CONTENTS

1 Introduction 1
  1.1 Graphs, digraphs, and homomorphisms 1
  1.2 Homomorphisms preserve adjacency 3
  1.3 Homomorphisms generalize colourings 6
  1.4 The existence of homomorphisms 10
  1.5 Homomorphisms generalize isomorphisms 16
  1.6 Homomorphic equivalence 18
  1.7 The composition of homomorphisms 20
  1.8 Homomorphisms model assignments and schedules 27
  1.9 Remarks 33
  1.10 Exercises 34

2 Products and retracts 37
  2.1 The product 37
  2.2 Dimension 40
  2.3 The Lovasz vector and the Reconstruction Conjecture 43
  2.4 Exponential digraphs 46
  2.5 Shift graphs 47
  2.6 The Product Conjecture and graph multiplicativity 50
  2.7 Projective digraphs and polymorphisms 57
  2.8 The retract 58
  2.9 Isometric trees and cycles 60
  2.10 Reflexive absolute retracts 64
  2.11 Reflexive dismantlable graphs 68
  2.12 Median graphs 72
  2.13 Remarks 76
  2.14 Exercises 78

3 The partial order of graphs and homomorphisms 81
  3.1 The partial orders $C$ and $Cs$ 81
  3.2 Representing ordered sets 82
  3.3 Incomparable graphs and maximal antichains in $Cs$ 85
  3.4 Sparse graphs with specified homomorphisms 89
  3.5 Incomparable graphs with additional properties 93
  3.6 Incomparable graphs on $n$ vertices 94
  3.7 Density 96
  3.8 Duality and gaps 98
  3.9 Maximal antichains in $C$ 101
  3.10 Bounds 102
## CONTENTS

3.11 Remarks 106  
3.12 Exercises 107  

### The structure of composition  
4.1 Introduction 109  
4.2 Rigid digraphs 109  
4.3 An excursion to infinity 115  
4.4 The replacement operation 117  
4.5 Categories 122  
4.6 Representation 128  
4.7 A combinatorial obstacle to representation 132  
4.8 Some categories are not rich enough 135  
4.9 Remarks 138  
4.10 Exercises 139  

5 Testing for the existence of homomorphisms 142  
5.1 The .ff-colouring problem 142  
5.2 Dichotomy for graphs 143  
5.3 Digraph homomorphisms and CSPs 151  
5.4 Duality and consistency 161  
5.5 Pair consistency and majority functions 166  
5.6 List homomorphisms and retractions 170  
5.7 Trigraph homomorphisms 178  
5.8 Generalized split graphs 183  
5.9 Remarks 186  
5.10 Exercises 187  

6 Colouring—variations on a theme 192  
6.1 Circular colourings 192  
6.2 Fractional colourings 200  
6.3 T-colourings 210  
6.4 Oriented and acyclic colourings 212  
6.5 Remarks 218  
6.6 Exercises 219
