Regional Scale Ecological Risk Assessment
Using the Relative Risk Model

Edited by
Wayne G. Landis
Chapter 1
Introduction ......................................................................................................................... 1
Wayne G. Landis

Chapter 2
Introduction to the Regional Risk Assessment Using the Relative Risk Model ... 11
Wayne G. Landis and Janice K. Wiegers

Chapter 3
Interactions among Risk Assessors, Decision Makers, and Stakeholders at the Regional Scale: The Importance of Connecting Landscape-Level Endpoints with Management Decisions ............................................................................ 37
P. Bruce Duncan

Chapter 4
Application of the Relative Risk Model to the Fjord of Port Valdez, Alaska ....... 53
Janice K. Wiegers and Wayne G. Landis

Chapter 5
Application of the Relative Risk Model to the Upper Willamette River and Lower McKenzie River, Oregon .......................................................................................................................... 91
Matthew Luxon and Wayne G. Landis

Chapter 6
Codorus Creek Watershed: A Regional Ecological Risk Assessment with Field Confirmation of the Risk Patterns ......................................................................................... 119
Angela M. Obery, Jill F. Thomas, and Wayne G. Landis

Chapter 7
Codorus Creek: Use of the Relative Risk Model Ecological Risk Assessment as a Predictive Model for Decision Making ................................................................. 143
Jill F. Thomas

Chapter 8
Developing a Regional Ecological Risk Assessment: A Case Study of a Tasmanian Agricultural Catchment ................................................................................................. 159
Rachel Walker, Wayne G. Landis, and Philip Brown
Chapter 9
Establishing Conservation Priorities in a Rain Forest Reserve in Brazil:
An Application of the Regional Risk Assessment Method .......................... 179
Rosana Moraes, Wayne G. Landis, and Sverker Molander

Chapter 10
Using the Relative Risk Model for a Regional-Scale Ecological
Risk Assessment of the Squalicum Creek Watershed .............................. 195
Joy C. Chen and Wayne G. Landis

Chapter 11
The Use of Regional Risk Assessment in the Management of the Marine
Resources in the Cherry Point Region of Northwest Washington ................. 231
April J. Markiewicz

Chapter 12
Retrospective Regional Risk Assessment Predictions and the Application of a
Monte Carlo Analysis for the Decline of the Cherry Point Herring Stock .......... 245
Wayne G. Landis, Emily Hart Hayes, and April M. Markiewicz

Chapter 13
Ecological Risk Assessment Using the Relative Risk
Model and Incorporating a Monte Carlo Uncertainty Analysis ..................... 257
Emily Hart Hayes and Wayne G. Landis

Index ............................................................................................................. 291
