Preface xiii

Introduction 1

Part I  Astronomy in the curriculum around the world

Introduction 7

1 Why astronomy is useful and should be included in the school curriculum 10
John R. Percy

2 Astronomy and mathematics education 14
Rosa M. Ros

Open discussion 25

3 Engaging gifted science students through astronomy 27
Robert Hollow

Poster highlights 34

Part II  Astronomy education research

Introduction 41

4 Astronomy education research down under 44
John M. Broadfoot and Ian S. Ginns

5 A contemporary review of K–16 astronomy education research 58
Janelle M. Bailey and Timothy F. Slater
Contents

6 Implementing astronomy education research 66
Leonarda Fucili

7 The Astronomy Education Review: report on a new journal 80
Sidney C. Wolff and Andrew Fraknoi

Poster highlights 87

Part III Educating students

Introduction 95

8 Textbooks for K–12 astronomy 97
Jay M. Pasachoff

9 Distance/Internet astronomy education 104
David H. McKinnon

Open discussion 117

Poster highlights 119

Part IV Educating teachers

Introduction 137

10 Pre-service astronomy education of teachers 139
Mary Kay Hemenway

11 In-service astronomy education of teachers 146
Michèle Gerbaldi

Poster highlights 153

Part V Astronomy and pseudoscience

Introduction 163

12 Astronomy, pseudoscience and rational thinking 164
Jayant V. Narlikar

13 Astronomical pseudosciences in North America 172
John R. Percy and Jay M. Pasachoff
Contents

Part VI  Astronomy and culture

Introduction 179

14  Teaching astronomy in other cultures: archeoastronomy 181
    Julieta Fierro

Poster highlights 191

Part VII  Astronomy in developing countries

Introduction 195

15  Astronomy curriculum for developing countries 197
    Case Rijsdijk

16  Science education resources for the developing countries 206
    James C. White II

Part VIII  Public outreach in astronomy

Introduction 215

17  What makes informal education programs successful?
    (Total Solar Eclipse 2001 – live from Africa) 217
    Nahide Craig and Isabel Hawkins

18  The role of science centers and planetariums 221
    Nick Lomb

19  Science education for the new century – a European perspective 227
    Claus Madsen

20  Communicating astronomy to the public 235
    Charles Blue

Poster highlights 238

Part IX  The education programs of the International Astronomical Union

Introduction 247

21  A short overview of astronomical education carried out by the IAU 249
    Syuzo Isobe
Contents

Part X Conclusions

Closing discussion 257

Conclusion 260
