28th International Cosmic Ray Conference

Proceedings of the 28th International Cosmic Ray Conference held on July 31 - August 7, 2003, at Tsukuba, Japan

Under the auspices of the International Union of Pure and Applied Physics (IUPAP)

Contributed Papers

Volume 5

OG Sessions 2.3–3.5

FRONTIERS SCIENCE SERIES NO. 41

Edited by

T. Kajita
Institute for Cosmic Ray Research, the University of Tokyo

Y. Asaoka
Institute for Cosmic Ray Research, the University of Tokyo

A. Kawachi
Institute for Cosmic Ray Research, the University of Tokyo

Y. Matsubara
Solar-Terrestrial Environment Laboratory, Nagoya University

M. Sasaki
Institute for Cosmic Ray Research, the University of Tokyo

Universal Academy Press, Inc.
Tokyo, Japan
Contents

Vol. 5 / 7

Preface
T. Kajita

Contents

OG 2.3 Extra-galactic sources (e.g. active galactic nuclei, clusters of galaxies)

Observations of 54 Active Galactic Nuclei with the HEGRA Cherenkov Telescopes
Martin Tluczykont for the HEGRA Collaboration 2547

Observations of Active Galactic Nuclei by the Solar Tower Atmospheric Cherenkov Effect Experiment (STACEE)
Corbin E. Covault et al. 2551

An AGN Observation Catalogue for the MAGIC Cherenkov Telescope
Robert Wagner for the MAGIC Collaboration 2555

Highlights from 6 Years of TeV Gamma-Ray Astrophysics with the HEGRA Imaging Cherenkov Telescopes
Goetz Heinzelmann for the HEGRA Collaboration 2559

Whipple Telescope Observations of Potential TeV Gamma-Ray Sources Found by the Tibet Air Shower Array
Gary P. Walker for the VERITAS Collaboration 2563

VHE Observations of BL Lacertae Objects: 1995-2000
Deirdre Horan for the VERITAS Collaboration 2567

Search for Very High Energy Gamma Rays from an X-Ray Selected Blazar Sample
Jamie Holder 2571

First Results from Southern Hemisphere AGN Observations Obtained with the H.E.S.S. VHE Gamma-Ray Telescopes
Arache Djannati-Atai for the H.E.S.S. Collaboration 2575
Search for TeV Emission at the Location of Milagro Sky Survey Hot Spot Using the Whipple Gamma-Ray Telescope
Kenneth Gibbs for the VERITAS Collaboration ................................ 2579

Monitoring the Northern Sky for Sources of TeV Gamma Rays
Gus Sinnis for the Milagro Collaboration ........................................... 2583

TeV Gamma-Ray Observations of Southern Hemisphere BL Lacertae Objects with CANGAROO-II/III Telescope
Tomokazu Nakase for the CANGAROO Collaboration ............................. 2587

Extra-Galactic Sources 1739+522, 3c454.3, NGC1275, Mkn501, Mkn421 - Spectra and Images
Vera Georgievna Sinitsyna et al. .......................................................... 2591

Observation of Multi-TeV Gamma Rays from Mrk 421 and Search for Other BL Lac Objects with the Tibet-III Air Shower Array
Kazumasa Kawata for the Tibet ASgamma Collaboration ........................ 2595

Intensive TeV Gamma-Ray and X-Ray Observations of the Blazar Mrk 421 in December 2002 and January 2003
Paul Francis Rebillot for the VERITAS Collaboration ............................ 2599

Hourly Spectral Variability of Mrk 421
Frank Krennrich for the VERITAS Collaboration .................................. 2603

Eric Nuss for the CELESTE Collaboration ........................................... 2607

Modeling the IR De-Absorbed γ-Ray Spectra of TeV BL Lacs
Alexander K. Konopelko et al. .............................................................. 2611

Study of the VHE Gamma Ray Emission from the AGN 1ES1959+650 with the HEGRA Cherenkov Telescope CT1
Nadia Tonello for the HEGRA Collaboration ......................................... 2615

Whipple Observations of 1ES1959+650: An Update
Jamie Holder ......................................................................................... 2619

The Giant Radio Galaxy M87 as a TeV γ-Ray Emitter Observed with the HEGRA Cherenkov Telescopes
Niels Goetting for the HEGRA Collaboration ........................................ 2623

