Assessment and Control of Hazardous Substances in Water

Selected Proceedings of the 4th IWA Specialised Conference on Assessment and Control of Hazardous Substances in Water (ECOHAZARD2003), held in Aachen, Germany, 14–17 September 2003

Issue Editor: H.Fr. Schröder
Institute of Environmental Engineering, Aachen University, D-52056 Aachen, Germany
## Contents

### Wastewater treatment and reuse

1. Removal of endocrine disrupting compounds with membrane processes in wastewater treatment and reuse  
   T. Wintgens, M. Gallenkemper and T. Melin

9. Efficiency of nanofiltration for the elimination of steroids from water  
   S. Weber, M. Gallenkemper, T. Melin, W. Dott and J. Hollender

15. Removal of hormones and pharmaceuticals in the Advanced Water Recycling Demonstration Plant in Queensland, Australia  
   S.J. Khan, T. Wintgens, P. Sherman, J. Zaricky and A.I. Schäfer

### Special treatment and fate aspects

23. Effects of advanced oxidation processes (AOPs) on the toxicity of a mixture of pharmaceuticals  
   R. Andreozzi, L. Campanella, B. Fraysse, J. Garric, A. Gonnella, R. Lo Giudice, R. Marotta, G. Pinto and A. Pollio

29. Comparison of the behaviour of selected micropollutants in a membrane bioreactor and a conventional wastewater treatment plant  
   M. Clara, B. Strenn, M. Ausserleitner and N. Kreuzinger

37. Combined chemical analyses and biomonitoring at Avedoere wastewater treatment plant in 2002  
   B.N. Jacobsen, D. Kjersgaard, M. Winther-Nielsen and K. Gustavson

45. Acclimation of activated sludge to degrade toxic levels of 2,4-dinitrophenol  
   K.-H. Jo and J. Silverstein

### Industrial wastewaters

51. Heavy metal pollution from Russian landfill leachates and its elimination together with other contaminants  
   S. Kalyuzhnyi and M. Gladchenko

59. A strategy for the assessment of hazardous substances in industrial effluents (IDA)  
   T. Reemtsma and N. Klinkow

67. Combined biological and physico-chemical treatment of baker's yeast wastewater including removal of coloured and recalcitrant to biodegradation pollutants  
   M. Gladchenko, E. Starostina, S. Shcherbakov, B. Versprille and S. Kalyuzhnyi

73. The effect of nitrogen supplementation on the efficiency of colour and COD removal by Malaysian white-rot fungi in textile dyeing effluent  
   K.K. Lee, A.M. Kassim and H.K. Lee

### Chemical and biochemical analytical methods and applications

79. The case of the nonionic alkylphenol ethoxylates in the Mediterranean Sea region: is there a problem?  
   U. Zoller, I. Plaut and M. Hushan

85. BTE-OX biodegradation kinetics with MTBE through bioaugmentation  

93. Analysis and occurrence of estrogen in wastewater in Japan  
   K. Komori, H. Tanaka, Y. Okayasu, M. Yasojima and C. Sato

101. Analysis of the transport of cyanide spill on the Tisza River  
   L. Koncsos and G. Fonyó
Development of automated high-throughput ecotoxicity and genotoxicity test systems and fields of application  A. Eisenträger, C. Brinkmann, K. Michel, S. Hahn, M. Hütter and G. Weber

Derivatisation of 4-nonylphenol and bisphenol A with halogenated anhydrides  A. Stehmann and H.Fr. Schröder

Determination of musks and other fragrance compounds at ng/L levels using CLSA (closed loop stripping analysis) and GC/MS detection  D. Mitjans and F. Ventura

**Endocrine disruptors**

Behaviour of endocrine disrupting chemicals during the treatment of municipal sewage sludge  P. Ivashechkin, P.-F.X. Corvini and M. Dohmann

Behaviour of bisphenol A (BPA), 4-nonylphenol (4-NP) and 4-nonylphenol ethoxylates (4-NP1EO, 4-NP2EO) in oxidative water treatment processes  K. Lenz, V. Beck and M. Führacker

Relevance of the sludge retention time (SRT) as design criteria for wastewater treatment plants for the removal of endocrine disruptors and pharmaceuticals from wastewater  N. Kreuzinger, M. Clara, B. Strenn and H. Kroiss

