Chapter 4

**Economic Deregulation in the USA**

ROBERT J. WINDLE

1. Introduction 49
2. Rationale for economic regulation 50
3. History of network deregulation 52
4. Results of network deregulation and continuing issues 56
5. Conclusion 60
References 62

Chapter 5

**Tendering of Services**

JOHN PRESTON

1. Introduction 65
2. Forms of tendering 65
3. Theoretical evidence on tendering 66
4. Empirical evidence on bus tendering 68
   4.1. Evidence on the Scandinavian model 68
   4.2. Evidence on hybrid models 72
   4.3. Overview of bus tendering 73
5. Empirical studies of rail tendering/franchising 74
6. Overview 77
7. Conclusions 78
References 80

Chapter 6

**Performance Evaluation Frameworks**

DAVID A. HENSHER

1. Strategic thinking, competitive advantage, and effective performance 83
Chapter 9
Integrated Transport Systems: Public–Private Interfaces
JOSE M. VIEGAS 135
1. Transport systems as integrators 135
2. The features of integrated transport systems 137
3. The difficulties and processes of transport system integration 139
4. The involvement of private agents in integrated transport systems: advantages and difficulties 143
5. The instruments for integration and their deployment 146
6. Conclusions 153
References 154

Chapter 10
The History of Transport Planning
MAX G. LAY 157
1. Before mechanical power 157
2. The age of steam 159
3. After the car 161
4. Melbourne case study 163
   4.1. 1929 Melbourne Plan of General Development 163
   4.2. MMBW 1954 Town Plan 164
   4.3. MTS 1969 Transportation Plan 164
   4.4. From 1973 to date 165
5. Model applications 165
6. Computing power 166
7. The four-step LUTS 167
8. Further developments 169
9. Problems and solutions 171
References 173

Chapter 11
The Evolution of Transport Networks
DAVID LEVINSON 175
1. Introduction 175
2. A macroscopic perspective 177
3. Microscopic models 181
   3.1. The node location problem 181
   3.2. The link formation problem 182
   3.3. The link expansion (contraction) problem 184
4. Conclusions 187
References 188
## Chapter 12

**Transport and Regional Growth**  
CHRIS JENSEN-BUTLER and BJARNE MADSEN  

1. **Introduction**  
   1.1. Definitions  
   1.2. Problems  
   1.3. Spatial issues  

2. **Approaches to the analysis of interactions between transport and the economy**  
   2.1. Traditional approaches  
   2.2. Approaches based upon the analysis of externalities  
   2.3. Social-accounting-matrix-based approaches  
   2.4. Computable general equilibrium models  

3. **Illustrating the central modeling issues**  
   3.1. The LINE model  

4. **The key dimensions**  

5. **Different modeling approaches: concrete studies**  
   5.1. Transport modeling  
   5.2. Production function models  
   5.3. Accessibility models  
   5.4. Inter-regional SAM models  
   5.5. Land use/transport interaction models  
   5.6. LINE  
   5.7. Spatial CGE models

## Chapter 13

**Infrastructure Policy**  
ROGER VICKERMAN  

1. **Introduction**  

2. **Infrastructure characteristics and policy objectives**  

3. **Infrastructure as public utility**  

4. **Private finance and provision of infrastructure**  

5. **Regulation of infrastructure**  

6. **Conclusions**  

References

Chapter 15

Long-term Planning

EDWARD WEINER and ELIZABETH S. RIKLIN 255

1. Introduction  255
2. Background  255
3. Overview of the transportation planning process  256
4. Visioning and transportation goals  256
4.1. Transportation goals  258
4.2. Performance measures  258
4.3. Land use and transportation  259
4.4. Public participation  260
5. Information  260
6. Identify transportation needs  261
6.1. Assess current conditions  261
6.2. Project future conditions  262
7. Develop and evaluate alternatives  263
7.1. Generate alternative strategies and actions to address the gaps  263
7.2. Evaluate alternative strategies and actions to address the gaps  264
7.3. Identify the distribution of costs, benefits, and impacts  267
8. Prepare a long-term plan  267
8.1. Long-term plan document  267
8.2. Set priorities  267
8.3. Establish financial plan  268
8.4. Transportation improvement program  269
9. Monitoring and evaluation  269
10. Conclusion  270
Appendix  270
References  272
Chapter 16
Transportation Asset Management
ODD J. STALEBRINK and JONATHAN L. GIFFORD

1. Introduction 275
2. Key functional areas of transportation asset management systems 275
3. TAM benefits 276
4. Transportation asset management systems tools 277
5. TAM development in Commonwealth countries 278
6. TAM development in the USA 279
7. Concluding remarks 282
References 282

Chapter 17
Financing Transport Infrastructure
RICO MAGGI

1. Introduction 285
2. The evidence from past to present 286
3. Financing transport infrastructure via pricing 290
4. Public-private partnership 294
5. Conclusions 296
References 297

Chapter 18
A Banking Perspective on Transport
NICHOLAS HANN and TIM MACK

1. Introduction 299
2. A banker’s view of the transport sector 299
3. How bankers look at projects differently from economists 302
4. Institutional models 304
   4.1. BOOT/BTO/BLT 304
   4.2. Franchising 305
   4.3. The role of subsidy 306
5. Key issues for governments and bankers 308
   5.1. A service or an asset? 308
   5.2. Risk transfer and off balance sheet 308
   5.3. Certainty of cost 309
   5.4. Cost of capital 309
   5.5. Termination and step in rights 310
   5.6. Ramp up 310
   5.7. Shadow tolling 311
   5.8. Revenue and value capture 311
6. Financing structures and options
   6.1. Equity
   6.2. Leasing - finance leasing and operating leasing
   6.3. Mezzanine debt
   6.4. Bank debt
   6.5. Capital market debt
   6.6. CPI indexed bonds
   6.7. Municipal/revenue bonds
   6.8. Securitization
   6.9. National Express Melbourne rolling stock financing
   6.10. A tale of two airport rail links: Brisbane Airtrain and Sydney Airlink
   6.11. London Underground

7. Why use private sector finance?

8. Has private investment in transport infrastructure been successful?

9. Trends in transportation finance
   9.1. Evolving risk profile in privately funded road projects
   9.2. Commercial models
   9.3. Major barriers to private sector investment in public transport

10. Conclusions

Chapter 19

Financial Analysis: Applications to Australian Toll Road Entities
STEWARD JONES

1. Introduction
2. Regulations governing financial disclosure
3. The primary financial statements used in financial analysis
   3.1. The statement of financial position
   3.2. The statement of financial performance
   3.3. The statement of cash flows
4. Background: Transurban and the Hills Motorway Group
5. Financial analysis of TCL and HLY
6. Financial ratio analysis
   6.1. Assessing profitability
   6.2. Assessing cash flow from operations
   6.3. Assessing cash position
   6.4. Assessing liquidity
   6.5. Assessing capital structure
   6.6. Assessing debt servicing capability
Chapter 22

Asset Management and Funding: Transport and Non-profit Institutions
JAMES H. MILLER, JILL HOUGH and LYN HELLEGAARD 391

1. Introduction 391
2. The role of non-profit corporations in passenger transportation 391
3. Characteristics of non-profit corporations 393
4. Advantages and disadvantages of the private, non-profit form of organization 394
5. Case studies of non-profits 396
   5.1. York County, Maine 396
   5.2. Bis-Man Transit Board, Bismarck, North Dakota 398
   5.3. Wheels of Wellness, Inc., Philadelphia, Pennsylvania 399
   5.4. Missoula Ravalli Transportation Management Association, Missoula, Montana 400