Observation of M87 with the Whipple 10m Telescope
Stephan L. LeBohec for the VERITAS Collaboration .............................. 2627

M87 as a Misaligned Synchrotron-Proton Blazar
Anita Reimer, R.J. Protheroe, and A.-C. Donea .................................... 2631
Observations of Starburst Galaxies
Tomoyuki Nagai for the VERITAS Collaboration .......................... 2635

The Radial Distribution of SNRs in Nearby Galaxies
Manami Sasaki and D. Breitschwerdt ........................................ 2639

VHE γ-Rays from Extragalactic Large Scale Jets
Lukasz Stawarz, M. Ostrowski, and M. Sikora ............................. 2643

Observations of H1426+428 from 1999 to 2002 with the Whipple
Observatory 10 m Telescope
Deirdre Horan for the VERITAS Collaboration .............................. 2647

High Energy Emission from H1426+428 and Absorption on the
Extragalactic Background Light
Dieter Horns for the HEGRA Collaboration .................................. 2651

Evolution of Intracluster Cosmic Rays and Gamma-Ray
Emission
Shin-ya Tsubaki, Tetsu Kitayama, and Katsuhiko Sato .................... 2655

Observation of 3EG J1234-1318 with the CANGAROO-II
Telescope
Takahiro Hattori for the CANGAROO Collaboration ......................... 2659

Evolution and Properties of the Intracluster Medium in the
Presence of Cosmic Ray Sources
Hyesung Kang, D. Ryu, and P.L. Biermann .................................. 2663

Intrinsic Spectra of the TeV Blazars Mrk 421 and Mrk 501
Frank Krennrich and Eli Dwek ................................................. 2667

Absorption of GeV and TeV γ-Rays in M87 and 3C 273
Alina C. Donea ................................................................. 2671

A Hadronic Model for Gamma-Ray Loud Quasars,
Alina Catalina Donea and R.J. Protheroe .................................. 2675

Search for TeV Annihilation Radiation from Supersymmetric
Dark Matter in Nearby Galaxies
Vladimir V. Vassiliev ......................................................... 2679

Modeling Particle Acceleration in AGN’s
Paolo Lipari and Giovanni Morlino ......................................... 2683

A New Estimate of the Extragalactic Gamma-Ray Background
from EGRET Data
Olaf Reimer, A.W. Strong, and I.V. Moskalenko .......................... 2687
OG 2.4 Gamma ray bursts

Spectral Properties of “Classical” GRBs Seen by HETE-2 Satellite
Atsumasa Yoshida et al. ........................................ 2693

Timing Properties of GRBs Detected by HETE-2
Motoko Suzuki et al. ........................................ 2697

GRB with INTEGRAL
Nicolas Produit ........................................ 2701

Expected Event Rate of Subhundred-GeV Gamma Ray Bursts Using the Tibet-III Air Shower Array with Single Particle Counting Technique
Harufumi Tsuchiya for the Tibet ASgamma Collaboration .......... 2705

Search for Sub-TeV Gamma Rays Coincident with BATSE Gamma Ray Bursts
Christopher P. D’Andrea et al. .................................. 2709

Search for Neutrinos from Gamma-Ray Bursts Using Super-Kamiokande
Dusan Turcan for the Super-Kamiokande Collaboration ............. 2713

Searching for High Energy Muon Neutrinos from Gamma-Ray Bursts with AMANDA
Gary Hill for the AMANDA Collaboration .......................... 2717

The Compton Trail of Gamma-Ray Bursts: Constraints on the Galactic Frequency of GRBs
Etienne Parizot and D. Allard .................................. 2721

X-Ray and Gamma Ray Bursts from Collapsing Stars
Volodymyr Kryvdyk ........................................ 2725

The Log-Normal Distributions of Coronal Mass Ejection-Related Solar Flares and the Flare/CME Model of Gamma-Ray Bursts
Seiichiro Aoki, S. Yashiro, and K. Shibata .......................... 2729

