .................................. 2039

A Plasma Sheet as a Source of Non-Thermal Particles—Relativistic Magnetic Reconnection and Relativistic Drift Kink Instability in $e^\pm$ Plasmas
Seiji Zenitani and M. Hoshino .................................. 2043

Dazhuang Zhou et al. .................................................... 2263

OG2: X-Ray and Gamma Ray Measurements

OG 2.1 Diffuse galactic emission

Preliminary Evidence for TeV Gamma Ray Emission from the Galactic Plane Using the Milagro Detector
Gus Sinnis for the Milagro Collaboration ............................. 2269
Upper Limit on the Diffuse Gamma Ray Flux Using Air Shower Observations at Ooty
Yoshio Hayashi for the GRAPES Collaboration ........................................ 2273

MHD Simulations of Magnetic Reconnection in the Galaxy:
The Origin of Diffuse X-Ray Gas and High Energy Particles
Syuniti Tanuma and K. Shibata ............................................................. 2277

Predictions for the Magnitude of the Galactic Plane Excess at TeV Gamma Ray Energies
Anatoly D. Erlykin and A.W. Wolfendale ............................................... 2281

Diffuse Gamma Rays from the Galactic Plane in the TeV Region
Nobuhito Tateyama and J. Nishimura ...................................................... 2285

Galactic Gamma-Ray Halo of the Nearby Starburst Galaxy NGC 253
Tatsuo Yoshida et al. ................................................................................. 2289

Search for Extremely High Energy Gamma Rays with the KASCADE Experiment
Gerd Schatz for the KASCADE Collaboration ............................................ 2293

Gamma-Ray Energy Spectra through Decays of Neutral Pions Produced in Proton-Proton Interactions
Ching-Yuan Huang .................................................................................. 2297

Diffused Gamma-Rays and the Cosmic-Ray Propagation
Toru Shibata et al. ..................................................................................... 2301

Search for Diffuse Gamma Rays from the Galactic Plane in Multi-TeV Region with the Tibet Air Shower Array
Yoshiaki Yamamoto for the Tibet ASgamma Collaboration ....................... 2305

Evaluation of Models for Diffuse Continuum Gamma Rays in EGRET Range
Olaf Reimer, A.W. Strong, and I.V. Moskalenko ....................................... 2309

OG 2.2 Galactic sources (e.g. supernova remnants, pulsars, binaries)

A Wide Sky Survey for TeV γ-Ray Sources by Using the Tibet-III Air Shower Array
Shuwang Cui for the Tibet ASgamma Collaboration .................................... 2315

Scans of the TeV Gamma-Ray Sky with the HEGRA System of Cherenkov Telescopes
Gerd Puehlhofer for the HEGRA Collaboration ......................................... 2319
Observation of Galactic TeV Gamma Ray Sources with H.E.S.S.
Conor P. Masterson for the H.E.S.S. Collaboration .......................... 2323

Search for Discrete Sources of Gamma-Rays (E$\geq$30 TeV) with the GRAPES-3 Experiment
Dhirendra K. Mohanty for the GRAPES Collaboration .......................... 2327

TeV Observations of Selected GeV Sources with the HEGRA IACT-System
Gavin Peter Rowell for the HEGRA Collaboration .............................. 2329

Studies of Gamma Radiation above $10^{14}$ eV from Hadronless Air Shower at Chacaltaya
Rolando Daniel Ticona et al. .................................................. 2333

On the Origin of the 'Identified' and 'Unidentified' Gamma Ray Sources
Arnold W. Wolfendale and A.D. Erlykin ....................................... 2337

EGRET Observations of Galactic Relativistic Jet Sources
Olaf Reimer and A. Iyudin ...................................................... 2341

The New Unidentified TeV Source in Cygnus (TeV J2032+4130): HEGRA IACT-System Results
Gavin Peter Rowell for the HEGRA Collaboration .............................. 2345

Can One See Gamma Rays from the Single Source Responsible for the Knee?
Anatoly D. Erlykin and A.W. Wolfendale ...................................... 2349

Can Gamma Ray Astronomy Disprove the Hypothesis That Cosmic Rays Originate in Supernova Remnants?
Arnold W. Wolfendale and A.D. Erlykin ....................................... 2353

Search for VHE Gamma Ray Emission from SNRs with the Data of Tibet AS$\gamma$ III
Shuwang Cui for the Tibet ASgamma Collaboration ............................ 2357

Chandra ACIS X-Ray Observations of the Cygnus Loop
Denis A. Leahy ................................................................. 2361

Cosmic Rays and Gamma-Rays from the Pulsar in Cyg OB2
Wlodek Bednarek .............................................................. 2365

Observed and Expected TeV Gamma-Ray Emission from Geminga and Tycho's Supernova Remnants
Vera Yurievna Sinitsyna et al. ................................................. 2369

Studies of the Crab Nebula Based upon 400 Hours of Observations with the HEGRA System of Cherenkov Telescopes
Dieter Horns for the HEGRA Collaboration ................................. 2373
A Search for Pulsed TeV Gamma-Ray Emission from the Crab Pulsar Using the Whipple High Resolution GRANITE III Camera

Stephen Gammell for the VERITAS Collaboration ........................................ 2377

Preliminary Results on the Flux of TeV $\gamma$-Rays from Crab System Obtained with the PACT at Pachmarhi

Bannanje Sripathi Acharya et al. .......................................................... 2381

An Understanding of the Non-Thermal Radiation from the Crab Nebula

S. Alfred Stephens and R.E. Streitmatter ................................................. 2385

Observation of VHE Gamma Rays from the Remnant of SN 1006 with HEGRA CT1

Nadia Tonello for the HEGRA Collaboration ............................................. 2389

Evidence of a Curved Cosmic-Ray Electron Spectrum in the Supernova Remnant SN 1006

Glenn E. Allen, J.C. Houck, and S.J. Sturner .......................................... 2393

TeV Gamma-Ray Observations of the Supernova Remnant RCW86 with the CANGAROO-II Telescope

Shio Watanabe for the CANGAROO Collaboration .................................... 2397

Non-Thermal and Supra-Thermal X-Rays from the Northeast Shell of W28

Masaru Ueno, A. Bamba, and K. Koyama .................................................. 2401

Observation of Multi-TeV Gamma Rays from the Shell-Like SNR GC40.5-0.5 Using the Tibet Air Shower Array

Jilong Zhang for the Tibet ASgamma Collaboration .................................... 2405

Observation of Sub-TeV Gamma-Rays from RX J0852.0—4622 with the CANGAROO-II Telescope