Analysis of nonylphenol polyethoxylates and their metabolites in water samples by high-performance liquid chromatography with electrospray mass spectrometry detection  E. Martinez, O. Gans, H. Weber and S. Scharf

Mass spectrometric analytical methods for the determination of endocrine disrupting chemicals (EDCs)  A. Stehmann, R.J.W. Meesters and H.Fr. Schröder

Assessing the elimination of estrogenic activity in advanced wastewater treatment with a reporter gene-based bioassay  A. Coors, P.D. Jones, J.P. Giesy and H.T. Ratte

**Persistent polar pollutants**

Occurrence of benzothiazoles in municipal wastewater and their fate in biological treatment  A. Kloepfer, R. Gnirss, M. Jekel and T. Reemtsma

Modelling the degradation of low concentration pollutants in membrane bioreactors  M. Peev, M. Schönerklee and H. De Wever

LC-MS-(MS) determination of oxidative degradation products of nonylphenol ethoxylates, carboxylates and nonylphenols in water  M. Petrovic, P. Gehringer, H. Eschwaeiler and D. Barceló

Perfluorooctane sulfonate – a quite mobile anionic anthropogenic surfactant, ubiquitously found in the environment  R.W.J. Meesters and H.Fr. Schröder

Integrated systems analysis of persistent polar pollutants in the water cycle  E. van der Voet, I. Nikolic, G. Huppes and R. Kleijn
Pharmaceuticals

253 Removal of selected non-steroidal anti-inflammatory drugs (NSAIDs), gemfibrozil, carbamazepine, β-blockers, trimethoprim and triclosan in conventional wastewater treatment plants in five EU countries and their discharge to the aquatic environment
N. Paxéus

261 Bank filtration: a suitable process for the removal of iodinated X-ray contrast media?
S. Schittko, A. Putschew and M. Jekel

269 Carbamazepine, diclofenac, ibuprofen and bezafibrate – investigations on the behaviour of selected pharmaceuticals during wastewater treatment
B. Strenn, M. Clara, O. Gans and N. Kreuzinger

Fate of chemicals in the environment

277 Bioavailability of a nonylphenol isomer in dependence on the association to dissolved humic substances
R. Vinken, A. Höllrigl-Rosta, B. Schmidt, A. Schäffer and P.F.-X. Corvini

285 Assessment of ecological status in small urban streams of Prague agglomeration
J. Nábělková, D. Komínková and G. Šťastná

293 Endocrine disrupters in the aquatic environment: the Austrian approach – ARCEM

301 Analysis and fate of insect repellents
T.P. Knepper

309 The Elbe flood in August 2002 – occurrence of polychlorinated dibenzo-p-dioxins, polychlorinated dibenzo furanes (PCDD/F) and dioxin-like PCB in suspended particulate matter (SPM), sediments and fish

317 Contamination of sediments in Varna Lakes and Varna Bay
G.P. Shtereva, B.S. Dzhurova and T.S. Nikolova

Toxicity

321 Contribution of brominated organic disinfection by-products to the mutagenicity of drinking water
S. Echigo, S. Itoh, T. Natsui, T. Araki and R. Ando

329 Comparison of different advanced oxidation process to reduce toxicity and mineralisation of tannery wastewater
S.G. Schrank, H.J. José, R.F.P.M. Moreira and H.Fr. Schröder

335 Toxic effect of pharmaceuticals on methanogenesis
M. Fountoulakis, P. Drillia, K. Stamatelatou and G. Lyberatos

341 On the effect of pharmaceuticals on bacterial nitrite oxidation
S.N. Dokianakis, M.E. Kornaros and G. Lyberatos

Natural attenuation

347 Assessment of microbial natural attenuation in groundwater polluted with gasworks residues
S. Schulze and A. Tiehm

355 LAS in urban rivers and factors contributing to reduction of their concentrations
Y. Kobuke

363 Re-evaluation and reconstruction of water purification system using soil I.
Assessment of soil as a sorbent of humic substances and phosphate ion

369 Re-evaluation and re-construction of water purification system using soil II.
Removal of pollutants from infiltrating water
