CARLOS DE OLIVEIRA GALVÃO
Universidade Federal de Campina Grande – UFCG, Campina Grande, Brazil

Part 2 of the proceedings of the International Symposium on Regional Hydrological Impacts of Climatic Variability and Change with an Emphasis on Less Developed Countries (S6) held during the Seventh Scientific Assembly of the International Association of Hydrological Sciences (IAHS) at Foz do Iguaçu, Brazil, 3–9 April 2005. The symposium was organized by the IAHS International Commissions on Coupled Land–Atmosphere Systems (ICCLAS), supported by other commissions, programmes and working groups (PUB, ICSW, IAMAS, WRCP, CLIVAR, GEWEX, WMO/UNESCO WCP-Water, and HELP).

Preface by Stewart Franks, Thorsten Wagener, Eva Bøgh, Hoshin V. Gupta, Luis Bastidas, Carlos Nobre & Carlos de Oliveira Galvão

Background and Summary
Regional hydrological impacts of climate change—hydroclimatic variability
Stewart Franks & Thorsten Wagener

1 South America

Observed and modelled historical hydroclimatic variability in South America: cases of the Amazon, São Francisco and Paraná–La Plata rivers
Jose A. Marengo (Invited)

Discharge variability within the Amazon basin J. Ronchail, D. Labat, J. Callède, G. Cochonneau, J. L. Guyot, N. Filizola & E. de Oliveira

2 Oceania

Hazard warning! Hydrological responses in the Fiji Islands to climate variability and severe meteorological events James Terry

Multi-decadal variability of rainfall and streamflow across eastern Australia Danielle C. Verdon, Adam M. Wyatt, Anthony S. Kiem & Stewart W. Franks

Identification of oscillations in historical global streamflow data using empirical mode decomposition Francis H. S. Chiew, Murray C. Peel, Gnanathikkam E. Amirthanathan & Geoffrey G. S. Pegram

3 North America and Europe

Multi-annual fluctuations in precipitation and their hydrological and ecological consequences in regional scale Krzysztof Blazejczyk, Wiesława Kasperska-Wołowicz, Leszek Labedzki & Anna Kunert

Change detection in high river flows in Europe Zbigniew W. Kundzewicz

Influence of climate variability on water resources in the Bulgarian South Black Sea basin Bernardo Lizama Rivas & Ivanka Koleva-Lizama
Modelling hydrological responses of the Athabasca River basin to climate change 
by the Modified ISBA Land Surface Scheme 
*Ernst Kerkhoven & Thian Yew Gan*

Climate, water and renewable energy in the Nordic countries 
*Árni Snorrason & Jóna Finndís Jónsdóttir*

A distributed real-time semiarid flash-flood forecasting model utilizing radar data 
*Soni Yatheendradas, Thorsten Wagener, Hoshin Gupta, Carl Unkrich, Mike Schaffner & David Goodrich*

Evaluation of the effect of selective logging on the energy-water and carbon exchange processes 
*Rafael Rosolem, Luis A. Bastidas, W. James Shuttleworth, Luis G. Goncalves De Goncalves, Eleanor J. Burke, Humberto R. Da Rocha, Scott D. Miller & Michael L. Goulden*

4 Africa

Modèle de transformation pluie–débit basé sur le Principe de Moindre Action 
*A. Afouda, E. A. Lawin, T. Lebel, C. Peugeot & L. Seguis*

Storage capacity and long-term water balance of the Volta Basin, West Africa 
*Jan Friesen, Marc Andreini, Winston Andah, Barnabas Amisigo & Nick van de Giesen*

Vulnérabilité climatique et ses conséquences sur les écoulements du fleuve 
*Sénégal  Alioune Kane*

Changements des régimes hydrologiques des rivières du sud-Cameroun: un impact de la variabilité climatique en zone équatoriale 
*Gaston Liénou, Gil Mahé, Jean-Emmanuel Paturel, Eric Servat, Hélène Lubès-Niel, Daniel Sighomnou, Georges EmmanuelEkodeck & Alain Dezetter*

Sensibilité des cours d’eau ouest-africains aux changements climatiques et environnementaux: extrêmes et paradoxes 
*Gil Mahé, Jean Claude Olivry & Eric Servat*

Long-term trends of heavy rainfall in South Africa  *J. G. Ndiritu* 

Impact of a long drought period on a large carbonate aquifer: the Liassic aquifer of the Sais plain and Middle Atlas plateau (Morocco) 
*Fouad Amraoui, Mountaz Razack & L. Houssaine Bouchaou*

How changing rainfall regimes may affect the water balance: a modelling approach in West Africa  
Matthieu Le Lay & Sylvie Galle

Spatial disaggregation of Sahelian rain fields: a new application of the Gibbs sampler  
Hubert Onibon, Thierry Lebel, Abel Afouda & Gilles Guillot

5 Asia

Predicting Central Asia river flows from regional precipitation and wind patterns during the preceding cold season  
Mathew Barlow & Michael Tippett

Precipitation trends and their impact on the discharge of China’s four largest rivers, 1951–1998  
Ye Baisheng, Li Chong, Yang Daqing, Ding Yongjian & Shen Yongping

Geostatistical analysis of observed streamflow and its response to precipitation and temperature changes in the Yellow River  
Guobin Fu & Shulin Chen

Impacts of ENSO on monthly precipitation in South Korea and Fukuoka, Japan  
Akira Kawamura, Young-Hoon Jin, Kenji Jinno & Ronny Berndtsson

Relationship between ENSO and snow covered area in the Mekong and Yellow river basins  
Anthony S. Kiem, Mikhail V. Geogievsky, Hapuarachchige P. Hapuarachchi, Hiroshi Ishidaira & Kuniyoshi Takeuchi

Impact of natural variability and anthropogenic factors on the flood events in northeastern India  
U. C. Sharma & Vikas Sharma

Recent trend in spatiotemporal variation of rainfall over India—an investigation into basin-scale rainfall fluctuations  
Nityanand Singh, Neelima A. Sontakke, H. Narendra Singh & Amit Kumar Pandey

Modelling the spatial distribution of actual terrestrial evapotranspiration using a hydrological and meteorological approach  
Che-Sheng Zhan, Jun Xia, Zhao-Liang Li & Cun-Wen Niu

Downscaling atmospheric circulation data for monsoon rainfall forecasting in India  
Anupam K. Singh, Erwin Zehe & Andras Bardossy