General Relativistic MHD Simulations of the Gravitational Collapse of a Rotating Star with Magnetic Field as a Model of Gamma-Ray Bursts
Yosuke Mizuno et al. ........................................ 2733
Observations of Gamma-Ray Bursts by HETE-2
Nobuyuki Kawai for the HETE Science Team .......................... 2737

Prompt Gamma-Ray Burst Alert System of the HETE-2
Spacecraft
Toru Tamagawa et al. .................................................. 2741

In-Orbit Calibration and Performance of the HETE-2 WXM
Yuji Shirasaki et al ...................................................... 2745

Early Optical Afterglow Spectra of GRB021004 by Kiso
Observatory
Yuji Urata et al .......................................................... 2749

The MAGIC Telescope and the Observation of Gamma Ray
Bursts
Denis Bastieri for the MAGIC Collaboration ......................... 2753

Search for TeV GRBs Using the Tibet-III ASγ Data
Xunxiu Zhou for the Tibet ASgamma Collaboration ................. 2757

Analysis of Single Particle Rates from the ARGO-YBJ
Experiment
Piero Vallania for the ARGO-YBJ Collaboration .................... 2761

Gamma-Ray Burst Events Observed by SZ2/XD in 2001
Huanyu Wang et al ...................................................... 2765

OG 2.5 Instrumentation and new projects

Monitor of All-Sky X-Ray Image(MAXI) Mission
Mitsuhiro Kohama et al ................................................. 2771

The Hard X-Ray Modulation Telescope HXMT
Tipei Li et al .............................................................. 2775

Performance of Newly Developed Hard X-Ray Polarimeter with
Multianode PMT
Shuichi Gunji et al ....................................................... 2779

The INTEGRAL Mission
Nicolas Produit .......................................................... 2783

Radiation Hardness Tests of CsI(Tl) Crystals for the GLAST
Electromagnetic Calorimeter
Per Carlson et al .......................................................... 2787
Scientific Performance of the CALET Instrument for the 20MeV-10TeV Gamma-Ray Observation
Kenji Yoshida for the CALET Collaboration ........................................... 2791

Using GHz FADCs to Reject Hadrons from STACEE Data
Jeffrey A. Zweerink for the STACEE Collaboration ................................. 2795

Optimized Pointing Strategies for Solar Tower ACTs
Richard Allen Scalzo et al. ................................................................. 2799

The VERITAS Prototype
Scott P. Wakely for the VERITAS Collaboration .................................. 2803

Status of CANGAROO-III
Ryoji Enomoto et al. ............................................................................. 2807

Status of the H.E.S.S. Project
Werner Hofmann for the H.E.S.S. Collaboration .................................. 2811

Status of the MAGIC Telescope
Manel Martinez for the MAGIC Collaboration ..................................... 2815

The Technical Performance of the HEGRA IACT System
Gerd Puehlhofer for the HEGRA Collaboration .................................... 2819

The VERITAS Atmospheric Čerenkov Telescopes: Positioner, Optics and Associated Components
Kenneth Gibbs et al. ............................................................................ 2823

The VERITAS Flash ADC Electronics System
Paul Francis Rebillot et al. ................................................................. 2827

Calibration Systems for the VERITAS Observatory
David B. Kieda et al. .......................................................................... 2831

Signal Cable Selection for the VERITAS Observatory
David B. Kieda et al. .......................................................................... 2835

VERITAS Data Acquisition and Analysis Systems
Scott P. Wakely et al. .......................................................................... 2839

Control Software for the VERITAS Čerenkov Telescope System
Kenneth Gibbs et al. ............................................................................ 2843

Performance of the VERITAS-4 Array
S. J. Fegan, J. Hall, and V.V. Vassiliev ............................................... 2847

VERITAS CFDs
Vladimir V. Vassiliev et al. ................................................................. 2851
Performance of the Reflector of the CANGAROO-III Imaging Atmospheric Cherenkov Telescope
  Michiko Ohishi for the CANGAROO Collaboration .................................. 2855

Performance of the Atmospheric Cherenkov Imaging Camera for the CANGAROO-III Experiment
  Shigeto Kabuki for the CANGAROO Collaboration .................................. 2859

Development of the Stereoscopic Data Acquisition System of the CANGAROO-III Telescope
  Hidetoshi Kubo for the CANGAROO Collaboration .................................. 2863

