Jan Mayen Island in Scientific Focus

edited by

Stig Skreslet
Faculty of Fisheries and Natural Sciences,
Bodø Regional University,
Norway

Kluwer Academic Publishers
Dordrecht / Boston / London

Published in cooperation with NATO Scientific Affairs Division
# Table of Contents

NATO ARW Participants: Names and Addresses ................................. ix

Foreword ................................................................................... xi

Preface ...................................................................................... xiii

Acknowledgements ..................................................................... xv

1. Research Operations on Jan Mayen Island: Feasibility, Scope and Legitimacy

   Stig Skreslet ........................................................................ 1

2. Geology of Jan Mayen Island and Surroundings: An Overview

   Krzysztof Birkenmajer ....................................................... 13

3. The Potential of the Beerenberg Glaciers for Climate Studies

   Jon OM Hagen .................................................................... 27

4. Meteorological Observations on Jan Mayen

   Øystein Hov ........................................................................ 37

5. North Atlantic Influence on Lithuanian Climate: Effects of Large-Scale Atmospheric Circulation

   Gintautas Stankunavicius .................................................. 41
6. Northern Hemispheric Air Circulation

Vladimir F Romanov

7. Natural and Anthropogenic Aerosols in Arctic Areas

Marko Vana

8. On the Origin of Climatic Signals in the Nordic Seas

Vladimir I Byshev, Victor G Neiman, and Jury A Romanov

9. The Circulation of the Nordic Seas

Jan Piechura

Stig Skreslet

11. Sea Ice Export as an Indicator of Changing Arctic Ocean Ecology

Igor A Melnikov

12. Zooplankton Habitats of the Greenland Sea: An Experimental Laboratory for Studies of Pelagic Ecology

Hans-Jürgen Hirche

13. Continuous Plankton Recorder Observations: Extension of the System into the Nordic Seas

Anthony W Walne and Philip C Reid

14. Cyclic Variability of Climate and Fisheries Resources: Relevance for the Nordic Seas

Leonid B Klyashtorin and Alexey A Lyubushin
15. **The Marine Sublittoral Fauna of Jan Mayen Island: Zoogeography and Succession on “New” Lava Grounds**

Bjørn Gulliksen, Frank Beuchel, Torleiv Brattegard, and Rune Palerud ................................................................. 159

16. **The Marine Fauna of Arctic Islands as Bioindicators**

Jan M Węsławski ................................................................. 173

17. **Seabird Research and Monitoring on Jan Mayen**

Geir W Gabrielsen and Hallvard Strøm .............................................. 181

18. **Dispersal of Plants in Remote Arctic-Alpine Habitats: Modes and Time-Scales for Colonization**

Volodymyr Kyyak ........................................................................ 195

19. **Biological Premises for Management of an Arctic Fox (*Alopex lagopus*) Population: The Demise and Future of the Hare-Footed Fox on Jan Mayen**

Kirsti Rouvinen-Watt .................................................................... 207

20. **Research Opportunities for Jan Mayen Using Stable Isotope Analyses: Long-Term Monitoring of Marine and Freshwater Foodwebs**

Keith A Hobson .......................................................................... 219

Louwrens Hacquebord ................................................................. 229

22. **Past and Present Infrastructure of Jan Mayen as Historical Documents: The Fate of Anthropogenic Remains**

Susan Barr .................................................................................. 239
23. Research Operations in Remote Arctic Islands: The Model of the Polish Polar Station Hornsund in Spitsbergen

Piotr Głowacki ................................................................. 249

24. Jan Mayen Island and its Waters as Potential Targets for European Arctic Research

Graham Shimmield .......................................................... 261

25. The Scope for Norwegian Commitments Related to International Research on Jan Mayen Island

Odd G Skagestad ............................................................ 269

26. Norwegian Protection of Arctic Islands: Restrictions and Consequences

Jan-Petter Huberth-Hansen ............................................... 279

27. Jan Mayen Infrastructure: Plans for the Future

Leif K Tviberg .................................................................. 281

28. The Logistics of Past Scientific Research on Jan Mayen Island: How to Land, Exist and Work

Susan Barr ......................................................................... 285

29. Logistics for Future Jan Mayen Island Research: Results from NATO Advanced Research Workshop

Stig Skreslet, Krzysztof Birkenmajer, Louwrens Hacquebord, Keith A Hobson, and Igor A Melnikov .......................................................... 295

30. Summary of NATO ARW: Blue-Print for Jan Mayen Island Research Development

Stig Skreslet, and Krzysztof Birkenmajer .................................. 341

Index .................................................................................. 345
