SELECTED PAPERS OF THE INTERNATIONAL SYMPOSIUM ON SHALLOW FLOWS, 16-18 JUNE 2003, DELFT, THE NETHERLANDS

Shallow Flows

*Edited by*

Gerhard H. Jirka  
*Institute for Hydromechanics, University of Karlsruhe, Germany*

Wim S.J. Uijtewaal  
*Environmental Fluid Mechanics Section, Delft University of Technology, The Netherlands*

A.A. BALKEMA PUBLISHERS  LEIDEN / LONDON / NEW YORK / PHILADELPHIA / SINGAPORE
# Table of contents

**Foreword**

XI

**Introduction**

Shallow flows: a definition

G.H. Jirka & W.S.J. Uijtewaal

3

**Shallow jets, wakes and mixing layers**

Hydrodynamic instability and transition to turbulence for quasi two-dimensional flows, 2D or not 2D?

J.-M. Chomaz, P. Billant & F. Gallaire

15

An experimental investigation of a boundary current instability

E. Thivolle-Cazat & J. Sommeria

23

Shallow turbulent wakes: linear stability analysis compared to experimental data

S.A. Socolofsky, C. von Carmer & G.H. Jirka

31

On coherent structures in shallow flows

M.S. Ghidaoui & A.A. Kolyshkin

39

Vortex formation in shallow flows

D. Rockwell, H. Fu, J.-C. Lin & M. Ozgoren

47

Vortex dipoles in a shallow water layer

D. Sous, N. Bonneton & J. Sommeria

57

Dipole formation by tidal flow in a channel

M.G. Wells & G.J.F. van Heijst

63

Starting jets in a double tank apparatus

V.H. Chu & J.-B. Zhang

71

Interaction of quasi-horizontal jets in bounded domains

I. Kanda & P.F. Linden

79

Quasi-two-dimensional turbulence in shallow fluid layers: the role of bottom friction and fluid layer depth

87

Perturbing the inflow condition in shallow mixing layer experiments

B.C. van Prooijen, M. de Nijs & W.S.J. Uijtewaal

95

Influence of secondary motion in large-scale coherent vortical structures on the mass transport in a shallow turbulent wake flow

C.F. von Carmer, A.C. Rummel & G.H. Jirka

103

Transverse vibrations of an sphere at high combined mass-damping parameter

D. Miraude & M. Greco

111

The junction vortex system: time-mean and instantaneous flow fields

M.R. Lawless, S.N. Lane & J.L. Best

117
Shallow stratified and rotating flows in ocean and atmosphere

Quasi-two-dimensional flow structures in stratified and rotating turbulent flows
H.J.S. Fernando

Rotating shallow water flow past an obstacle: numerical and laboratory experiments
G. Perret, M. Farge, A. Stegner, A. Azzalini & K. Schneider

Fine structure of stratified flow around uniformly moving 2D obstacles in a continuously stratified fluid
Y.D. Chashechkin, V.V. Mitkin & R.N. Bardakov

Coriolis effects in mesoscale shallow layer flows
J.C.R. Hunt, A. Orr, D. Cresswell & A. Owinoh

Organized structures in the atmospheric boundary layer
D. Etling & S. Weinbrecht

Formation of large-scale coherent structures in turbulent convection
T. Elperin, N. Kleeorin, I. Rogachevskii & S. Zilitinkevich

Transient adjustment of buoyancy-driven exchange flows over a descending barrier
A.J.S. Cuthbertson, P.A. Davies & M.J. Coates

Exchange flows through a long shallow channel
E.A. Cowen & F.J. Rueda Valdivia

Computation of non-hydrostatic internal waves over undular topography
R.J. Lebeur & J.D. Pietrzak

Decomposition of current profiles into modes of the internal wave equation
B. Boehrer

Aspects of oscillatory along-shelf flow in the vicinity of an isolated submarine canyon

Long term morphodynamic equilibrium of tidal channels: theory and experiments
N. Tambroni, M. Bolla Pittaluga & G. Seminara

Tidal current computation in the Mar Piccolo (Taranto)
D. Malcangio & M. Mossa

Field and model studies of the nepheloid layer in coastal waters of the Great Barrier Reef, Australia
R. Brinkman, E. Wolanski & S. Spagnol

River and channel flows

Complex shallow flows in civil and environmental engineering
H.J. de Vriend

2D numerical model of unsteady river flow
J. Murillo, P. Garcia-Navarro & P. Brufau

Transition process of coherent vortices in depth-varying unsteady compound open-channel flows
I. Nezu, M. Sanjou & K. Goto

Coherent flow structures in shallow gravel-bed rivers: an experimental and numerical study
S.N. Lane, R.J. Hardy & C.J. Keylock

Shear layers in partially vegetated channels: analogy to shallow water shear layers
B.L. White, M. Ghisalberti & H.M. Nepf

Characterisation of stem wake effects using PIV imagery
R.J. Schindler, S.N. Lane, C.J. Keylock & P.S. Naden
Coherent vortex structures in an open channel flow with sand ridges by DNS  
*S. Hayashi & T. Ohmoto*  
285

Direct numerical simulation of turbulent flow over a rough bed  
*K.M. Singh & J.J.R. Williams*  
293

Uniform flow computations in natural open channels  
*I. Aydin*  
299

A multiple scales analysis of undular hydraulic jump in turbulent open channel flow  
*H. Steinrück & W. Schneider*  
305

Quasi-3D simulation of flow in sharp open-channel bends with horizontal and developed bed topography  
*K. Blanckaert, L. Glasson, H.R.A. Jagers & C.J. Sloff*  
307

