Biotic Interactions in the Tropics
Their Role in the Maintenance of Species Diversity

Edited by

DAVID F. R. P. BURSLEM
School of Biological Sciences, University of Aberdeen

MICHELLE A. PINARD
School of Biological Sciences, University of Aberdeen

SUE E. HARTLEY

Contents

List of contributors page viii
Preface xi

PART I Plant-plant interactions
1 Plant-plant interactions in tropical forests 3
John J. Ewel and Ankila J. Hiremath
2 Resource capture and use by tropical forest tree seedlings and their consequences for competition 35
Lourens Poorter
3 Role of life-history trade-offs in the equalization and differentiation of tropical tree species 65
James W. Dalling and David F. R. P. Burslem
4 Neighbourhood effects on sapling growth and survival in a neotropical forest and the ecological-equivalence hypothesis 89
María Uriarte, Stephen P. Hubbell, Robert John, Richard Condit and Charles D. Canham
5 Ecological drift in niche-structured communities: neutral pattern does not imply neutral process 107
Drew W. Purves and Stephen W. Pacala

PART II Plant-microbe interactions
6 Dimensions of plant disease in tropical forests 141
Gregory S. Gilbert
7 Mycorrhizas and ecosystem processes in tropical rain forest: implications for diversity 165
Ian J. Alexander and S. S. Lee
8 An overview of arbuscular mycorrhizal fungal composition, distribution and host effects from a tropical moist forest 204
Edward Allen Herre, Damond Kyllo, Scott Mangan, Rebecca Husband, Luis C. Mejia and Ahn-Heum Eom
9 Tropical plants as chimera: some implications of foliar endophytic fungi for the study of host-plant defence, physiology and genetics

PART III Plant–animal interactions
10 Implications of plant spatial distribution for pollination and seed production
Jaboury Ghazoul

11 Seed dispersal of woody plants in tropical forests: concepts, examples and future directions
Helene C. Muller-Landau and Britta Denise Hardesty

12 The role of trophic interactions in community initiation, maintenance and degradation
José Manuel Vieira Fragoso

13 Impacts of herbivores on tropical plant diversity
Robert J. Marquis

14 Have the impacts of insect herbivores on the growth of tropical tree seedlings been underestimated?
Fergus P. Massey, Malcolm C. Press and Sue E. Hartley

15 Multi-trophic interactions and biodiversity: beetles, ants, caterpillars and plants
Deborah K. Letourneau and Lee A. Dyer

16 The trophic structure of tropical ant–plant–herbivore interactions: community consequences and coevolutionary dynamics
Doyle McKey, Laurence Gaume, Carine Brouat, Bruno di Giusto, Laurence Pascal, Gabriel Debout, Ambroise Dalecky and Martin Heil

17 Multitrophic interactions in a neotropical savanna: ant–hemipteran systems, associated insect herbivores and a host plant
Paulo S. Oliveira and Kleber Del-Claro

PART IV Biotic interactions in human-dominated landscapes
18 The alteration of biotic interactions in fragmented tropical forests
William F. Laurance

19 Effects of natural enemies on tropical woody-plant invasions
Saara J. DeWalt