Development of Stereoscopic Control System for the CANGAROO-III Telescopes
  Seiichi Hayashi for the CANGAROO Collaboration .................................. 2867

Absolute Number Calibration of Photoelectrons of Photomultiplier Tubes Using the Nature of Statistical Distribution
  Fumiyoshi Kajino et al. ................................................................. 2871

Mirror Alignment and Performance of the Optical System of the H.E.S.S. Imaging Atmospheric Cherenkov Telescopes
  Rene Cornils for the H.E.S.S. Collaboration .................................... 2875

Atmospheric Monitoring for the H.E.S.S. Project
  Roland Le Gallou for the H.E.S.S. Collaboration .................................. 2879

Implications of LIDAR Observations at the H.E.S.S. Site in Namibia for Energy Calibration of the Atmospheric Cherenkov Telescopes
  Paula M. Chadwick for the H.E.S.S. Collaboration .................................. 2883

Performance of the H.E.S.S. Cameras
  Pascal Vincent et al. ................................................................. 2887

The Central Data Acquisition System of the H.E.S.S. Telescope System
  Stefan Schlenker for the H.E.S.S. Collaboration .................................. 2891

Calibration Results for the First Two H.E.S.S. Array Telescopes
  Nicolas Leroy et al. ................................................................. 2895

Arcsecond Level Pointing of the H.E.S.S. Telescopes
  Conor P. Masterson for the H.E.S.S. Collaboration .................................. 2899

Study of the Performance of a Single Stand-Alone H.E.S.S. Telescope: Monte Carlo Simulations and Data
  Alexander K. Konopelko for the H.E.S.S. Collaboration ......................... 2903

Selection Strategies for Low Energy Events in Imaging Atmospheric Čerenkov Telescopes
   Stephen James Gammell et al. .......................... 2967

First Operation of SGARFACE, a Ground Based Experiment to Search for γ-Ray Bursts of Energies Larger than 200MeV with Durations of less than 100μs
   Stephan L. LeBohec et al. .......................... 2971

A Novel Alternative to UV-Lasers Used in Flat-Fielding VHE γ-Ray Telescopes
   Aristeidis Noutsos for the H.E.S.S. Collaboration ............. 2975

Feasibility of GRB with TeV Gamma Ray All Sky Monitor
   Satoko Osone ........................................ 2979

Development of High-Resolution and High-Speed Camera System for a Čerenkov Telescope Using Image Intensifiers
   Itsuhiro Tada et al. .................................. 2983

Optical Observations of the Crab Pulsar Using the First H.E.S.S. Čerenkov Telescope
   Conor P. Masterson for the H.E.S.S. Collaboration ............. 2987

High Energy Astrophysics by ASHRA
   Naoshi Sugiyama et al. ................................ 2991

The Diamond Compton Recoil Telescope
   Kinya Hibino et al. .................................... 2995

High Altitude Gamma Ray Observatory at Hanle
   Bannanje Sripathi Acharya et al. ........................ 2999

A New Project to Detect GRBs with E > 30 GeV at Mt. Chacaltaya
   Fumio Kakimoto for the BASJE Collaboration ................. 3003

Expected Sensitivity of ARGO-YBJ to Detect Point Gamma-Ray Sources
   Silvia Vernetto for the ARGO-YBJ Collaboration .............. 3007

Algorithms for the Determination of the Primary Particle Direction with ARGO-YBJ Detector
   Daniele Martello for the ARGO-YBJ Collaboration ............ 3011

Identification of Showers with Cores Outside the ARGO-YBJ Detector
   Giuseppe DiSciascio for the ARGO-YBJ Collaboration ........... 3015

Performance of the Tibet-III Air Shower Array
   Munehiro Ohnishi for the Tibet ASgamma Collaboration ......... 3019
An New Method to Determine the Arrival Direction of Individual Air Showers with a Single Air Cherenkov Telescope
Daniel Kranich and L.S. Stark ........................................ 3023

Maximizing Signal Search Sensitivity Using the Likelihood Ratio as Event Weight
Hongbo Hu ................................................................. 3027

OG3: Gravitational Waves

OG 3.1 Gravitational wave sources

Gravitational Waves in Quintessential Inflation
Hiroyuki Tashiro, T. Chiba, and M. Sasaki .......................... 3033