Laboratory experiments of shallow free surface flows  
*R. Booij*  
317

Flow structures in meander bends with recirculation  
*R.I. Ferguson & D.R. Parsons*  
325

Characteristics of flow and bed form in skewed open channel  
*T. Ishigaki & A. Endo*  
333

3-D numerical calculation of shallow free-surface flow in time-dependent stages from rectangular to compound channels  
*I. Nezu & M. Sanjou*  
339

Large-scale coherent structures in compound channels  
*D. Bousmar & Y. Zech*  
347

Free-surface oscillation in an open channel with spur dikes  
*T. Ohmoto & R. Hirakawa*  
355

Numerical simulation with a subgrid model: a case of a meandering channel with river training structures  
*S. Boony-aro-onnet & Y. Shimizu*  
361

Interaction between river mouth flow and marine structures: numerical and experimental investigation  
*F. Lalli, B. Gallina, M. Miozzi & G.P. Romano*  
369

Alternate bars of finite amplitude: spatial analysis  
*B. Federici & M. Colombini*  
379

Numerical experiments on the alternate bars considering the bank strength  
*C.-L. Jang & Y. Shimizu*  
387

**Transport processes in shallow flows**

Coherent vortices, Lagrangian particles and the marine ecosystem  
*C. Pasquereau, A. Bracco & A. Provenzale*  
399

An experimental investigation of pollutant mixing and trapping in shallow coastal re-circulating flows  
*M.I. Yuce & D. Chen*  
413

PLIF visualisation of mass release in open channel flows with water depths from shallow to supershallow  
*F.E. Tang & D. Chen*  
421

3D transport of a passive pollutant for wind-driven flows in enclosed basins  
*M. Colombini & A. Stocchino*  
429
Godunov-type quadtree model of species dispersion in shallow flows
Q. Liang, A.G.L. Borthwick, P.H. Taylor & J. Huang

Dynamics of shear layers induced by hairpin packets in shallow free surface flows: implication for gas transfer
D. Hurther, E. Terray & U. Lemmin

The effect of heat release from a gas–liquid interface on turbulence structure in fully developed shallow water flows
L.I. Enstad, R. Nagaosa & G. Alendal

Hydro- and morphodynamic computations of laboratory experiments with periodic flow conditions in groin fields
M. Krebs & U. Zanke

Tracer experiments in the River Rhine: evaluation of the skewness of observed concentration distributions
A. van Mazijk & E.J.M. Veling

2-D particle tracking to determine transport characteristics in rivers with dead zones
V. Weitbrecht, W. Uijttewaal & G.H. Jirka

Tracer experiments in the Groyne fields of the River Elbe (Germany)
H.P. Kozerski, R. Schwartz & T. Hintze

Sediment-laden flows over fully-developed bedforms: first and second harmonics in a shallow, pseudo-2D turbulence environment
M.A. Verbanck

Hydrodynamic control of sediment-water fluxes
A. Lorke, M. Schmid, B. Müller, M. Maerki & A. Wüest

Effect of bed roughness on suspended sediment: experimental and theoretical studies
B.S. Mazumder, K. Ghoshal & D.C. Dalai

Effects of secondary currents on suspended sediment transport in an open channel flow
T. Ohmoto, Z. Cui & R. Hirakawa

Numerical modeling and turbulence closure techniques for shallow flows

CFD simulation of two- and three-dimensional free-surface flows using a RANS solver
D.D. Apsley & W. Hu

Numerical accuracy in the solution of the shallow-water equations
P. Broomans, C. Vaik, A.E. Mynett & J. Mooiman

Numerical simulation of river flows in a Lagrangian reference frame
B.H. Devkota & J. Imberger

A mixing-length model for shallow turbulent wakes
P.K. Stansby

A set of efficient numerical tools for floodplain modeling
P. Archambeau, B. Dewals, S. Erpicum, S. Detrembleur & M. Pirotton

Horizontal large eddy simulation applied to stratified tidal flows
A.C. Bijlsma, R.E. Uittenbogaard & T. Blokland

Three-dimensional and depth-averaged large eddy simulation of shallow water flows
C. Hinterberger, J. Fröhlich & W. Rodi

Subgrid-scale model for quasi-2D turbulence in shallow water
R.E. Uittenbogaard & B. van Vossen
Using 2D unstructured mesh for numerical simulation of free surface flow in meandering canal
S.R.S. Yazdi & M.M.Z. Qomi

Unstructured spectral/hp element methods for shallow water flows
C. Eskilsson, L. Bergdahl & S.J. Sherwin

Drying and wetting in finite element shallow-water flows
O. Bokhove & D. Wirosoetisno

Application of Kalman filter to finite element model of shallow flow analysis
H. Kiri, K. Takaki, H. Tanji & T. Nakaya

Godunov-type Boussinesq modeling of extreme wave run-up

Depth averaged model of open channel flows over an arbitrary surface
T. Hosoda

Estimating traveling time of flat terrain by 2-dimensional overland flow model
D. Su & X. Fang

A simple model of a velocity distribution in accelerating/decelerating flows and its application
to depth averaged flow model
S. Onda, T. Hosoda & I. Kimura

Complex flow around groynes, computations with Delft3D in combination with HLES
S.A.H. van Schijndel & H.R.A. Jagers

3D numerical analysis of unsteady flow structures around inclined spur dikes by means of
a non-linear k-ε model
I. Kimura, T. Hosoda, S. Onda & A. Tominaga

Three-dimensional numerical analysis of turbulent wind-induced flows in the Lake Balaton (Hungary)
G. Ciraolo, G. Lipari, E. Napoli, J. Józsa & T. Krámer