Graviton Production by a Thermal Bath
Dario Grasso ...................................................................... 3037

One-Armed Spiral Instability in Differentially Rotating Stars
Motoyuki Saijo ................................................................... 3041

OG 3.2 Observation and data analysis

New Suggested Strategy for Detecting Gravitational Waves
Maher Melek ..................................................................... 3047

Coincident Event Search Using TAMA300 and LISM Data
Hirotaka Takahashi for the TAMA Collaboration .................. 3051

Search for Gravitational Waves from Ringing-Down Black Holes
Yoshiki Tsunesada for the TAMA Collaboration .................... 3055

Progresses of Search for Gravitational Wave Events Using TAMA300 Data
Nobuyuki Kanda for the TAMA Collaboration ....................... 3059

Current Status of TAMA300 Online Search for Inspiraling Binaries
Daisuke Tatsumi and Y. Tsunesada ..................................... 3063

Search for Burst Gravitational Waves Using TAMA300 Data
Masaki Ando for the TAMA Collaboration ......................... 3067
OG 3.3 Current status of ground based detectors

CLIO Cryogenic Laser Interferometer Observatory
Shinji Miyoki et al. .......................................................... 3073

Laser Interferometer in the Kamioka Mine
Masatake Ohashi et al. ....................................................... 3077

LIGO Detectors and Data Analyses: Current Status and Future Prospects
Erik Katsavounidis for the LIGO Science Collaboration .............. 3081

Report on the Observation Run of TAMA300 in the Spring of 2003
Koji Arai for the TAMA Collaboration .................................. 3085

New AURIGA Cryogenic Suspension System
Michele Giovanni Battista Bignotto for the Auriga Collaboration ... 3089

Current Status of TAMA300
Shuichi Sato for the TAMA Collaboration ................................ 3093

Gravitational Wave Detection by Laser Interferometry on Earth
Albrecht Ruediger ............................................................. 3097

OG 3.4 R&D for advanced detectors

LCGT Project Observing Gravitational Wave Events at 240 Mpc
Kazuaki Kuroda for the LCGT Collaboration .......................... 3103

Measurement of Outgassing from Multi-Layered Insulators for the Cryogenic Laser Interferometer Observatory
Takashi Uchiyama et al. ....................................................... 3107

Mechanical Loss of Reflective Coating at Low Temperature
Kazuhiro Yamamoto et al. .................................................... 3111

Study of Heat Links for a Cryogenic Laser Interferometric Gravitational Wave Detector
Kunihiro Kasahara et al. ...................................................... 3115

Direct Measurement of Scattered Light Effect on the Sensitivity in TAMA300
Ryutaro Takahashi et al. ..................................................... 3119
Dual Detector of Gravitational Waves
Livia Conti et al. ........................................ 3123

Development of a Small Vibration Cryocooler for CLIO
Takayuki Tomaru et al. .................................. 3127

Thermal Conductance through Sapphire-Sapphire Bonding
Toshikazu Suzuki ......................................... 3131

Present Technology for Reduction of Vibration in Cryocooler
Tomiyoshi Haruyama et al. ................................ 3135

RSE Experiment
Kentaro Somiya, P. Beyersdorf, and S. Kawamura .......... 3139

OG 3.5 Other related topics to gravitational wave

Bondi Mass in Scalar Fields
Ching-Yuan Huang ........................................ 3145

Search for Correlations between GW Detectors and the LVD Neutrino Telescope
Walter Fulgione for the LVD Collaboration .................. 3149

Wave Effects in Gravitational Lensing of Gravitational Waves from Chirping Binaries
Ryuichi Takahashi and T. Nakamura .......................... 3153

Geophysical Applications of Laser Interferometers: Long-Term Monitoring Crustal Deformations
Vadim C. Milyukov et al. .................................... 3157

Gravitational Wave Detection by Laser Interferometry in Space – LISA
Albrecht Ruediger ......................................... 3161

Gravitational Wave Detection by Laser Interferometry in Space – The Project ASTROD
Albrecht Ruediger ......................................... 3165

"Contents" and "Presenter Index" have been edited according to the information which authors themselves have written as the paper submittal information.
